Revealing Exposure Of The Medical Racket
And The Medical Trust

In 52 Articles

Specially Written For "THE RECORD"

By

COLONEL DINSHAH P. GHADIALI, M. S-C.,

(Honorary) M.D., M.E., D.C., Ph.D., L.L.D., N.D., D.Opt., D.F.S., D.H.T.,
D.M.T., D.S.T., et cetera.

Metaphysician And Psychologist

Ex-Commander, New York Police Reserve Air Service

President, Dinshah Spectro-Chrome Institute.

Fellow And Ex-Vice-President, Allied Medical Associations Of America;
Member, American Association of Official Surgeons; Member, American
Association For Medico-Physical Research; Member And Ex-Vice-President,
National Association Of Drugless Practitioners; Member, Chartered Institute
Of American Inventors; Academician and Life Member, Maryland Academy
Of Sciences; Life Member, American Anti-Vivisection Society; Member, Anti-
Vaccination League Of London; Member, National Geographic Society; Fellow,
The Theosophical Society; et cetera.

ORIGIN OF THIS VOLUME

On Tuesday, October 26, 1937, I delivered an address at the Cumberland Hotel, Bridgeton, New Jersey, in support of my candidacy for election as Governor of New Jersey. After the speech was over, a quiet-mannered gentleman introduced himself as Shike Levine, Editor of The Record. He asked for an appointment, visited my Institute, at Malaga, New Jersey and the result was this Revealing Exposure Of The Medical Racket And The Medical Trust.

FAMILY HEALTH PROTECTOR

EDITORIAL OF THE RECORD

SPECTRO-CHROME ORIGINATOR WILL WRITE RECORD COLUMN

In 1896 Colonel Dinshah P. Ghadiali came to America to lecture on the X-Rays and Radio-Activity. He met Thomas Edison, Nicola Tesla, Michael Pupin and other great inventors. After his lecture tour he returned to India for medical practice.

He gained recognition when he inaugurated his "Electro-Medical Hall" in Surat, India, for the treatment of diseases by color rays, electricity and other drugless methods.

He toured Europe and in 1911 came back to the United States. Was appointed Professor in the New York College of Engineering and Automobile Instruction. During the war he was commissioned as a Captain in the N. Y. Police Reserve by Special Commissioner of Police Rodman Wanamaker.

Subsequently, he was appointed Governor of the N. Y. Police Aviation School and commissioned as Major. He organized the Aviation Branch of the N. Y. Police and was commissioned Colonel and Commander of the N. Y. Police Reserve Air Service. Piloted the first Police Mail Airplane from New York to Philadelphia and was awarded the "Liberty Medal", for his honorary services by Police Commissioner Richard Enright and Mayor John F. Hylan.

He resigned later to further his inventions. For his scientific attainments received the rank of Academician with Life Membership from the Maryland Academy of Sciences of Baltimore; many other honors were similarly conferred on him, including the degree of Master of Electro-Therapeutics and doctorates in Medicine, Chiropractic, Philosophy, Law, Optometry, Naturopathy, Suggesto-Therapy, Food Science, Hydro-Therapy, Mechano-Therapy, and other drugless systems of healing. He was elected as the Vice-President of the Allied Medical Associations of America, Vice-President of the National Association of Drugless Practitioners and a Fellow of the American Association of Official Surgeons.

The culmination of his 30 years of research was Spectro-Chrome Metry, a novel Science and method of healing human disorders without the use of Diagnosis, Drugs, Manipulation and Surgery. Its unique challenge to the established methods so angered the American Medical Association, that it resulted in numerous legal entanglements. After 17 years of constant court battles, in which the Colonel acted as his own lawyer, he won and today is aiding thousands with his Spectro-Chrome.

The RECORD reporter visited the Colonel's quarter-million dollar institute at Malaga. After an inspection of the amazing assortment of as yet unmarketed inventions, reading also the testimonials of hundreds of people who have been using his invention, we asked the Colonel if he would help the readers of the RECORD by conducting a health column. Colonel Dinshah reminded us that such a column would cause the medical bodies to go on the war path, but we assured him that THE RECORD was not influenced by that group.

He agreed, therefore, to write a column under the title of **FAMILY HEALTH PROTECTOR**, which will begin next Friday in **THE RECORD**.

Friday November 5 1937

ARTICLE 1

WEALTH OF HEALTH

It is said of the wealthy founder of the Standard Oil Company, John D. Rockefeller, that for many years prior to his demise, he was unable to enjoy what is ordinarily assumed to be a "square meal." Surely, such a condition would necessarily hamper any man from getting out of life what is the best in it. The wealthy man had millions of dollars at his disposal, but, the fruits of such wealth were never appreciated by him, because of the lack of the one ingredient in life which makes it pleasant and enjoyable—**HEALTH**.

THE RECORD requested me to write a weekly column on this vital subject as it affects the family. I am glad to do so, as it gives me another channel of expression of my frank and unbiased views and enables me to serve those who need such services.

What IS Health? Health is not merely the absence of "Diseases," as many Medical Dictionaries define it. It is in Truth a condition of Mind, Emotion and Body, wherein all the functions of all the components of this wonderful Trinity are actuated and performed as Nature intended they should be. Such performance of all the vital functions in perfect harmony, may not be possible 100 per cent. in our artificial, civilized life at the present time, but, it is not impossible to aim constantly at the accomplishment of such harmony and attaining thereby what the Declaration of Independence styled "Pursuit of Happiness."

The gaining and maintaining of such Health, is one true purpose of Life, to secure that happiness which can come only by the balance of Mind, Emotion and Body. What the several processes to reach such goal are, I shall demonstrate to you at a later stage. Suffice it to comprehend as a beginning, that as God made Man in His Image, He must have endowed Man with His own attributes and the exercise of such powers from within, must conduce to the production of this prime factor we call—**HEALTH**.

Let me show you the way. Let me be your guide in this direction and soon you will realize, that the powers of God are right within us and that by following certain easy rules of daily conduct, we can shake off Disorder and make of Life the greatest gift conferred on Man as He in His benign intentions and wisdom ordained.

Friday, November 12, 1937

ARTICLE 2

SEVEN FACTORS OF MAN

I explained about Health as being the actuation and performance of all the normal functions of the wonderful Trinity of Mind, Emotion and Body, in perfect harmony. We must now study what constitutes that Trinity before we may be enabled to unfold the mysterious manner in which that Trinity operates. A logical analysis shows, that each of these three is composed of certain definitely understood factors. These

factors in the case of the Trinity, make of a Human Being a Seven-fold object.

The body is admittedly a Chemical Engine, energized by the Foods ingested. All Foods, no matter whether they be Solid, Liquid, Gaseous or Ultragaseous, are essentially chemical in build. However, as all Chemicals are admittedly capable of throwing out some specific Emanation or "Aura," by which their chemical power is derived, the Body using such Foods (hence chemicals), must have also the Energy production power within it. Thus, in considering the word Body, we are obliged to consider also this Chemical Power. While the Body itself is visible, this Chemical Power is invisible.

The question then arises: "What is the difference between a Live Man and a Dead Man?" As both the Live and the Dead have the same Chemistry as far as the Visible Body is concerned, it becomes necessary to consider some dynamic potency within Life that is not in Death. Such "Dynamic Potency" comes through the Breathing Process and makes a third division called Vitality. These three taken together are the true functioning divisions of the Body.

Such Body, to have and to express Emotions, is energized by a distinct Factor, which senses and expresses what we know as any Emotion. Such Factor is really the Psychical side of Life, forming the fourth Factor.

All the above four would be unbalanced and unruly without a controlling guide. Such Guide is the Mind, the fifth Factor. This Mind is the Thinker, but without a "storehouse" to accumulate the thoughts imprinted within, would be without Memory. Hence such provision is made by the sixth Factor, the Memory. The Mediary is known as the Causal Principle in Transcendental Physics or in that science which aims at finding what is beyond ordinary sense experience. It is this Mediary which descends into man from God and makes him His Image. The seventh Factor is God Himself, because without His presence within, His messages can never be interpreted within the cognizance of Man. This Seven-fold composition is a proven fact and as we go along you will be given sufficient demonstrations to show its actual workings in Health and otherwise. Memorize this table, each Factor being a "Vehicle" for that constituent:

- Factor 1. Chemical Body—Visible Physical Vehicle.
- Factor 2. Emanation Body—Invisible Physical Vehicle.
- Factor 3. Breath—Vital Vehicle.
- Factor 4. Emotion—Psychical Vehicle.
- Factor 5. Mind—Mental Vehicle.
- Factor 6. Mediary—Causal Vehicle.
- Factor 7. Cosmic Energy—Spirit of God.

All the Healing Methods of the World did not succeed in producing a system of mathematical accuracy, because they did not take ALL THESE 7 into consideration. Thus, so-called "Medical Science," in endeavoring the reparation of what it styles "Disease," blundered for 6000 years solely with the Physical Visible Vehicle. I realized that serious error in the early years of my medical practice and commenced laborious, costly researches, the startling result of which during the past 17 years since its introduction, proved a blessing to the suffering and sick.

The day of Medicine and Surgery passed with the origination of

Spectro-Chrome Metry, the Science of Automatic Precision, which revolutionized age-old conceptions in healing and threw into the discard pile the entire fabric based on Diagnosis, Drugs, Serums, Vaccines and Injections, Pills, Potions, Poisons and Poniards.

Friday, November 26, 1937

ARTICLE 3

OUR CHEMICAL ENGINE

While we acknowledge the Seven-fold Constitution of Man, as stated in the last Article, we must start at one point and build upwards our knowledge, because of the inherent relation of these various Vehicles to each other. So we shall begin at the Visible Physical Vehicle, commonly called the Human Body.

This beautiful Body of ours is a marvelous machine. It is in fact similar to an automobile, for, all that occurs in the automobile occurs in us also. Truly speaking, the automobile must have been imitated from our Body, which is in reality a Chemical Engine. Anything that would affect the Chemistry of this Body, one way or another, is likely to affect the composition of this wonderful Chemical Engine and hence alter its characteristic functioning. The sole difference between this Body and the automobile is, that the disordered automobile needs outside help to repair its damage, because, it can not repair itself. Our Body, however, is endowed by Mother Nature with self-reparative powers and needs no outsider to repair it, unless these reparative Power Plant Mechanics within it are thrown out of commission.

It is in this singular conception that I differ in entirety from the conceptions of other thinkers. Those "tinkers" try to make of us a machine that outside Pills, Potions and Poisons may set right when out of order. I make of us a machine which has its own reparative powers and when they are out of order can be readjusted to their prior normalcy, by working upon them with Forces whose potencies are energizable right from within. In short, when the Human Engine goes out of commission, I do nothing to it except make it energize by its own potency, just like driving a disabled car home on her own power.

The principle herein involved may be easily remembered. The reparative powers of the Body, are within itself and the Medical Doctor who injects into this sacred Temple of God, Serums, Vaccines, Pills, Potions and Poisons (and sometimes Poniards), proves himself in that manner like a total ignoramus. Such an idea of Health and its restoration when disturbed, disgraces the noble words which call Man the Image of God.

Let us now consider the Human Body from its chemical standpoint. By actual analysis, our Body contains approximately the following Chemical Elements:—

The Chemical Man

Element	Per Cent.
Oxygen	72.0000
Carbon	13.4000
Hydrogen	9.1000
Nitrogen	2.5000

Calcium	1.3000
Phosphorus	1.2500
Sulphur	0.1476
Sodium	0.1000
Chlorine	0.0850
Fluorine	0.0800
Potassium	0.0250
Iron	0.0100
Magnesium	0.0018
Silicon	0.0006
Total	100.0000

Besides these, there are found traces of Copper, Lead, Aluminum, Zinc, Nickel, Arsenic, Iodine.

The variation, either by paucity or excess of this Chemical Composition, is bound to reflect on the behavior of our Body and that is the main difference between Health and Disorder in their physical aspects.

Friday, December 3, 1937

ARTICLE 4

INCONGRUITY OF MEDICINE

Having established the composition of the Human Chemical Engine, in accordance with Chemistry, it is logical that the Elements which enter into such assemblance, must be held responsible for the Health or Disorder of the Chemical Body. It also stands to reason that those Elements must be as the Maker provided. Just as a mechanical machine can not have for replacement of a worn part, a part that is foreign to its original make and construction, the Human Chemical Engine can not be expected to absorb into its inner Chemistry for building, any substance that originally was not placed there by the Creator.

In other words, what God "forgot" to put into the Visible Physical Vehicle, can not be introduced into it by any Physician with decency, no matter how great his competence.

There are known and recognized in Science just 92 Elements. Out of these 92, two discovered by me in the Sun during the Total Solar Eclipse, on January 24, 1925, may be left out, because, no recognition was given by the so-called men of Science to that discovery. Thus, only 90 Elements are to be counted in our work. Out of these 90 known Elements, the Pharmacopoeia uses for ingestion about 30; the rest being Elements used only in industrial activities, we are obliged to leave out of our consideration—at least for the present.

Herein is a great Key. If there is no Mercury in the Human Body, should a Medical Doctor prescribe Mercury for certain alleged Social Disorders, like Syphilis, that Mercury as an Element being foreign to Nature's build within the Visible Physical Vehicle, will be certainly thrown out of the Body, through some channel of excretion. The reason for this is clear; there is no organic structure inside which has that Chemistry. Thus, the Mercury is an unwelcome intruder inside the Body. Similarly, should there be no Arsenic or Bismuth in the Visible Physical Vehicle, those metals too will be ejected by the Body and instead of actual benefit, harm MUST eventually accrue.

However, should any apparent benefit be derived, it will be done by the rejection and the consequent reactions motioned inside and not by any constructive processes.

