

### MVP VIDEO UPDATE INFORMATION

Enclosed please find Dr. Daub's MVP video presentation(VHS only). We believe the video will help you to understand more about Dr. Daub's MVP program as well as being a valuable educational and selling tool for your customers. There are several changes that have been made to the product since the video was produced in 1985.

1. MVP in the past was referred to as VMP which stood for Vascular Maintenance & Prevention. Our friends at the FDA did'nt like that name so they made us change it. It would have been to costly to re-make the video tape, therefore when VMP is mentioned throughout the presentation you'll know why it has been changed to MVP.

2. In the video, bottle #1 is referred to as containing Primrose Oil. Well, again our friends at the FDA have put the hammer down on another great nutritional supplement. Our MVP 1 now contains Marine Lipids with Curcumin.

We hope this explanation will prevent any confusion for those who will watch the MVP video. We believe that if used correctly along with a brief explanation of these two changes the video will help you to promote and sell the MVP program. If you have any questions concerning this explanation or the video presentation please call us right away. Our toll free number is 1-800-397-7185

Cordially,

*Bruce Daub*
