Why Live With Pain? Let's Correct the Cause!

Did you know that the cause is often pinched nerves along the spine? These and many other symptoms can be associated as spinal subluxations (misalignments). These subluxations may occur suddenly through accidents or appear after long periods of time. So why live with pain? You deserve to feel good! Call now for a consultation.

ON-THE-JOB BACK INJURY

Each month Americans lose 5,000,000 hours of work because of back pain. Work injuries to the musculo-skeletal system specifically the low back, are on the increase in spite of all the efforts by the National Safety Council, The American Association of Manufacturers, the Bureau of Labor Statistics, the U.S. Public Health Service, and the U.S. Department of Health and Welfare. Workers suffering from low back injuries have almost reached epidemic proportions.

Chiropractic care is proven to be almost twice as effective as any other discipline of the healing arts. If you as an employer, or you as an employee, are not using chiropractic care for work injuries to the musculo-skeletal system, you're not doing everything possible.

Prevention is certainly the most popular response to this problem and the greatest concentration of energy has been in the area of educating workers on how to avoid "low back injuries."

LOW BACK, HIP AND LEG PAIN

Nagging or recurring aches in low back, hip and leg may suggest a possible lower spinal or pelvic problem. Many times a pinched nerve or slipped disc can cause symptoms such as numbness, pins and needles sensation or even loss of function in the low-back, hip or leg. Proper spinal care is needed to correct these problems.

During our Grand Opening thru June 30th

'HEADACHES

Also called sick headaches, a typical migraine attack begins with a dull throbbing ache in one area of the head and progresses to a piercing pain. These torturous attacks may be preceded by a change in the field of vision — a flickering before the eyes, flashes of light or a partial blocking of the vision. They are sometimes accompanied by nausea or vomiting. They are seldom relieved by aspirin. Their duration is from 2 to 48 hours.

INSURANCE CASES ACCEPTED

- REALTY INSURANCE (MAJOR MEDICAL) • LIABILITY (AUTOMOBILE ACCIDENTS) • WORKMEN'S COMPENSATION (ON JOB)