In this connection it may also be stated, that the proportions in which the Grand Architect Of The Universe created Man in His Own Image, can not be unbalanced by any one for any individual, wherein the chemical composition of that person is concerned. Should any alteration or change be effected, it is sure to reflect, one way or another on the Health of the individual. Therefore, the ingestion of Elements foreign to our build, is beyond logical basis and not sensible and degrades Medicine as a Science to the level of quackery or empiricism. So it really IS and when one realizes that there are in the Body less than 18 Elements and compares with that the horrible list of the appalling concoctions and nostrums poured down the throats of the innocent victims, one can not but feel a sense of loathing and repulsion, which no morbid argument can scatter.

Medicine as is, is nothing but the biggest, unscientific HUMBUG ever the Human Mind conceived and I shall give you sufficient proofs of its utter helplessness and fallacy.

Friday, December 10, 1937

ARTICLE 5

HUMBUG OF WASSERMANN SYPHILIS TEST

The syndicated medical columns of newspapers and the columns of magazines, are used mercilessly by the Medical Doctors, to scare the people into going to the Medical Doctor at the least sign of Disorder. Scare and Fear are the two big terrors, which the medical gang utilize to extract millions of dollars from the public and the latest and the biggest is the Syphilis Racket.

Racket it is! Under the devastating influence of this scare, thousands are being placed into a position of absolute helplessness and into a condition worse than slavery. People are made to believe things which are not just so and the result is, the shattering of loving courtships and potential marriages. In many States, like Wisconsin, the couple is compelled by Law to get a Medical Certificate of "Freedom From Syphilis," before the grant of a Marriage License. The determination of such "Freedom," is made by the so-called Wassermann Test, whose futility and utter nonsense, I exposed in my Spectro-Chrome magazine of July 1922 and recently in the issue of June 1937. That Wassermann Test is the most idiotic, ghoulish idea, born of any deranged mind and the strange part of the business is, that the medical fraternity is following it blindly and without regard to logic, reason or common sense. Even the ancient Witch Cauldron was cleaner and preferable to this horrible concoction, which is the "discovery" of the Berlin Bacteriologist, August Paul von Wassermann.

This alleged "Syphilis Test" is made as follows:—

Measured quantities of Extract from the Liver and Spleen of a Syphilitic Fetus (unborn baby in the Womb, after the end of the third month) representing the Antigen (a substance causing the formation of Antibodies or roughly speaking Antitoxins or Poison Killers) are mixed in a Test Tube with the Blood Serum of the person to be tested. To this, some fresh, normal Guinea Pig Serum containing the Comple-

ment (Ferment-like Body) is added. After incubation at Body Temperature for almost an hour, the contents of the Test Tube are added to a mixture of Red Blood Cells of a Sheep or other animal, suspended in physiological Saline Solution and of the Serum of a Rabbit which has been "immunized" to these particular Red Cells. Now, if the Serum, mixed with the Extract of the Syphilitic Organs in the first Test Tube, be from a syphilitic individual, no Hemolysis (dissolution of Red Blood Corpuscles) of the Red Blood Cells in the second Test Tube, will occur after incubation for one hour.

Hideyo Noguchi, a Japanese Bacteriologist of New York, New York, in his "Test," modifies with a "Lipoid (substance other than liquid fat) substance from the Liver and the Heart of Dogs and Cows with Human Corpuscles."

Thus, this whole "Syphilis Test" has in it Syphilitic Fetus, Human Blood, Guinea Pig, Sheep, Rabbit, Dog and Cow, all making a marvelous stew that needed only the Brain of a Jackass in it to make it 100 per cent. perfect!

On such a messpot of obvious bunk, Wisconsin and other States, under pressure of the medical lobbies, based their Laws of compulsory submission to Syphilis Test or no Marriage License! The insane, befogged boobs! What a travesty on common sense and human status in Evolution!

Friday, December 17, 1937

ARTICLE 6

FAMILY SHAKEDOWN OF \$1,000,000,000.00 A YEAR

The Wassermann "Test" and the Noguchi "Test," are used in conjunction with the Kahn "Test" for the detection of Syphilis. All these "Tests," are nothing but gigantic impositions on human credulity. The Chemical Radio-Emanations of the Human Physical Vehicle, are inherently distinct from those of the specified animals and to depend on such Biological Reactions, makes a farcical swindle of the Healing Art. This fact becomes more glaring, when it is admitted by the Medical Doctors, that more than 20 per cent. of these "Tests" are faulty. Thus, by the exercise of the State Laws, that many per cent. of the couples intending to marry, will be denied the Marriage License and will be doomed to disappointment and worthless medication.

In an Article published in the Daily News of New York, New York, of May 25, 1922, by W. A. Evans, M.D., he openly stated that "Positive Wassermann is liable to be present in certain diseases and conditions NOT related to Syphilis and where Syphilis is NOT present. Among these, are Malaria, Ether and Chloroform Narcosis, Scarlatina, Jaundice, Diabetes, Pregnancy, Nodular Leprosy and Yaws."

Such opinion was endorsed by many Bacteriologists, in regard to the shortcomings of these Syphilis Tests. In Philadelphia, Pennsylvania, over 500 pregnant women were tested and indicated Plus 4 Wassermann! The indication passed away entirely after the Childbirth. According to Dr. Arthur William Stillians, Professor of Dermatology in Chicago, Illinois, "The Blood of a healthy baby less than two weeks old, will give a Positive Wassermann." Dr. William Krauss, Professor of Tropical Medicine and Associate Professor in Bacteriology of Memphis, Tennessee and Dr. Lydston, formerly of Chicago, Illinois, repeatedly called

attention to the defects underlying the Wassermann Test. It is also well recognized, that in Alcoholism, even though Syphilis be not present, there may be absence of a Wassermann Reaction and in some cases they get the "Wassermann Habit." Having once commenced to give Plus, they continue so for life, although the alleged Syphilis be checked.

The true and the most modern Racket, is through constant medical propaganda. One after another, an avalanche of Articles is maintained through the controlled newspapers and magazines. The Articles din into the public ears, that Syphilis must be controlled by stringent State Legislation and Medical Regulation. It would appear that one more system of Legal Regimentation had to be designed to make the sufferers healthy! So the Medical Doctors created the opportunity and used it too. They started to infuse into the public mind, that there are 6,000,000 individuals, men and women, in this Country, suffering from the dreadful scourge of Syphilis and "to fight the Disease efficiently, treatment must be taken once a week for an indefinite period (usually from one to two years at the least, periodically), for a lifetime." This means in most cases, an expenditure of from \$12.00 to \$25.00 a month for treatment."

The inner hidden meaning is to shake down from 6,000,000 Americans around \$72,000,000.00 to \$150,000,000.00 a month, thus aggregating profit to the murderous Medical Racket One Billion Dollars a year!

Friday, December 24, 1937

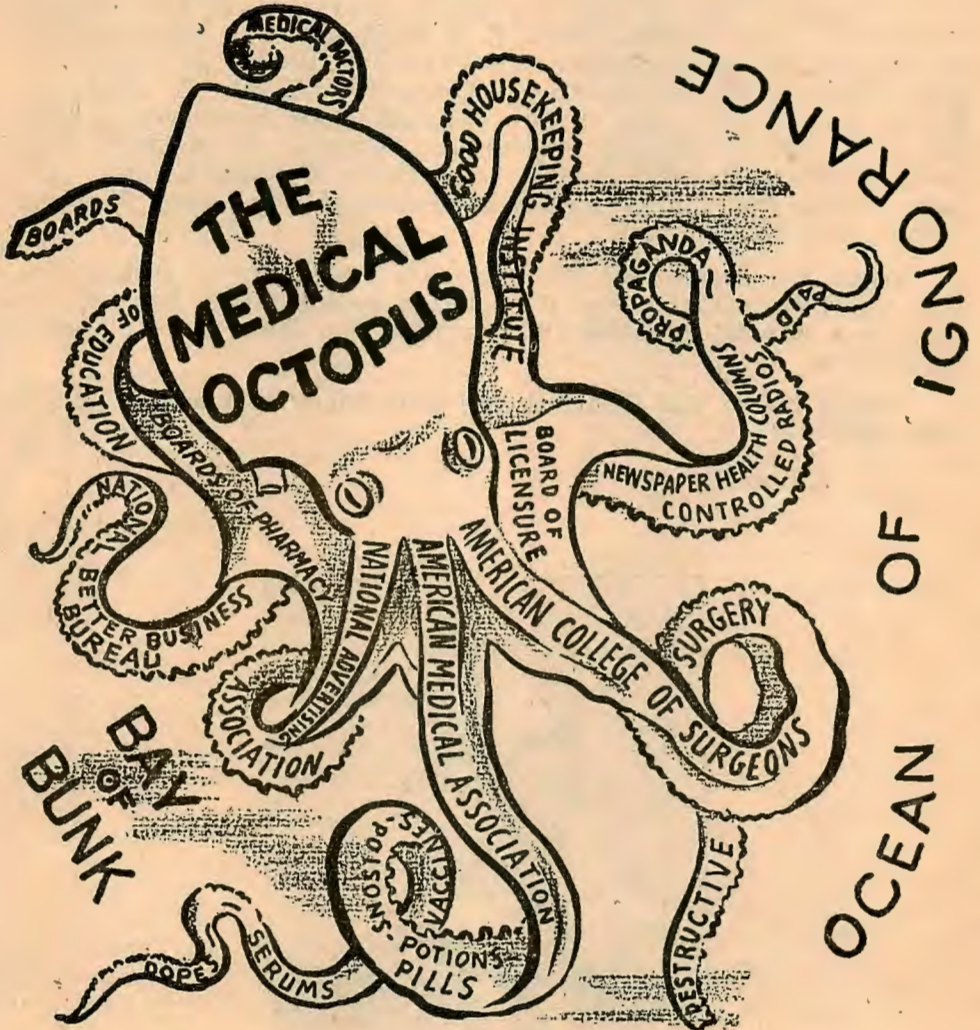

ARTICLE 7

THE MEDICAL OCTOPUS

I am constantly challenged by women, men, students, editors, people of all types and brain caliber, as to what I really mean by the term Medical Racket. I am willing to open my mind about it without reserve.

The Medical Racket is the conception and creation of the Medical Trust. It is the operation of a large number of wealthy Capitalistic Unions controlled by a vast number of the most cunningly organized master minds, with the sole intention of having the exclusive monopoly on everything pertaining to the healing of Human Disorders and especially suppressing, throttling, choking and eventually killing any and all attempts at striking out of their paths and dictatorial mandates in regard to the maintenance of Health. Under the doctrines of "Health," these astute ones pulled in all Police Powers of the States in their favor, until now it is the most complete Medical Oligarchy the world ever knew.

This Medical Trust rules the United States Of America. Neither the Congress nor the President nor the people who are the supposed Constitutional Owners of the Country, possess true information about the actual inner workings of this monstrosity. It is now a genuine Medical Octopus and I too should have been ignorant of its mysterious ramifications had I not been in 1919 National Vice-President of the Allied Medical Associations Of America, while being Commander of the New York Police Reserve Air Service. What I then learned and since continued to learn about the various activities and channels through which this Devilfish enmeshed the entire country, is impossible to be described fully in a short article. However, here are some of the tentacles through which its head—The American Medical Association—functions in silent, but disastrously effective manner:—

This fearful-looking monster is the dread of America, but, the Truth behind the Scientific Researches of DINSHAH makes it squirm in agony. It dares NOT A PUBLIC DEBATE, because, Dinshah WILL pound it to a pulp.

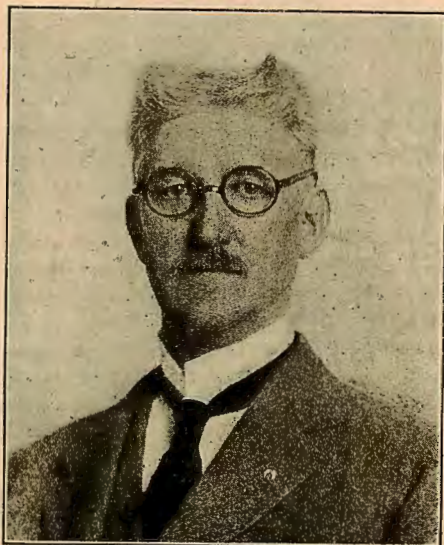

Tentacles Of The Medical Octopus

American Medical Association, State Medical Societies, County Medical Societies, Member Medical Doctors, Medical Colleges, American College Of Surgeons, Hospital Medical Boards, Boards Of Medical Licensure, State, County and City Health Boards, U. S. Army Medical Corps, U. S. Navy Medical Corps, U. S. Food and Drug Administration, Pharmaceutical Colleges, Boards Of Pharmacy, Boards Of Dental Surgery, Dental Colleges, Boards Of Optometry, Boards Of Education, School Boards, Newspaper Health Columns, Good Housekeeping Institute, National Advertising Association, National Advertising Clubs, National Better Business Bureau, Local Better Business Bureaus, Marriage License Bureaus, Liquor License Bureaus, Drug Stores, Plumbers, Restaurants, etc., etc., etc.

When you comprehend the aggregate potentiality of such a combine, where the pocketbook of the public is the sole target, you will have some idea of what is behind the present Billion Dollar a year Syphilis Shakedown!

Awake before this Cuttlefish has your family members in its horrible embrace!

Friday, December 31, 1937

John W. King, M.D., Graduate of the Jefferson Medical College, Philadelphia, Pennsylvania, a Student of Spectro-Chrome Metry, who is mentioned in the Article 8.

ARTICLE 8

CIVILIZED OR SYPHILIZED?

On May 29, 1922, John W. King, Director of the Physico-Clinical Laboratory in Bradford, Pennsylvania, visited my Central Office in Philadelphia. He was a Graduate of the Jefferson Medical College (1889) and had spent a long time in Post-Graduate work on Venereal Disorders.

On August 15, 1922, he wrote me a letter, beginning with the usual professional courtesy and stated:

"Since the day I spent with you in Philadelphia, May 29th, you have been with me, a constant companion of my mind and heart. I owe you a life long devotion to the cause you champion, and I know I shall soon give you reports on cured patients from Spectro-Chrome Therapy, as furnished by my 'Graduate' and 'Practitioner's' Equipments, two Equipments I greatly appreciate. Having graduated from Jefferson Medical College, Philadelphia, in 1889, thirty years of which have been spent in Post-Graduate work, year after year, a month or more, in special lines in order properly to equip myself and be able to give the best medical service to patients frequenting my **Physico-Clinical Laboratory**, an Institution devoted to the diagnosis and treatment of diseases, the past twenty-six years in this city.

Early in my medical career, I learned the truth of the statement, made to the classes of Jefferson Medical College, by Robert Bartholomew, namely, 'After you have practiced some twenty years, former patients whom you had treated many years before for Chancroid, will consult you under the guise of some very queer symptoms and with many chronic diseases. You may not recognize these as syphilitic, but, somehow you hit the mark in your giving these patients anti-syphilitic treatment.' Later, Sir William Osler gave us this: 'Know Syphilis in all its manifestations and relations and all other things clinical will be added unto you.'

During the last War, the American Medical Board adopted the French Nosology (case classifications) of Syphilis (as had been pointed out over one hundred years ago by Hahnemann, who spelled it 'Shanker'), that 98 per cent. of Chancroid, formerly regarded as a mere local affection only, were Chancre, an Infectious Constitutional Disease, namely Syphilis. Another writer on this subject avers that, 'Without Syphilis, there would be no Disease' or as one expressed it, 'Syphilis is the Father of Disease.' If one views this affection in a broad manner, we may well accept the dictum, namely, that Syphilis is the 'King Of Destroyers,' for the merest tyro in Medicine will soon see that much.

The origin of Syphilis is quite unknown among medicine men. It was not brought to Europe by the crew of Columbus and other American explorers, as some asserted, as a contribution from the American Indians; neither did these tuberculize the Indian, as alleged and to equalize matters by the exchange. We find it long before Confucius's time. The probable date is—at the creation of the World. It always was and it will always be that way. Nothing arises spontaneously, neither will we ever stamp out the evil, because, it was and is a soil laden material, until the soil is made non-syphilitic—what we eat we are."

Dr. John W. King was a deep student and practitioner of the

theories of Dr. Albert Abrams, of the Leland Stanford University of California. In his magazine Article of September 1920, Dr. Abrams stated that "Americans are not a Civilized Nation, but, a Syphilized Nation, for 400 years."

This was a strong indictment of the Americans indeed and many were the darts of abuse and ridicule hurled against him by the medical press. Today, the same Forces Of Evil are using the same indictment for serving their nefarious purposes and whereas six months ago, the number of persons suffering from Syphilis was marked as 5,000,000, the present estimate of authorities posing as "Government Authorities," chalks the estimate at 10,000,000. In round numbers, 1 out of every 10 American women and men, has the rot of Syphilis and a national cry is raised for Blood Tests, Early Diagnosis, Poisonous Shots to kill the "Germs" and incidentally the Billion Dollar a year extra income visioned for the Medical Doctors.

ARTICLE 9

SYPHILITIC MESSPOT

In the insane scare of Syphilis among the Americans, oil on fire was added by Dr. Albert Abrams by the declaration that from the eating of Beef, Syphilis is liable to be contracted. This type of Disorder he called Bovine Syphilis and numerous were the Medical Doctors who took that theory seriously and following more Blood Tests, offered to remove the cause—while one continued eating Beef! How this Syphilis dread may travel in civilized life from point to point, may be gathered from an article that appeared in "Safe Milk":—

"People who have a habit of biting the tip of the penholder are quite likely to become infected from what physicians rather aptly call 'correspondence germs.' That the penholder, such as most persons frequently use in hotels, postoffices, banks and other public writing rooms, may be as deadly a carrier of disease germs as the roller towel and public drinking cup is the belief of medical authorities today. When one of these public penholders is used it will be noticed, if careful examination is made, that the wooden handle is covered with little dents. These dents are the imprints of the teeth of persons who used the pen before and as the mouth is the favorite port of entry for disease, each dent is usually full of microbes. To expose one's self to sickness and death, therefore, all one need do, is to bite on the penholder. Every time this is done one takes into the mouth the germs which scores of other persons have left by similar bites."

Whatever others may say about the enumerated dangers, I am prepared to add some real ones for due consideration:

1. Licking Postage Stamps and Envelopes and mailing our Diseases with our love to our sweethearts at a distance.
2. Biting Nails and touching Cooking Utensils subsequently.
3. Performing certain "Natural Functions" and not washing the hands.
4. Being a Bookkeeper and licking fingers to turn pages in the ledgers; the employer may receive a "gift" from the Bookkeeper.
5. Being an employer and doing the same thing, thus giving a "present" to the Bookkeeper or Stenographer.

6. Licking fingers for separating dollar bills.
 7. Sitting promptly on a recently vacated seat and receiving Radio-Emanations of a diseased character.
 8. The present system of plumbing by which one is compelled to sit on a wooden (porous) seat and contagion or infection to be carried to the innocent.
 9. Promiscuous moving around of women during their monthly periods when the Radio-Emanative Polarity of the Body is befouled and vitiated (Refer Holy Bible, Leviticus, Chapter XV, Verses 19, 20, 21, 22, 23, 24, 25, 26, 27, 28).
 10. Pernicious custom of kissing on the lips and sucking the Sputum of another into the organism.
 11. Funeral and burial customs which spread contagions or infections broadcast by indiscriminate contact of the dead with the living.
 12. Sleeping in the same bed with one or more persons.
 13. Drinking from the same cups in the home and in the restaurant.
- This list may fill a vocabulary!

Against all this array of possible causes, outside of the one main cause of actual Sex Congress, the Surgeon General of the United States Of America and Medical Doctors in general, united to wage a nationwide campaign to make the alleged 10,000,000 syphilitics well. Their main pillar of support in the campaign is that long exploded humbug of the Wassermann Test—Blood Test and all similar "Tests."

In 1927, in the United States Penitentiary in Atlanta, Georgia, there were nearly 3,500 men on various charges and alleged offenses, all called "convicts." Among this number the Prison Medical Doctor found, by this Wassermann Test and Kahn Test, over 800 men "suffering from Syphilis." He started by his omnipotent authority to inject all these unfortunates weekly with Salvarsan, Mercury and Bismuth, until some of them had buttocks black as ink and many had other Disorders they never had before. One man, R., a bucket-shopper, had the misfortune to be declared syphilitic and received 98 Shots! Even then, he stayed Plus 4 syphilitic and as a result of the giving of 'Shots' lost his hair, his teeth loosened and fell off and his digestive functions were so affected that he could barely eat. This is called "curing Syphilis" by Injections and this is the basis of the present Billion Dollar a year Medical Racket.

(I know of this from Personal Experience, because, I was a prisoner there myself through a perjurious frame-up. Refer to the two volumes of my "Railroading A Citizen." The Medical Octopus played a prominent part therein.)

ARTICLE 10

STAGES OF SYPHILIS

Let us now look into what this dreadful Syphilis really is, as defined and described by Medical Doctors themselves. In his Standard Medical Dictionary, Dr. Thomas Lathrop Stedman defined Syphilis as "An infectious disease spread by inoculation through sexual intercourse and also largely through the medium of contaminated table utensils, pipes, towels, et cetera."

Another Medical Lexicographer, Dr. W. A. Newman Dorland, Member of the Committee on Nomenclature and Classification of Diseases of the American Medical Association, expounded Syphilis as "A contagious venereal disease due to a Micro-Organism, the Spirochaeta

Pallida or *Treponema Pallidum*. It is generally propagated by direct venereal contact or by inheritance."

Dr. Sir William Osler, Honorary Professor of Medicine in Johns Hopkins University, Baltimore, Maryland, Professor of Clinical Medicine, University of Pennsylvania in Philadelphia, described Syphilis as "A specific disease of slow evolution, caused by the *Spirochaeta Pallida*, propagated by inoculation (acquired Syphilis) or by hereditary Syphilis (congenital Syphilis)."

In his *Analytical Cyclopaedia of Practical Medicine*, Volume VI, Dr. Charles E. de M. Sajous, Professor of Therapeutics in Temple University and Clinical Lecturer, in Jefferson Medical College, both of Philadelphia, Pennsylvania, wrote thus: "Syphilis is due to the inoculation of a healthy individual with the secretion of a syphilitic subject or syphilitic blood. The disease is most usually transmitted during sexual congress, but is quite frequently contracted in other ways. The conditions for inoculation are such that the disease may be transmitted extra-genitally with great facility."

Thus, the points I placed before you in my last Article, are amply corroborated. The scare of Syphilis, to be removed, must have those "extra-genital contacts and facilities" removed and in the present complex state of so-called civilized life, these "extra-genital contacts and facilities" appear well nigh insurmountable.

Three Stages are attributed to this Disorder. In the First Stage, an initial Sore appears within about 4 weeks, after exposure to the Cause. It shows as a small Red Papule, which gradually enlarges and breaks in the centre, leaving a small Ulcer. This is called a Chancre. These Chancres may be soft or Fungating and Hard or Hunterian, also called Indurated Chancres. Other fancy names too are given to these Ulcers. There is another variety named Phagedenic Chancre, which corrodes and eats the Tissues rapidly.

In the Second Stage, Constitutional Symptoms appear in about 12 weeks. Fever, Anemia, Cutaneous Lesions, Mucous Lesions, Arthritis, Copper-Hued and Multiform Skin Eruptions, Itch, Iritis, Alopecia, Severe Headaches, Jaundice and a train of other "Signals" of violation of the Laws of Nature follow, showing the Volcano within.

In the Third Stage, the Secondary Symptoms merge with other drastic ones. Peculiar Skin Disorders, including Rupia, Gummata, Pemphigus, Ecthyma and Bone Lesions appear. The Cartilages are affected. The Nasal Septum, the Palate and other similar parts become punctured. Decay sets in, the sufferer slowly degenerates and one after another the Vital Organs fail in their functions. Slowly death supervenes as final relief.

From ALL these miserable horrors, "cures" are promised by the Medical Doctors, if the people will just permit them the Billion Dollar extra income a year!

ARTICLE 11

MONSTER OF MERCURY

It is not necessary to go further into the mire of explanations. Let us assume for the sake of exponents, that the Syphilis is found in the 6,000,000 or 10,000,000 Americans, that the Medical Diagnosis is 100

per cent. and the Remedy has to be applied. Where shall we lead? Neither of the assumptions is faultless. It is impossible to estimate the number of the actual Syphilitics, Medical Diagnosis was proven 53 per cent. erroneous by Dr. Richard Clarke Cabot of the Massachusetts General Hospital in Boston and as far as Remedy is concerned, the Medical Doctors did not evolve anything in accord with the Laws regulating the build of Our Chemical Engine. However, as in spite of such deficiencies in knowledge, they insist on their disastrous routine, let us examine the Remedies they have to offer for Lues Venerea (Syphilis).

From ancient times, Mercury has been the time-honored remedy. Sir Jonathan Hutchinson, the well-known English physician, recommended Mercury and Chalk powder, with some Ipecacuanha and Opium. This is highly endorsed by Dr. Sir William Osler. Pills of Green Iodide of Mercury, as well as the rubbing into the skin of Mercury (Blue) Ointment is praised. The administration of a solution of Mercury Perchloride (Corrosive Sublimate) or giving Mercury Subchloride (Calomel) was also tried in the past. In many institutions in Europe, they use Lee's Lamp, in which Calomel is vaporized onto the Sufferer's Skin for 20 minutes in each treatment. Thus, for ages, Mercury has been introduced in one form or another into Our Chemical Engine, whereas the Analysis of our Body shows that there is NO MERCURY in any organ built in by the Creator! It was definitely found that once it enters, Mercury stays in the Liver for about 15 years, making Secondary Disorders of obscure character.

In 1920, B., a South American, came to New York from Peru. He had Syphilis over 12 years prior and after going from one Medical Doctor to another, each prescribing a different Mercurial Concoction, he finally contacted a prominent "Specialist." The learned gentleman gravely stroked his beard and informed B. that he had so much Poison in his Body that it needed plenty of Mercury. The man already had more than plenty, but, that was not enough according to this master mind. So, he made an incision in the right thigh, filled it with metallic Mercury and stitched the cut! This view was to provide a pool of Mercury, from which the devilish Spirochaeta Pallida may drink their fill and perish! The Spirochaeta Pallida continued to live through the ordeal but B. was paralysed. In such broken condition, he visited me in New York to find what should be done to regain Health. I gave him my candid opinion about the butchery performed on him. (He resorted finally to Spectro-Chrome and recovered.)

A few years ago, Paul Ehrlich, Bacteriologist of Germany, started the craze of Salvarsan Injections for Syphilis. This Poison is known in different countries under different names. In Germany it is Salvarsan (Health Preserver?!), in France it is Arsenobenzol, in England it is Kharsivan, in Japan it is Arsaminol, in Canada it is Diarsenol, among the Scientists it is 606, because it was bragged to be the evolution of 606 experiments. It is a yellowish powder which rapidly oxidizes in the air. Its average dose is about $7\frac{1}{2}$ grains to each 132 pound weight of the Body. Its scientific name is Diaminodihydroxyarsenobenzene Dihydrochloride and it is injected into the Buttocks with Caustic Soda Solution. Some times it is combined with Copper, Silver and Sodium Salts. Each injection is called a "Shot" and the alleged "cure" is started with six or more such weekly Shots.

ARTICLE 12

INTRODUCING MORE POISONS

When the Injection of Salvarsan (606) proved deleterious and objectionable from various standpoints, a new "Remedy" was evolved styled "Neosalvarsan," which is known in Chemistry by the very short name of Sodium Diaminodihydroxyarsenobenzenemethanalsulphoxylate. This marvel was evolved after 914 experiments, so it is called 914. Its Chemical Formula reads in simple language $N H_2 (OH). C_6 H_3 As: As.C_6H_3 (OH). NH. (CH_2 O).. O S Na$. The new monster is claimed to be "neutral in reaction, more soluble and less toxic, being especially adapted for intramuscular injection." So, the former one was "toxic"!

The Salvarsan and its descendant Neosalvarsan, are ruthlessly exploited as "Specific Remedies" for Syphilis. After about 6 Doses or Shots of either are given, the Sufferer is supposed to have had enough for commencement. The shooting interval may be a week. Then the step forward is taken. Six more Shots of a preparation of Mercury, followed by similar six punches with a preparation of Bismuth are administered. Such a course may continue for months and years, in some cases indefinitely for life. By the time the shooting program may be finished, there are in the Blood Stream three potent Chemical Metallic Elements circulating in large quantity—Arsenic, Mercury and Bismuth. They are all Foreign Elements, as there is no organ which has their Chemistry and other than finding about 1/300th of one Grain of Arsenic, no Mercury or Bismuth was isolated from the Human Body. Unless one may believe that the Physician is wiser than his Creator, there is absolutely no defense possible for such empirical quackery. It is bad enough, but the injury is enhanced manifold when Copper, Iodine and Iron in quantities are also injected into the Blood Stream. The Reaction at times is so great that in the effort of the Vital Organs to throw out the undesirable Elements, a train of untoward and unexpected Disorders appears, which baffles the skill of the best practitioner and blasts the Health of the hapless Sufferer.

The dreadful Syphilis is NOT such a terrible Disease as the Health Records endeavor to frighten the public into believing. From 1901 to 1908, my medical practice in Surat, India, was mainly Genito-Urinary, but notwithstanding adverse sanitary conditions, very few cases developed the horrors so generally ascribed to Syphilis. In fact, if we may put faith in the learned Medical Doctors and their own statements, there is nothing for the public to lose its head about our families being invaded with Syphilis at every second turn. In his book "Devils, Drugs and Doctors," Howard W. Haggard, M. D., Associate Professor of Applied Psychology, Yale University, of New Haven, Connecticut, states: "The Spirochaeta Pallida is a frail organism. It has a relatively short life outside of the body; under ordinary conditions it dies in less than six hours. Moreover soap and water serve to destroy Spirochetes that may be deposited on such articles as drinking glasses."

Here then will come the question. Soap and water may be good for the Spirochetes on the drinking glasses, but how about the rascals which already reached the innermost recesses? How can they be scrubbed? So the Salvarsan, Neosalvarsan, Mercury, Bismuth, Iron, Iodine, Copper, Sodium and the like were thrown into the Blood Stream to grope for their prey inside. The Remedy proves worse than the

Invaders. At its best, the whole structure of the Germ Theory of Diseases is based on such crude and irrational fundamentals, that I can do no better service than by offering to your intelligence what I proved dozens of years ago: **GERMS ARE NOT THE CAUSE OF DISEASES.**

Friday, February 4, 1938

ARTICLE 13

GERMS ARE FRIENDS AND SERVANTS

Such radical views need not astonish the intelligent thinker. Those views are not emanations of a faddist or fanatic, a rabid old foggy or obtuse-headed numskull. They are the results of 56 years of Scientific Research and elaborate original experimental work and wherever the opportunity offered to prove, they bore the stamp of Truth by their verification. I repeat today, what I spoke in 1905, in Bombay, India, before the Royal Plague Commission under the chairmanship of the famous Dr. Robert Koch, that **GERMS ARE NOT THE CAUSE OF DISEASES.** What then are they? They are solely the **SIGNALS** of the existence of certain Pathological Conditions, which they indicate by their presence. Being the **CAUSE** and being the **SIGNAL** are entirely distinct factors and in mixing or misunderstanding them, the present silly and injurious ideas of Germs and Germ-killing Vaccines, Serums, Antitoxins and Injections had their birth.

The Medical Doctors and their confreres aver that certain minute Organisms or Microbes **PRODUCE** certain Disorders. They say that each Disorder has its specific Germ or Microbe and that its admission or entrance into the Human Body is the **CAUSE** of that Disorder. Then they state that to kill these Germs and the Toxins (Poisons, which are truly albuminous Poisons) produced by the action of the Germs, the Human Body must generate Antitoxins or Antidotes to destroy their effects. They further state that when the Vital Organs are depleted in Energy and the benign Antitoxins can not be produced sufficiently to check the Toxins, aggravation starts and disaster issues.

Herein is another very faulty conception. Germs, as all these Microbes are ordinarily termed, are asserted to be injurious to our Life, but those "Scientists" forget or are unaware that Germs may be benign to us or malignant to other forms of Life, according to the purpose they serve and that without these Micro-Organisms, the traffic of Physical Life itself would be stagnated. Nitrifying Bacterium oxidizes Ammonia to Nitrous or Nitric Acid or draws Nitrogen from the air and fixes it in the soil, where it can be appropriated by growing plants. *Bacillus Aceti*, found in the air, causes Acetic Fermentation for Vinegar. *Bacillus Acidi Butyrici*, found in Sugar solutions and cheese, coagulates milk. *Bacillus Denitrificans* is an organism which reduces Nitrates to Nitrites and Ammonia. *Bacillus Doederleini* is an inhabitant of the normal Female Genital. *Bacillus Esterificans*, in certain mediums, confers the odor to fresh apples. *Bacillus Geniculatus* is a denizen of the Stomach. *Bacillus Granulobacterpectinovorum* is an organism which ferments Starch and produces Acetone and Butyl Alcohol. *Bacillus Gummosus* converts Cane Sugar, with the formation of Mannite, Glucose and Fatty Acids. *Bacillus Hyalinus*, from water, reduces Nitrates (Salts of Nitric Acid) to Nitrites (Salts of Nitrous Acid). *Bacillus Bulgaricus*, found in Curds, lessens intestinal putrefaction. *Bacillus Liodermos*,

peptonizes the Casein of milk. *Bacillus Maddoxii*, from river water, decomposes Urea. Numerous others may be similarly described, the *Bacillus* being rod-shaped, the *Bacterium* being one-celled Organism.

The important fact is that Germs are NOT our enemies as ordinarily understood, but have definite, obscure purposes for protection and it is solely in that light that I shall tear open the veil, which is hoodwinking the lay public.

Friday, February 11, 1938

ARTICLE 14

GERM IS CAUSE OR RESULT?

Some years ago, one of the prominent Midwest Universities announced a prize of \$1,000.00 for volunteers, who would imbibe certain virulent germ-laden soups. Many War Veterans thought it a good opportunity, to make some money and submitted. None was in the least injured, proving that natural internal Digestive Juices had the power of destroying unwanted material.

A different experiment was performed in France. After completely disinfecting the Mouth of a French virgin and the Mouths of a dozen healthy Frenchmen, the Sputum of each was microscopically examined and found to be Negative. Then, the men were made to kiss the Lips of the girl in turn. At the end of the final osculation, the Sputum of the girl was again examined and was found reeking with 18 different kinds of Germs, including the well recognized ones of Typhoid Fever, Diphtheria, Syphilis and the Chlamydozoa (minute Animal Parasites) of Variola (Small Pox). It was evident, the strangers came from somewhere. That somewhere was the Air—our Atmosphere is full of all kinds of floating material and were it not for such quality in the Air, no germination or growth would be possible. The Medical Doctors want to "condition" every thing; they should not forget that nothing grows in Sterilized Air, Sterilized Water or Sterilized Earth.

The most ridiculous extent to which the Germ Theory Cure is carried, is proven in the Auto Therapy method. Dr. George F. Ludlow, Professor of Medicine, at Flower Medical College, New York, New York, and Dr. George Starr White, of Los Angeles, California, praise Auto Therapy to the sky. It was introduced by my friend Dr. Charles H. Duncan, of New York, New York and is used by reputable Physicians, as a powerful "Remedy" against Gonorrhoea. The Formula of this "Remedy" is the quintessence of sense and wisdom and it is based upon the idea, that a Dog licks his wounds and heals them, so should Human Beings! The Formula for Gonorrhoea orders thus:—"Mix 10 drops of Pus from the Genital Organ in 4 ounces of Water. Of this, give the patient 1 teaspoonful every hour for 10 doses." The effect of this marvel must be really wonderful!

One Lick A Day,
Keeps Doctor Away,
Two Licks A Day,
Takes Worry Away,
Three Licks A Day,
Give Awful Big Kick,
Just Lick As The Dog
And Never Be Sick!

First, they maintain that Germs **PRODUCE** the Disease; then, they take the same Devils and put them to work inside to kick out the Disease Germs, alleged to be eating the vitals!

Examine under the Microscope, some Tissues of a perfectly healthy Mouse, just dead a minute ago. Be certain that there is no Micro-Organism of a virulent character. Bury the carcass a foot underground and leave it there three days. Then, exhume the dead Body and let the Microscope demonstrate. A swarm of Maggots and various undesirables, some visible even to the unaided eye, others visible only under the Microscope, will greet you. Those fellows were not there before. The question is, were they in the Tissues or were they in the Air or were they in the Earth? If nothing satisfies your mind, ask whether they were the **PRODUCTS** of their own Chemical Decomposition. Ask to yourself, if they were not in the Tissues, Air or Earth, were they not possibly the **RESULT** of natural changes, constantly going on to prevent stagnation by unwanted, decaying materials. If so, you will find that the Germs did not kill the Mouse or destroy its Body, but, merely indicated the **EXISTENCE** of certain Processes of putrefaction or disintegration—in fact, their presence proved the **EXISTENCE** of the morbid condition. Study this in your mind, from the angles presented and the fear of Germs and their Infection will vanish.

Friday, February 18, 1938

ARTICLE 15

HOW DOES THE PILL KNOW WHERE TO GO?

Who doctors the wild animals? Who injects Serums, Vaccines and Antitoxins into the billions of living entities in the forests? How is it that for ages past mankind has been living without any of the alleged modern healing methods and yet survived? I never decried **CONSTRUCTIVE** Surgery or the adjustment of displaced parts, but I have been openly maintaining in no uncertain terms, that the present healing ideas by the introduction of Pills, Potions, Pellets and Poisons, as well as the removal by the Poniard of Vital Organs, which are capable of repair if certain essentials of Health restoration be followed, is nothing short of rank butchery and ghastly ignorance of the human mechanism.

Let us take the case of an alleged Syphilitic. The Blood is tested by the crude Wassermann and the equally ridiculous Kahn Test (both over 20 per cent. faulty) admitted as 10 per cent. wrong even by the Assistant Surgeon General of the United States R. A. Vondelehr and the Sufferer is condemned to the "cure." Salvarsan composed of Arsenic is shot into the Blood. There is no more than 1/300th of a Grain of Arsenic in the whole Human Body. Then, some Mercury preparations are introduced into the Blood. There is **NO** Mercury in the composition of the whole Human Body. Then, some concoctions of Bismuth are injected into the Blood. There is **NO** trace of Bismuth also in the whole Human Body. It follows therefore, taking the example of an automobile engine, that when the examining Medical Doctor finds the human Chemical Engine balking in its functions, he throws into the engine a lot of rings, nuts, bolts, levers, wedges and pulleys haphazard in the shape of any old Chemical Elements and expects them to go wherever there may be need for them or expects some of the parts to loosen and tumble out automatically, giving the machinery a healthy condition. The idea is absurdity personified.

It was really this problem, that made me work about 30 years in laborious Chemical and Spectroscopical Research to find the exact reason as to "How does the Pill know where to go?" It struck me that there must be some guiding genius somewhere, some intelligent factor somewhere, some General of the army of Cells composing the Human Body, in some position there must be a potent regulator which watches what should go in or stay in and what even if it did enter, should go out or stay out. The marvels of God's great work are shielded from the gaze of the curious, material-minded Medico. The active potentiality of His most wonderful monument—the Human Being—is not comprehended by the Medical Practitioners and in their supposed endeavor to do good, they convert the "Image Of God" into either a dump or a graveyard. If we are the Image Of God and the Scriptures of the nations do not lie, we MUST have WITHIN OUR OWN ENTITIES that which would at least repair the damage done by our transgressions of the immutable Laws of God or Nature or whatever you may call, the Cosmic Energy or Cosmenenergy as I call it, pervading the Universe. That power IS within our own selves, that power when dormant or depressed produces Disorder called Disease, that power CAN be energized by energizing vigorously the powers latent within us, that goal CAN be accomplished by the use of Nature's energies directly within us and the results that can be so accomplished, far transcend even the dreams of the most enlightened medical or surgical mind.

That goal is already reached in Healing, WITHOUT any Pills, Potions, Pellets, Poisons or Poniards and even the scourge of Syphilis succumbs to it very easily and without leaving a trace.

Friday, February 25 1933

ARTICLE 15

GERMS PROPAGANDA OF SCARE

Reading the propaganda of the Medical Profession, one will find that at every breath we are subject to Death. Germ-laden Air, Germ-laden Water, Germ-laden Food, the scare of Germs eating our vitals raw, is distributed right and left, by the controlled newspapers, magazines and books. Nothing can give one any security, unless from the day of his birth in this sorrowful World, one has injected in him concoctions for Small Pox, Diphtheria and Scarlet Fever, Whooping Cough, Typhoid Fever and Pneumonia and a host of other JUNK, known as Vaccines, Serums, Antitoxins and other Prophylactics. Germs, Germs, GERMS! From birth to death, morning to night, waking or sleeping, the word GERMS is drummed into our Tympani, until we are scared of living and Life becomes a nightmare.

The medical propaganda infuse into our being, the scare of Germs. We, who are said to be the "Image Of God," are supposed to be amenable to the invasion of the armies of Germs of all shapes, sizes and qualities; some of those rascals are so small, that the most powerful Microscope can not visualize them. Some are so tiny, that they ooze through the densest filters under pressure and by their escape, make of our Lives veritable pandemonium. Their mention is enough to loosen our Tendons and make us quiver, till our Molecular Organism may be ready to fly open!

Now, consider this angle. Where will the line of cleanliness, hygiene

and sanitation be drawn? In this monstrous, civilized life, it is utterly impossible for anyone, to live without engorging a few million Germs every second. How will one be in a non-Germ-laden atmosphere? A lover sends a letter to his sweetheart, licking the envelope and the stamp; a man pushes the handkerchief into his pocket; a woman bites her Nails like biscuits and forgets to wash; a Surgeon smokes a Cigarette and rests it on his table, imparting to it his filth-laden Sputum; a Chef tastes Mock Turtle Soup from a ladle and shoves it back into the pot; a boy kisses a girl on her Lips and converts her Mouth into a Spittoon; a Medical Doctor eats a breakfast of Ham and Eggs and visits a sick person, with his Breath reeking with Emanations of the porcine carcase fermenting in his Stomach; a business man talking face to face with a sucker, to close a questionable deal; a politician talking in animation, about diversion of highway funds to get more votes, throwing his Germ-laden Breath toward his colleagues; a husband snoring in the face of an innocent wife and blowing his growls at her—show any single situation in Life, where one is absolutely immune against the danger, of picking into one's entity some kind or another of those ubiquitous Germs. Show **one** way to avoid contacting those universal floaters. Propose **any** method of living, by which Life may be made utterly safe, by avoidance of contact with Germs. Without the Processes actually generated by Germs, Life Principles would totter and living on this Planet would become an impossibility. Why then is it, that we live notwithstanding the dangerous situation, of being completely enveloped by Germs? Because, there are **WITHIN** our own selves, the powers which act as our protectors and which act as our guardians every moment of our Life; they watch and continue to watch and it is only when those powers fail or falter, that antagonistic entities whose roots are ever there, gain their momentum by changing our Chemistry—their presence indicating like Semaphores the existence of certain pathological conditions, of which they are **NOT THE CAUSES, BUT ARE THE RESULTS.**

ARTICLE 17

OUR GUARD AND GOVERNOR

As all Armies have their Commanders, the Army of Cells composing the Human Body, has its Commanders and therein also is one, which is the Commander-In-Chief of the whole Organization. This most powerful Organ is the Pituitary Gland at the base of the Brain, which controls and regulates the intricate mechanism of our structural details, through the agency of the Blood Stream.

The Blood has two main divisions in its corpuscular composition. The one main division is that of the Red Cells, the Erythrocytes, the other main division is that of the so-called White (Violet) Cells, the Leukocytes. The balance of these two, is the actual basis of our Health. There are two major Glands on the right and left, below and under our Ribs, the Liver and Spleen respectively. These two major Glands are junctioned by a vascular connection, which has no Valve and through which Blood in its Circulation, is capable of being sent in either direction, by Acceleration or Interference.

Technically speaking, the Blood from the Spleen, enters the Liver through the Portal Vein, but, whenever there is impedance in the Liver, the Circulation of the Blood is driven back, partially into the Spleen.

It is for this specific purpose, that is little understood even among the learned professionals, that the Almighty created the Portal Vein without Valves.

The Liver is the producer and feeder of the Red Corpuscles, the Spleen is the producer and feeder of the White (Violet) Corpuscles. Thus, between these two major Glands, the balance is maintained of the Erythrocytes and the Leukocytes, a fact too unrecognized by or unknown to the learned fraternity. The governing of this Blood Stream Balance is the main function of the Pituitary Gland. The Pituitary has two main divisions, called the Anterior or the Oral Lobe and the Posterior or the Cerebral Lobe. All the Blood circulating within the Human Body, must pass at some time or other, in a period of approximately 90 seconds, through the Pituitary Gland. Between the two Lobes is a Test Organ, which acts as an ever watchful, Chemical Analyzer of the quality of the Blood.

If this Test Organ, the "Watchdog" of the Body, finds that there is an excess of the Red Corpuscles, promptly a message to that effect is conveyed from the Anterior to the Posterior Lobe and the latter Lobe at once sends a Nerve Message to the Spleen, to throw into the Blood Stream a larger number of White (Violet) Corpuscles, at the same time requesting the Liver through another Nerve Message, to reduce its Red Corpuscle production. These Nerve Messages continue until the Normalcy is restored, otherwise, the upsetting of this Blood Balance, creates what the Medical Doctors call "Disease" and SPECTRO-CHROME/METRY designates as "Disorder." A little thoughtful study in this direction, is all that is needed to comprehend the interesting scientific facts, that will be subsequently unfolded. Suffice it to say that the average of the Red and the Violet Corpuscles, is about 500 to 1 respectively, there being about 5,000,000 of the Red to 10,000 of the Violet Corpuscles in a Cubic Millimeter of healthy Blood. The Body has a certain tolerance, beyond which this Cell Ratio can not move, either up or down and it is the Pituitary Gland which exercises its vigilance day and night to preserve constantly the Blood Balance, so glowing Health may be maintained and any disturbing factors, existing or created as Germs and the like which are unwanted for Normalcy, may be cleared out of the System by the Processes of Elimination.

ARTICLE 18

SHIFTING GEARS OF HUMAN AUTOMOBILE

The marvelous working of the Pituitary Gland being thus understood, you will quickly comprehend why I am so strongly opposed to the introduction of Pills, Potions, Poisons and foreign Chemicals into the Human Body. God having forgotten to put meters on the various Organs which make our Chemical Engine, any such introduction would be on the basis of mere guesswork and hit or miss. No matter how clever a Diagnostician may be, his view about the deficiency or excess of any Chemical Element in the Body will be only a supposition and the Reaction will depend solely on the automatic selectivity of the organic Cells themselves to take or reject. Let us therefore, first learn about the selectivity and the rest will be easy

There are about 92 known Chemical Elements, of which the Earth is composed. Each of these Chemical Elements has a preference or dislike for certain of its associates, according to a recognized rule known as the Law Of Affinity. This Law acts in the Chemical World, upon all Chemicals, in certain definite proportions to make certain definite reactions to produce certain definite Chemical Compounds. Thus, the Element Hydrogen will combine solely with Oxygen in the proportion of 2 to 1 to produce water. Any deviation from this in regard to the Elements in combination or their proportion, will not be water. Each Compound has a definite build and each such build must have definite proportions to have definite existence. The various Tissues and Organs of the Body are thus built for various functions and whenever there is a variation in the composition, the excess or deficiency of the needed Chemical Element will produce a certain demand or craving within the Cells, necessitating inherent search for the rejection or absorption of the increment or otherwise. What an automatic mechanism we have right within us! Yet, by wrong living, wrong eating, wrong drinking and above all by unwise doctoring, tinkering and tampering with the live machinery given by the Creator, we make a messpot of our Body and ruin our Health—all under the name of "Science." It is a game of playing hide and seek with our inner powers. It is a senseless game. It is a dangerous game. It is a game in which, under the belief we have in the Healer, we place him on a pedestal above that of the Maker and under the direction of a blind man leading the blind, either recover in spite of the pseudoscientific quackery or reach toward an early grave.

Take an example. A man has a Disorder in the Knee Joint. He goes to his Medical Doctor who diagnoses it as Rheumatism and prescribes either Salicylic Acid or Salicylate of Sodium, Salicylate of Potassium or Salicylate of Ammonium. Soon the Pain is relieved and the practitioner's name is blessed, but a short time later, the Sufferer gets Pain in his Heart. Naturally, he goes to his benefactor, who then prescribes Digitalis, Strophanthus or similar "Remedy." The Sufferer gets the sought recovery, but, later finds difficulty in passing the Front Elimination. He runs again to his friend, who tells him he has Kidney Disorder and starts another series of "Remedies" for that until finally, either Nature finds her own way in spite of the Medical Doctors or the Sufferer goes as another decoration into a funeral parlor and thence to the graveyard landscape.

Do you realize what happened? I shall tell you next week.

Friday, March 25, 1938

ARTICLE 19

SAVIOR OR GRAVE DIGGER?

Here is the exposure of the Rheumatism case. The Sufferer was given for it first Salicylic Acid or any Salicylate. Aspirin is included in this same group, because, chemically speaking, it is a Monoacetic Acid Ester of Salicylic Acid and produces similar effects on the Heart and other Organs. Anything containing Salicylic Acid, has these effects on the Body: In full medicinal doses, Cerebral Congestion, Headache, Vertigo and sometimes Delirium occurs through disturbance of the Nervous System; the Heart beats faster first, but later depresses. Respiration is quickened; Body Temperature reduces; Front Elimination is increased. In every way, the combined effect of this Drug appears

as an Analgesic or Pain Reliever—at the expense of the Heart. Thus, the Rheumatic Fever and other symptoms disappear, but, the Heart soon shows its anger. The Medical Doctor then starts on the Heart with Digitalis or Strophanthus or some similar Drug. These Drugs are all what are known in the Materia Medica as “Accumulative Poisons,” which definition means that they collect in the Body as administered and react adversely after a certain limit is reached, nullifying the apparent good done. Digitalis has very decided potencies and acts thus: The Nervous System is excited and through the Tenth Pair of Cranial Nerves, a marked inhibitory or irritant Reflex is produced on the Heart according to the dose; the Blood Vessels soon respond and follow the Heart action; action of the Kidneys is stimulated by its diuretic character; Blood Pressure tends to rise; the tolerance of the Drug is reached when about 2 Drams of the Tincture are in Circulation. Suddenly, without any warning in many cases, by the toxic, reactive effects, the urinary functions of the Kidneys are disturbed and the Urine is suppressed. The Medical Doctor is again appealed for relief and he starts another train of empirics, which may produce the Front Elimination, but eventually may produce something else. The entire system of Medicine, thus removes one series of Loans and substitutes them with another series of Bonds, to be paid in cold cash along with the added penalty of compound interest. The Medical Doctor is in such cases, acting the same as our Government, in robbing Peter to pay Paul and forgetting to pay Paul! Drugs can act solely through the Circulation of Blood and any Drug introduced directly or indirectly into the Blood Stream, must pass at some time or other through the Organs where its use is desired as well as through all the other Organs where its use may not be desired or may even be contraindicated. This view can not be assailed. It is only because of the benign Law of Chemical Affinity that we escape severe and constant penalties or Life would be unbearable in every sickness. By removing Rheumatism through Salicylic Acid or a Salicylate, the Physician actually presented the Sufferer with Heart Disorder and by the endeavor to remove that with Digitalis, the Kidney trouble emanated. Thus, while apparently the Physician in good faith acted as a benefactor and savior, the real capacity in which he acted was that of a grave digger. Any Disorder may be taken at random and a similar analysis or comparison may be made with similar results. All told, the Physician in trying to help the Sufferer, in most cases introduces unconsciously a series of new causes whose ultimate effects may not be known to him or may not be capable of being guarded by him. The Maker's Machine refuses to be tampered. The Human Chemical Engine continues to issue warnings by Eruptions,Suppressions, Eliminations, Comas, Convulsions, Hysterics, Fits, Palsies, untoward Signals. The Lord within constantly shouts His resentment against interference with the bodily mechanism and it is a credit to our Manufacturer that we live in spite of the Medical Doctor and not die earlier by his experiments on us as if we were Guinea Pigs under test. Every Physician adds thus to his knowledge by such costly experiments which mean our Health loss, as every Surgeon learns by filling one or more graveyards according to the frank admission of Dr. John B. Deaver, the famous Surgeon of Philadelphia, Pennsylvania and once the President of the American Medical Association.

ARTICLE 20

LAMEBRAINED LEGISLATURE

Any person with ordinary sense of balance in adjudging the Truth, must have realized by now, that the premises upon which medical activities are founded, are far from correct and that any Legislation based upon such shaky foundation, never will bear the test of an honest Court. Healing is the noblest of Scientific Arts, but, I leave it to the readers to form their own conclusions, as to the extent to which the gutta percha of the honesty of Healers is stretched. Take the two recent enactments of the New Jersey State Legislature. Running for the office of Governor last year, on an independent platform, I had ample opportunity of first hand study of the candidates for the Legislature and their rosy promises. Some of those gentlemen elected then, are now gracing the Assembly and Senate and among numerous Laws ground by that Trenton mill, are these two which attracted my special attention. Both follow the same trend and act under the misnomer of the "Police Powers of the State." They are the Law of compulsory Health Certification of couples intending to marry and the testing of the Blood of pregnant women for Syphilis. The cunningness of these two pieces of medical chicanery is such, that at first sight the Members of the Legislature might have construed them as purely hygienic measures, but, they dig deeply into matters constitutional. Such alleged "Health Tests" would be unobjectionable, were there any positive proof of certainty, that the Medical Examinations are 100 per cent. faultless. Such is not the case. Syphilis "Tests" are over 20 per cent. false and even the Assistant United States Surgeon General admitted them to be 10 per cent. faulty.

So, 10 per cent. (minimum) of the hapless victims will be compelled to go unmarried and as many per cent. of beautiful, healthy mothers will be branded with the stigma of Syphilis and doped with rank poisons of Arsenic, Copper, Mercury, Bismuth and the like for years to come. As for the child, it too will be born with the cursed name of "Syphilitic" and bear ignomy, as well as carry in its Blood Stream potent Chemicals, not intended by the Creator to be there.

There are many serious defects in the Marriage Legislation. Those who know they have Syphilis or suspect it, will go out of the State and marry there anyhow. It will tend to more unmoral relations. As regards the other Law, mothers—many of them, who like my wife Irene Grace are well aware of medical shortcomings, will resent it and refuse when pregnant to be "tested" by such an arbitrary "Law." That Law cannot be legally enforced. No Medical Doctor or State Officer dare touch any woman against her consent, with the Needle of a Hypodermic Syringe, to take the Blood needed for the "Test." If he did so, it would be plain assault and battery and he will be taking a gambling chance on an expensive Lawsuit or perhaps even run the risk, of being knocked down by a headstrong husband, who knows his Constitutional Rights as I do.

Both these Laws, are open evidence of a lamebrained Legislature, that gave no consideration to the other sides of the question and was cruelly misled by the State Board Of Health or other advocates of authority and power. Both the Laws can not stand a public Hearing, so none was given and a hurried passage with the sanctity of Governor

A. Harry Moore's signature placed them on the Statute Books to collect coin for the Medical Fraternity.

Apropos of this, I am reminded of one significant fact which has been puzzling me all along. The Members of the Legislature receive a salary of \$500.00 a year, which is less than \$10.00 per week! The public should be entitled to know what Magnetism there is in the State Legislature, that high Officers getting as much as \$5,000.00 a year are drawn to the State House in Trenton at ten times less compensation! Do they go in for genuine public service? Have they such independent incomes that the mere honor draws them? What is the actual inside condition? They should accept this Article as an open Challenge and submit their figures of income sources.

My attention at this stage, is also drawn to the recent Petition of the Vineland Medical Doctors, to enforce compulsory Vaccination in the schools, through the Board Of Education. Nothing can be of greater interest to me than the use of the word "compulsory," as I am opposed to all dictatorships. No Medical Doctor ever assigned any scientific reason, for Small Pox, Measles, Whooping Cough, Mumps, Scarlet Fever, Diphtheria and similar Disorders of Childhood, hence, to advocate "Compulsion" in a controversial subject, is downright despotism.

Next week, I shall tell you the true cause of all these Disorders. Their Remedy is simple enough and is already proven 18 years—but, that "Fraternity" will not recognize it. Why? It cuts deeply into their pockets!

(Colonel Dinshah P. Ghadiali is lecturing in Europe.—Editor, The Record.)

ARTICLE 21

HORRORS OF VACCINATION

How the public will be duped by the newly signed New Jersey Laws of Health Examination before marriage and "Test" for Syphilis in the case of expectant mothers may be realized from one very significant fact that the Wassermann Test for Syphilis acts in the same way for Jaundice, Small Pox and also Pregnancy. Hundreds of pregnant women registered Plus 4 according to that "Test" and their alleged "Syphilis" disappeared completely after the delivery. Medical evidence is in existence that a newborn baby registers Plus 4 and yet has no Syphilis. That alleged "Test" is a failure in precision and the poor mothers will be branded as "Syphilitic" thereby and their babies will be stigmatized.

Among such rackets, Vaccination and its compulsion may be added. That silly idea originated in England, yet that country has no "compulsory" Vaccination. Here are some facts for quiet consideration. Dr. F. H. Huron, of Danville, Indiana says: "Every soldier who had Small Pox in the Philippines, was vaccinated from one to a dozen times." Dr. A. W. Koenig, of Hohenbruck, Germany, says: "The Vaccination of cattle-pocks is a horrifying wrong against the whole of mankind." Dr. Mayntzer, of Germany, says: "Vaccination is a swindle, so great, so despicable and miserable as Medical Science was when Vaccination was discovered." Dr. Alexander Wilder, of New York, writes: "The compulsion to pollute the Body of a child with a filthy animal Poison is a crime against God and human nature itself; every intelligent, con-

scientious person regards it accordingly." Dr. T. Brett, of Peckham, England, states: "Most unjust and degrading to any civilized nation, moreover quite a farce, tending to endanger greater evils. It is no protection whatever. I am only surprised how any individual can give it credence." Dr. A. Bichmayer, of Germany says: "I confess that I hold the belief in a protective result of Vaccination to be a fateful error of Science, a mockery upon our modern Antiseptic Surgery."

The newspapers publish report of success in the Philippines, as stated by the Vineland Medical Doctors, whereas in fact, in the United States Army there, 674 vaccinated men had later Small Pox and 249 died of it! Yet they continued with more Vaccination! Dr. Lesser of Bonn, Germany, says: "As long as the friends of Vaccination cannot make it clear to me why an organism, putrefied by matter from Small Pox (or Cow Pox) or Small Pox Poison, is more able to withstand an Epidemic Disease than an intact and healthy one, they can not count on me to be one of them." Here is the statement of Dr. J. W. Hodge, of Niagara Falls, New York: "It was one of the less vaccinated cities of our country, there having been no death record from Small Pox. In 1914, the so-called Health Authorities went in there and not liking the situation, stirred a Small Pox scare and vaccinated the school children, who had no disease of any kind; 13 quarantined children were examined by me and found not even sick. After the Vaccination three of them died." Dr. Cory, of England, similarly vaccinated himself from the sore on the arm of a child and died of Syphilis instead of Small Pox. All his medical friends could not help him.

Dr. Beddow-Bayly of England says: "No true measure of the after-effects of Jenner's Vaccination in man has ever been taken." In 1914, in New York State, at least 50 children died of Vaccination. Dr. J. J. Wilkinson, of London, England, calls Vaccination "Blood assassination." Sir William J. Collins, Public Vaccinator of London, England, declared that two of the worse cases of Confluent Small Pox which proved fatal, were found by him vaccinated and revaccinated. He said: "I have no faith in Vaccination, nay, I look upon it with the greatest possible disgust." In 1924, in Detroit, Michigan, this is what the "Health" Authorities admit doing: "We forced fluids to the point of nausea. We literally jammed nutritious drinks in painful, swollen, ulcerating, bleeding throats. In some cases, we tried convalescent Serum with the usual failure in our experience. Anti-Streptococcic Serums of several types were used, Blood Transfusion, Injections of Mercurochrome intravenously were used with an occasional doubtful result, but in most cases with no influence." Dr. R. M. Lyon, of Denver, Colorado, says: "The serious effects upon the entire glandular system and the frightful increase of Cancer makes me a strong Anti-Vaccinationist. A Doctor I know after being vaccinated in the Army died of Stomach Cancer. A very healthy carpenter became a war veteran and was vaccinated. At Walter Reed Hospital in Washington, D. C., he had his upper leg amputated for Cancer and the cancerous Blood finally attacked his Lungs and ended his agony. A Doctor vaccinated himself and died of Acute Nephritis." (Photographs of Victims on pages 33-40.)

These records can be repeated without limit, yet the Medical Doctors talk of "curing" Small Pox and similar Disorders about whose origin they know nothing and in "curing" effectively accomplish the killing. What is the true cause? What are these so-called Children's

Scourges? They are cleansing processes working under the secret Law of God, called Karma or Retributive Justice. What is that Law?

Friday, April 22, 1933

ARTICLE 22

KARMA—THE LAW OF RETRIBUTIVE JUSTICE

The Benign Almighty's powers act mysteriously and it is the fault of Human Beings if they do not comprehend His workings. There is something very fascinating behind the Disorders of children—the innocent ones who appear to suffer without any open cause. However, when duly understood, the veil drops off and a marvelous sense of satisfaction accrues about the absolute justice of the Laws of God.

Karma in Sanskrit, means Action, but as every Action must have an exact Reaction, I define Karma as the Law Of Action And Reaction, which in its final essence becomes the pure Law Of Retributive Justice. The Lord Jesus defined it fully in the words "as you sow, so shall you reap." Karma is just that. In order that a human baby be born, it has of course to come through the Physical Body of a human mother. The Body of the baby is the essential product of the Blood of the mother, the Chemistry of the mother's Blood determining the Chemistry of the baby's Blood, hence its Body build. Thus, helplessly that baby under formation in the Womb of the parent, has to take what the mother gives and cannot escape the consequences of the mother's discretions or indiscretions. Thus, no matter how great the oncoming entity may be, it has perforce to undergo the punishment or otherwise of the mother's doings or wrongdoings, commissions or omissions. For 9 months, the child suffers penalties of Body building not of its own seeking, which on first thought appears to be unjust. Even after birth, that baby is still at the mercy of the mother if fed on bosom milk by the mother. A time comes, when on being weaned, its actual Physical Blood connection is severed. Then and subsequently, Divine Nature, out of sheer justice gives the baby certain opportunities to throw off these "Blood irregularities" which are truly extraneous to its own constitution. The exertion of such justice under the Law Of Retributive Justice (Karma) is what produces the various Disorders of children, as enumerated before. They are mere processes of purification of Blood Chemistry and are the channels through which the offending Chemicals are ejected. The main Organs of Elimination are the Nose, Mouth, Skin, Genitals and Rectum and through one or more of these channels the ejection of the offensive material may take place. Then, the Medical Doctors baptize them with fancy names and scare the public into all sorts of fantastic procedures, each one being nothing short of suppression of purification and preservation of putrefaction. If instead of endeavoring to suppress these Internal Eruptions by potent Poisons, the Healers would simply aim at hygiene, the Sufferers would be better benefited. I always fought against it. I know from long medical practice in India, supposedly the land of serious Small Pox Epidemics, that the cause of these loathsome Disorders is not what is ordinarily believed, but what I explained herein. With needed cleanliness, if purely sanitary precautions be taken, these filthy looking mischief makers leave without a mark. Even when at a time of the great Bubonic Plague in India in 1902, in the city of Bombay, nearly one thousand deaths occurred daily

by the dread scourge, one night in Surat, I had 13 Plague ridden Sufferers to attend. One of them dying in my arms (because he came too late to save) had 109½ Degrees Fever after death. Before he died however, he vomited the contents of his Stomach full on my Face. I never was inoculated with any Vaccine or Serum, yet, nothing happened to me, whereas many Medical Doctors who took Haffkin's Horse Broth Serum, went to bow to the throne of their Maker by the very Plague they tried to prevent by Injection.

The sensible thinker must heed my earnest words. I pray to the intelligent to investigate for themselves and study BOTH sides of the question instead of taking the word of any Healer of any System as a gospel of Truth. Filth never made purity. Injection of filthy Cow Pox can never PROTECT; they told the public at first, the protection would last for Life. Now they say, it should be repeated every so often! Science never can change—Medicine is quackery of the most hazardous character.

ARTICLE 23

SUN HAS NO HEAT, NO LIGHT

From where does the Chemistry of our Physical Body come? From where does all our Dynamic Energy to put forward work come? Most people will answer that the Body is nourished by our food, the food that we put into our Body acts as our fuel, the same way as coal is put in a furnace and produces Heat by its combustion. Combustion being produced by the combination of Carbon and Oxygen making Carbon Dioxide or Carbonic Acid Gas makes one factor in the food value. Similarly, the combination of Hydrogen with Oxygen making water affords another factor in the food value; but, that can not be all. Were it so, chewing a few chunks of coal in a day, should be ample to make the necessary Heat in the Body, but evidently there are some other factors involved. However, for the present, we may consider that the Food we eat produces the energy needed by us.

The question opens: "Where does that Food receive its Energy?" So, finally all conclusions being aggregated, we find that the Sun is the prime source of Food, by acting upon the soil through water and air. What then is the Sun? Scientists unanimously agree that the Sun is necessary for the maintenance of Life on this Planet; they also unanimously agree that the Energy evolved by the Sun has three main divisions. These are the Major Color Division which comprises or emanates the recognized 7 Colors in the Rainbow: Red, Orange, Yellow, Green, Blue, Indigo and Violet; the Infra-Red Division which is Invisible and comprises or emanates the so-called Heat Rays, appearing in position below the Red and the Ultra-Violet Division which is Invisible and comprises or emanates the so-called Cold Rays, X-Rays, Cathode Rays, Radio-Active and Gamma Rays. These three Divisions make the mass of the Solar Energy as recognized by Science. Till now, the Medical Doctors persistently rejected the view that the Major Color Division has any healing power and constantly harped on the Infra-Red and Ultra-Violet as the givers of Health. The Scientists maintained a similar view and hammered in further that the Sun GIVES OUT Heat for Life and that the existence of Life on the Earth is because of this Solar Heat. They imputed to the mass of the Sun a tremendous roaring furnace-like activity

and ostensibly even measured it as ranging from 6,000 Degrees to 3,000,000 Degrees Fahrenheit.

I rejected the Heat view years ago. I piloted an airplane in 1919 and measured the ground Heat to be 60 Degrees on the day of the flight. As I flew to 9,800 feet above the field, the Thermometer measured 8 above Zero! Surely, if the Sun were a mass of burning lava, the Heat should have increased when nearly 2 miles closer. Instead, it was materially lowered, indicating that the Heat evolving theory was faulty. Numerous flights made by other observers corroborated the same deduction, that the higher one goes—closer to the Sun—the less the Heat.

In Winter, we really ARE 3 million miles nearer to the Sun. In fact, balloon measurements at about 18 miles height showed 100 Degrees below Zero. The Heat of the Sun theory does not therefore sound conclusive and there is something else not generally recognized, which we have to note. The same hollowness is hidden in the universally admitted view that the Sun gives out Light which we see. Test this theory also. Use your own judgment and common sense. The Sun is about 92,897,416 miles away from the Earth on an average and Light has to travel all that distance to reach us. The Light is considered by us as Visible. Therefore, the shaft of Light over $92\frac{3}{4}$ million miles long must be illuminating the Etherial Space as it moves along at the velocity of 186,324 miles per second, the reckoned speed of Light. It would make of that $92\frac{3}{4}$ million mile shaft a Visible pillar, a fact simple to understand. In Truth, it is NOT so. Set a lighted lamp 10 feet away from you and let the Light shine full on your features. Let a friend sit at right angle to you and the lamp and look ACROSS the beam of Light which illuminates your face. He will NOT see any illumination in the intervening space! Were Light itself visible, that Space would be brilliant, but actually it shows nothing visible.

Thus, there comes a single conclusion as I enunciated and demonstrated, that—Light is NOT visible, though it may PRODUCE visibility. The two ideas or theories above stated are so radically startling, that even men of learning gape when I place before them the conclusion that—the SUN HAS NO HEAT, NO LIGHT, but that the power we receive from Him is Energy under propulsion or projection, which is transformed or translated by us as Heat or Light. This transformation and translation is easy to comprehend from the hypothesis given above and is performed by the Atmosphere on the Earth, the Etherial Space Particles within the Air and certain Organs in our Body, through the Major Color Division, ignored by others, but utilized by your humble servant.

Friday, May 6, 1938

ARTICLE 24

GOD AND HIS JANITORS

To bring home the idea of the Sun having no Heat, consider from the standpoint of combustion. Scientists assert the existence of Flames on the Sun, quite higher than 300,000 miles in height and some make the height a round half million miles. To produce such Flames, the amount of Oxygen Gas needed would be inconceivably voluminous, because those Flames and their power would be equal to the Heat produced by burning 4,543,571,081,190,760.57884 Tons of Anthracite Coal EVERY

Second! What a furnace and what a number of janitors must be in the service of God, to fire that volcano in such an exact manner as to keep the Temperature level just appropriate and even for the benefit of the 2 billion Humans and other animals inhabiting this Globe!

If, to avoid employing labor and obviate the catastrophe of strikes, the Cabinet of His Benign Arch-angels would decide on using automatic Heat Regulators or Thermostats, the contingency might be overcome, but, that again would necessitate commodious workshops distributed all over the surface of the Sun aggregating approximately 2,250,000 miles in circumference. This, in itself would entail employment of many workmen and if there be any William Green or John L. Lewis among that organization, there certainly would be moments at times, when their variable moods might clash against the will of the Deity—their employer—and if a contrary edict be issued, the Thermostats being placed out of commission, might either freeze us to death or fry us into crispettes!

No, I say no! Scientists of all the World to the contrary, I say boldly after over half a century of a researchful life, that the Sun has or evolves No Heat and No Light. The Sun radiates Energy, which in itself represents the original prime source from which the Universe was built, the Primordial Power to which all bow with one name—God. The Sun to us, stands as the most luminous, most effulgent, most potent, most appealing emblem of that God Whom nobody ever enunciated in human language. It is impossible to speak of Him Who is Infinite, in any or all languages which of themselves are Finite.

The Energy of the Sun in such projection may be comprehended by the word Radio-Emanation, which means throwing out particles of matter in infinitely microscopical structure. Every thing in existence on the Physical Plane is composed of matter and every such thing called Matter disintegrates. During such disintegration, the matter throws off extremely tiny particles and such ejected particles when given off with velocity become projectiles, carrying with them the imparted Energy.

All power is exertion and utilization of Energy and all Energy is actually composed of mobile particles projected through space. The Five Energies known to mankind are Sound, Heat, Light, Electricity and Magnetism. Each has certain speed and motion, each moves in a certain Medium Of Transportation and each is capable of conversion or transformation by changing the Velocity and Medium Of Motion. This brings us to consider Energy in its various manifestations, before we may be enabled to apply the theory to practice.

You, my friends, who are accustomed to think with the general World, will find it rather hard and jolting to relinquish ancient, time-honored thoughts and fall into new channels, but, please remember that all such changes will benefit and enrich your Lives, by removing the self-erected barriers to gaining Health. The view of Radio-Emanation is amply substantiated by Madame Marie Curie and her collaborator Henri Becquerel, both of France, who in 1899, gave to astonished Scientists Radium. Radium, though miscalled an Element, actually produces three distinct Emanations—Alpha, Beta and Gamma Rays. The Alpha Ray is 99 per cent. Helium Gas with an Atomic Weight of 3.99, compared to 16 of Oxygen Gas. In an apparatus invented by my good friend the late Sir William Crookes, Secretary of the Royal Institution

Of Great Britain, called the Spinthariscopes, this terrible bombardment of the Alpha Ray can be visualized, because it gives a faint Light when it strikes the surface of the Zinc Sulphide Screen inside the apparatus. The Beta Ray is Emanation of Negative Electrical Particles or Electrons, while the Gamma Ray is like the X-Ray and is the part of Radium that has the objectionable burning tendency or effect.

The use of Radium as a therapeutical agent, is annulled by the Gamma Ray, because although it will break up and disintegrate a cancerous mass, it has no power to remove that material from the Body or purifying the Blood after the debris is washed into the Blood Stream by the process of Circulation. Radium as well as X-Rays used for healing purposes are nothing short of Cauteries or Caustics and their use for such purpose must be tabooed. However, Radium by its disintegration proved the Radio-Emanation theory and for that alone I pay my respects to the memory of Marie Curie, the brilliant woman who made it possible for me to demonstrate the basis of Spectro-Chrome Metry.

ARTICLE 25

ENERGY AND OSCILLATORY FREQUENCY

It is easy to understand the conversion of Energy or its transformation, if we comprehend the Laws regulating what is generally called "Vibration," but which I call Oscillatory Frequency. Vibration and Oscillation are different. When the particles composing a matter tremble or quake, without leaving their location, they are in Vibration. When the particles composing a matter tremble or quake and at the same time move forward, they are in Oscillation. In simple language, Oscillation is Vibration with Transportation through Space. Each of the 5 Energies—Sound, Heat, Light, Electricity and Magnetism is the same prime Energy of God, with the difference of Oscillatory Frequency and the character of Medium Of Transportation. The measurement of Oscillatory Frequency is in Octaves. It is found that in 7 stages of Musical Notes, Sound rises in Pitch exactly double the number of Oscillations per Second. The first Octave having 2 Oscillations per Second, the second Octave has 4, the third has 8, the fourth has 16 Oscillations per Second. Between any one Oscillation Octave and another, comes a rythmical series of 7 notes of Music:—Do, Re, Mi, Fa, Sol, La, Si. Upto the third Octave, the Sound Energy does not appeal to the Sense of Hearing, but, on the fourth Octave, our ears catch the low hum and the Sound from then on becomes audible. On the eighth Octave, at 256 Oscillations per Second, the pitch of Middle C is attained. Sliding along in the same way, multiplying each resultant by 2, at the fifteenth Octave such a high note is reached at 32,768 Oscillations per Second, that the human ears refuse to cognize the Sound Energy, our inner apparatus not being capable of such high register. There, to us, Sound ceases, at ordinary Air Pressure. However, by removing the pressure of the air, in vacuum, the Sound Energy can be made to produce Sounds of much higher intensity which though inaudible to our ears has tremendous disruptive potency. Such Energy at the twentieth Octave, working through a vacuum and motioning solely through the infinitesimal particles of Air left within the vacuum, makes 1,048,576 Oscillations per Second and at that point all Sound ceases. Beyond this, the dominion

of Oscillation Frequency extended to the forty-fifth Octave becomes Heat or Infra-Red Division; further, at the forty-ninth Octave it becomes visible as Red Light. In fact, Heat is Invisible Light or Dark Light. Light moves through the Ether within the Gaseous Medium and its Oscillatory Frequency is in the trillions per Second. Visible Light too has 7 Key Notes, which, beginning at the lower end with Red, terminate at the higher end with Violet. The entire gamut of the Rainbow, motions through Space within the range of this forty-ninth Octave. It is that Rainbow with which God made His covenant with Man (Genesis, Chapter 9) and whose meaning I decoded in Spectro-Chrome Metry, by using Attuned Color Waves exclusively for healing the sick. Its true significance will unfold as we study along. Beyond the forty-ninth Octave, there is the commencement of the Ultra-Violet Division, which has Electrical manifestations like X-Rays at the fifty-seventh Octave, Radio-Emanative effects at the sixty-first Octave and at the sixty-fourth Octave, the entire Energy is changed to Magnetism. Each of these Energies, not only moves with a different rate of Oscillatory Frequency, but, its Transportation Medium too is different. Aggregately considered, it is the same personality in different coats and overcoats, its different effects corresponding to the different manifestations demanded of it. All these different manifestations are eventually traceable to the one source which is the Sun and as we studied before, the Sun being the producer of the Foods we eat, food may well be styled Bottled Sunshine. The disengagement of this Food Energy within the Body, gives our Physical Vehicle the various Chemicals it needs. These Chemicals are selected by certain definite Organs, under certain fixed rules and the disobedience or disregard of any of these rules means subversion of the Health Equilibrium and production of what is commonly called Disease. Watch your food intake, watch the dross output and above all keep your Emotions and Mind pure and undisturbed and you will have ever graceful Life, happy and healthy, until you reach that old age when the mechanism of the Body may itself wear out, dropping the final curtain with a painless passage to the Higher Life, about which too some day I may enlighten you, if you be interested in such knowledge. I request you to study carefully the Laws enunciated in this article. Give it the attention it deserves in the interests of your own Health. Once its principles are grasped, the rest will be easy for you and soon you will realize that the Medicine for Health can be produced right within yourself, when you learn to tap the treasure-house of the powers within, the powers which really exemplify Man as the Image of God.

ARTICLE 26

WHY RED TOMATO AND GREEN CUCUMBER?

Nothing brings one so close to understanding the Fatherhood Of God than the Laws regulating Oscillatory Frequency. They show clearly that all Energy has a prime unity, the difference solely being in the number of Oscillations per Second and the Medium Of Transportation. As the Energy scales from Sound to Magnetism, at each step the Oscillatory Frequency increases and the Medium through which the motion occurs decreases in Density. Sound goes through Solid, Liquid and Gaseous Media; Heat and Light go through the Ether 1 permeating

all of them, the Ether not being bodily transported; Electricity goes through Ether 2 permeating Ether 1 with bodily transportation of the Etherial Medium: Magnetism follows the same routine in a Higher Octave of Oscillatory Frequency. Thus, each is the outcome of the original Energy, with different manifestations. Look further into this interesting matter. Sound can be heard through Solids, Liquids and Gases, but the moment Gas (Air) is removed, Sound stops. Etherial Sound of much Higher Frequency also stops at the twentieth Octave. Heat and Light, however, can go through a vacuum, but, although Light may pass through glass, wood intercepts it. However, X-Rays (which are electrical in nature) pass through wood easily, but are intercepted by Lead. So do Radium and its Emanations of the Gamma type which are highly penetrative. Magnetism, however, can not be insulated and goes through wood, Lead and all metals even, except that Iron, Nickel and Cobalt, which are themselves magnetic may scatter its penetration by self-energization. Yet, with all this fineness, Magnetism has a Space Limit; the most powerful Magnet does not have a field of activity beyond a few feet. Here comes that mysterious power defined by Sir Isaac Newton as Gravitation. The Scientists never have been able to find or state definitely what Gravitation is. Various theories are attached to it, but, none explains in a cursory manner this force called Gravitation. I have a definition for it, that will show the actuality in a short form. I call Gravitation "Space Magnetism." It moves through Ether

3. It is a real, material Energy that extends its hand out to an infinite space and keeps control of those Motions which maintain the Heavenly Bodies at proper distances. Each of these Energy Manifestations rules the World and through it us and there is nothing in it to scoff by dubbing the idea as "Astrology." It is pure Astronomy, well proven, well recognized. When Radium was given to the World by Marie Curie in 1899, her collaborator Henri Becquerel went ahead with further Research along the lines of Radio-Emanation. He found that certain substances when exposed to Light become energized and subsequently emanate Light. The Color of such Light depends upon the chemical character of the substance exposed. He made a list of these so-called Fluorescent substances. Sir William Crookes researched further along similar lines and made more important discoveries. Finally, my Researches in the same direction convinced me that ALL substances are capable of such Radio-Activation and throw off Radio-Emanation. That explained why certain foods receive certain composition. It explained why a Brown Cow eating Green grass, gives White milk making Yellow butter; why an unripe Banana is Green, but when ripe and sweet becomes Yellow and NOT Blue; why a Tomato is Red and a Cucumber Green, although grown in juxtaposition, by the same farmer, on the same farm, in the same soil, with the same manure, by the same water, in the same air, through the same Sunlight. To the uninitiated, all this might either appear just natural and meaningless or the result of some unexplainable mystery. There is no mystery in all this. It is just Chemistry from a different standpoint and from such different viewpoint, looking at the Chemical World, I reached out for further knowledge and received it through exhaustive Research, which culminated in Spectro-Chrome Metry after nearly 30 years of patient labor. With its origination, I presented to the service of suffering Mankind, a Science Of Healing, which has Automatic Precision and which has

no guesswork or equation of human error and furthermore, in which there are **No Diagnosis, No Drugs, No Manipulation, No Surgery.** Spectro-Chrome Metry is an accomplished fact and not an inventor's dream. Its merits stand proven during the 18 years of its existence and from the next issue, I shall have the pleasure of initiating you into its "mysteries" in a simple yet scientific manner, so even the veriest layman or laywoman may understand it thoroughly and use the knowledge for his or her welfare as a Family Health Protector.

SPECTRO-CHROME IN EVERY HOME

(Thousands Already In Successful Use)

**PLUG YOUR HEALTH
FROM THE ELECTRIC LIGHT SOCKET!!
Staggering To The Imagination--
Accomplished And Proven Reality!**

SOME STARTLING FACTS

Spectro-Chrome is not a mere Apparatus, but, a complete System Of Healing for Self-Help and Self-Use; its value and merits have stood the rigid tests of over 18 years, even in Law Courts.

Classed in the same rank of utility as the Telegraph, Telephone, Radio and similar revolutionizing inventions, Spectro-Chrome shattered all prior conceptions and set a new pace in Healing by its Automatic Precision.

Many cases, pronounced "beyond any human help" were successfully normalatated by Spectro-Chrome:— New Skins were grown on large Areas of the body burnt and completely destroyed by fire; born Paralytics were made to walk; Consumptives declared dying were pulled out of bed in a few days

and eventually restored to Health; Leaky Hearts rendered sound; 10-Day Hiccoughs stopped in a day; Arthritis and Rheumatism normalated after Sufferers had been years in agony; Pains of Burns relieved entirely in One Hour; Diabetes removed and Sufferers given new lease on Life, without stopping the eating of Starches and Sugars; Cataracts arrested from development; X-Ray and Radium destruction fully repaired; certain types of Blindness and Deafness removed; Cancerous growth controlled; Refractory Carbuncles normalated.

All such near-impossibilities were accomplished by Spectro-Chrome exclusively.

ARTICLE 27

AURORA AND RAINBOW

During thousands of years, since civilized Human Beings began to observe, they saw an occasional outburst of glorious Light, descending like curtains of various beautiful Colors, in the sky. When it appeared in the North, they knew it as Aurora Borealis, when in the South, they dubbed it as Aurora Australis.

It was beautiful, it appealed to the eye, but, there it began and ended. There was no definite inquiry about its source or purpose and while it was described in many books, it meant nothing to the people. Similarly, for the same period, an occasional phenomenon was seen in the sky in the shape of a Bow, which was called the Rainbow, because, it became visible during moist times, but, beyond admiring its colorful beauty, the mind of onlookers did not progress.

The Bow in the Clouds was mentioned even in the Holy Bible, Genesis 9, Verse 13, but, none decoded the true meaning of what God spoke unto Noah, when he promised the Covenant. That Covenant had hidden meaning; those Divine Words referred to something, some relation between the workings of the Forces Of Nature and Mankind. That setting of the "Bow in the Clouds" was some definite object which would serve some definite purpose, for the welfare and benefit of Mankind; those Divine Words were spoken thousands of years ago, but, its partial decoding was made by Sir Isaac Newton, Professor of Mathematics in Trinity College of Cambridge, England, around 1666. He established the principle of the 7 Colors of the Rainbow and its source as White Light. By means of a triangular piece of glass called a Prism, he made artificial Rainbows at will and gave to the World the Laws regulating Diffraction and Dispersion or cracking and spreading of White Light. His theories were accepted without challenge until 1802, when Dr. William Hyde Wollaston, of England, published the fact of seeing some Black Lines, in the Spectrum of the Rainbow of White Light. He found these Black Lines in different places, between the Red and the Violet Colors.

Newton had already established, that there are always 7 Colors in the Spectrum (Rainbow appearance) of White Light. None paid much attention to the announcement of Wollaston, until in 1814-1815 a German Optician of Munich, Bavaria, published Color Charts, which

indicated the existence of a large number of such Black Lines, in the Spectrum of the White Light of the Sun. He actually marked between the Red and the Violet, end Colors of the Spectrum, 576 Black Lines, of different thicknesses, different numbers, in different positions, the one fact remaining, that for Sunlight those Black Lines were always there and never absent or shifted. In honor of this Optician, whose name was Joseph von Fraunhofer, those Black Lines in the Spectrum are still known among Scientists as the Fraunhofer Lines.

Two learned Professors of Chemistry and Physics, in the Heidelberg University in Germany, became interested in this Science of Spectroscopy, built better Prismatic Spectroscopes and around 1857 gave to the World, what is known as Spectrum Analysis or analysis of the composition of Chemicals, by observation of the Fraunhofer Lines. This Science of Spectrum Analysis which they originated, is called the "Eighth Wonder Of The Modern World" and placed the names of those two Scientists, among the Master Minds of the World. Their names were Robert Wilhelm von Bunsen and Gustav Kirchhoff, both honored by Scientists. The Bunsen mentioned, was the same man, whose Bunsen Blue Flame Burner is used in all Laboratories and in kitchens operated by gas. Bunsen and Kirchhoff found, that every Chemical Element under disintegration by combustion or otherwise, emanated certain Colors peculiar solely to that Element, in the Number, Thickness and Position of certain Fraunhofer Lines. By these peculiar Lines, that particular Element is always recognized.

Sodium was found to have a Double Line in the Yellow, while Iron has about 195 Lines; each Element was distinguished by an entirely characteristic Spectrum and by such Spectra, other so-called Elements were discovered. Thus, was founded the marvelous Science of Spectrum Analysis, which immortalized the names of Bunsen and Kirchhoff.

Taking the clue from Spectroscopy, Astronomers applied the method to Telescopy and thus established, that all the Elements found on the Earth, were in existence also on the Sun. In fact, the Earth being a daughter of the Sun, being born countless ages ago from the mass of the Sun, must have all the Elements of the Sun, her parent. Stellar as well as Planetary Astronomy proved by Spectroscopy, that the Solar System as well as the Universe, had many things in common and that the Actions and Reactions of each, must affect both physical as well as human conditions to a certain extent.

Friday, July 15, 1938

ARTICLE 28

PRIMARY COLOR TRINITY

Such was the situation in regard to the knowledge of Chemical Spectroscopy and Stellar as well as Planetary Spectroscopy, when in 1881, in Bombay, India, at the age of 8, I happened to see some such Charts in the books of Elementary Chemistry by Professor Fownes and Physics by Professor Ganot. The works intrigued me, but, I had no opportunity to go into Spectroscopy in detail, until in 1891, in the library of the Blavatsky Lodge, Theosophical Society, I stumbled on "The Principles Of Light And Color," by Dr. Edwin D. Babbitt, of Cleveland, Ohio, published in 1878. Therein, that learned Medical

Doctor had explicitly expressed the opinion that certain Colors actually normalatated certain Disorders, Blue removing Fever and the like. The work was based on the universally accepted view of Sir David Brewster, of England, that the 7 Major Colors of the Sunlight Spectrum, were producible from the original or Primary 3 Colors Red, Yellow and Blue. For six years after reading that book, I had no opportunity of exemplifying the deductions of Babbitt, when a Parsee woman, whose family's friend I was, asked my medical assistance when given over as incurable. She had Mucous Colitis and was passing about 100 Bowel Movements a day, with Slime and Blood. It was a painful, continuous performance and she was moribund when I reached her from Berar, Central India. The Medical Doctor in attendance, was doping her with Opium, Chalk Powder, Bismuth Subnitrate and Gum Catechu and the case was hopeless when I accepted it. I knew for a certainty that Medicine was valueless, so with her permission I used the Babbitt method, with Light passed through Colored Bottles, containing plain water. The effect was supposed to be retained by the water and being my first such experiment, I was not sure of the outcome.

Judge my astonishment, when in 24 hours, the Movements were reduced to around 10, in another day they became 2 and on the third day, the dying Sufferer left her bed! This miracle of Healing without any Drug, aroused me to the value of Chromopathy and I studied Babbitt thoroughly. (She is still alive. Below is her photograph.)

JERBANOO FRAMJI JUSSAVALA

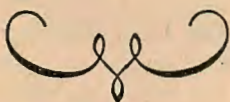

In accordance with my views of Scientific Research, I went to the beginning, wherein Sir Isaac Newton analyzed the Rainbow and step by step approached Babbitt. However, as I restudied his Primary Colors being Red, Yellow and Blue, my experiments proved that such "Primaries" could not produce "White Light" by combination. Geometrically, Chemically, Spectroscopically and otherwise, all my Tests showed, that those three were not and could not be the Primary or Parent Colors. Other theories failed to meet my views. They had one defect or another and were far from 100 per cent. accurate. The only one theory that proved true in practice and met all my requirements in every point, was that of Dr. Thomas Young, of Milverton, England. It maintained that Red, Green and Violet were the Primary Three Colors, from which the entire gamut of Colors was built. Young's theory was corroborated by others and as it proved true in every way I tested it, I adopted that Chromatic Trinity as the basis of my work. Those three Colors formed what I called the White Triangle, with the Red and Violet at the base and the Green at the top.

In playing scientifically with these three, I found by actual Color Projection and Color Superimposition, that Yellow was NOT the Primary Color as accepted by Babbitt, but, was in fact composed of Red and Green. Two equal size Circles of Red and Green, superimposed on a White Screen, show neither Red nor Green, but Yellow. That should prove to the Scientists, that Yellow is NOT a Primary or Parent Color, but, is a Secondary or Compound Color. Similarly, Green and Violet make Blue, proving Blue to be a Secondary or Compound Color. Of course, in printing and painting as well as mixing of Colors, Red-Yellow-Blue theory looks like the true one, but in the projection of Colors as Live or Radiant Energy, Red-Green-Violet is the only true solution for Irradiation.

Printing and painting in Colors is done by daubs. It is a cheat on the Eyes or is merely the effect of Visual Perception, because, under the Microscope, mixed Colors appear like separate, individual grains, whereas in Radiant Energy in projection, when one Color is superimposed on another and changes its aspect, there is an actual conversion without camouflage.

The Prism of Triangular Glass, definitely supports the view. Place a Prism at any flat surface, horizontally on the Nose Bridge. You will notice on looking at an ordinary White Light or Sunlight, the usual 7 Color Rainbow phenomenon; now, slowly turn the Prism on its horizontal axis, until you see all Colors totally disappearing except three and those three can never be obliterated. The all-present three will be Red, Green and Violet, all the others, being their products, will be found to come and go during the rotation. The three Primary Colors accepted in my work are thus Red, Green and Violet, forming the basis of the Divine Trinity of the Physical Plane.

THE BEST LIFE INVESTMENT FOR HEALTH

In course of life you reach a time,
When Doctor, Lawyer, Priest alike,
Does fail to give the sought relief,
To troubled mind or burdened heart—
Then come to me:
I help you to help yourself.

SPECTRO-CHROME

**Spectro-Chrome Is The Admitted
MARVEL OF THE TWENTIETH CENTURY**

It has:

**NO DIAGNOSIS—NO DRUGS—NO MANIPULATION
—NO SURGERY**

**Yet, its results are incredibly near-miraculous even in
the removal of so-called "Incurable Disorders."**

INVESTIGATE FOR YOURSELF

OUR AIM:—SPECTRO-CHROME—IN EVERY HOME!

Friday, July 15, 1938

ARTICLE 29

SECONDARY AND TERTIARY COLORS

Having established the Primary Color Trinity of Red, Green and Violet, finding the Red, Yellow and Blue theory to be incorrect for Radiant Energy, I turned my thoughts to the next step. I found that the Superimposition of Red and Green made Yellow, Green and Violet made Blue. Then came a poser. The Color Spectrum began at Red and ended at Violet. The main Spectral Lines began with the Hydrogen Line at C leaving a gap of the A and B Fraunhofer Lines, toward the Red end.

This appeared to me as strange. There must be some meaning in this gap. In the study of Physiology or the organic functioning of the Human Body, I found many irregularities. One statement especially has all along been a great puzzle to all thinkers. Our life depends on Blood Circulation; Blood Circulation depends on the pump of the Heart; Blood must be pure to be of service; Blood is the scavenger of the Body; Breathing of Air by the lungs clears the impurities; what then motions all this activity? Is it the Heart that motions the Lungs or is it the Lungs that motion the Heart and what motions either? No book ever gave the solution of that problem. My Researches demonstrated that the Chemical Body must be motioned by Chemical Action and if I could find Chemical Spectral Lines corresponding to Chemical Elements having effect on Heart Functioning, I could solve that problem. That I did. I found certain Chemical Elements, whose Fraunhofer Lines in the A and B section coincided with their physiological effects on the Blood Circulation. Those Elements (upto 1920) were 4 in number—Lithium, Potassium, Rubidium, Strontium and late in 1925, I found another Element in the Sun during His total eclipse, to which I gave the name Irenium. All these have Spectral Lines of a Pink Color, corresponding to the A or B; at any rate, they give Lines below the Hydrogen Line C. After much experimental work, I succeeded in obtaining them for commercial use, by reversing the Rainbow and junctioning the two ends of the Spectrum, (Red and Violet) produced the Magneta which satisfied all my expectations as the Third Secondary Color.

Establishing thus the Primary Red, Green and Violet and producing by the combination of each two Primaries a Secondary, I made a third generation of Colors, by junctioning one Primary and one Secondary into a Tertiary. Thus, the 3 Primary and 3 Secondary Colors gave me 6 Tertiary Colors, making in all 12 Colors, matched for their positions (hence effects) in the Full Scale of Chromatics with equal geometrical precision. The Tertiary Colors being Orange, Lemon, Turquoise, Indigo, Purple and Scarlet, completed the mystery, so long unfathomed, of the Mogen David (Shield of David) and its application by the new Science of Spectro-Chrome Metry revolutionized all former conceptions of Healing, giving to the Medical Profession a heartquake they did not have during the 6,000 years of the administration of Pills, Potions, Pellets and Poisons!!!

Here is that Mogen David:

Note that each Attuned Color Wave stands 30 degrees away from its neighbor and therein lies the mathematical Automatic Precision which made Spectro-Chrome so unbelievable and near miraculous.

Friday, July 22, 1938

ARTICLE 30

CHEMICAL ELEMENTS AND COLORS

My next step was to find the position where each Chemical Element would appear in the geometrical figure of the 12 Matched Colors which I called Attuned Color Waves. Spectroscopy as proven by Robert Wilhelm von Bunsen, distinctly enunciated definite Spectral Lines for each distinct Chemical Element, so I followed the same logical reasoning and examined experimentally where each Chemical Element preponderated in its major Spectral Lines. Thus, the next Chart of Chemical Elements and Attuned Color Waves came into existence. Those Chemical Elements which could be burnt, I examined that way, those which did not ordinarily burn, I subjected to the Electric Arc and examined; others I examined by means of the Electric High Tension Spark. Thus, I got a working Chart of all the Chemical Elements in the Spectral Divisions as they belonged.

Subsequently, I discarded for healing purposes, the Chemical Elements which were not used in the Drug Terminology, which condensed the system materially. Then, knowing the Physiological Action of each Chemical Element upon the Human Body, I substituted the corresponding Attuned Color Wave for the potency of the Chemical Element and behold—I had a sound, actual, working system, giving results far transcending my initial expectations.

Spectro-Chrome became an accomplished fact, because the theory and Experimental Research coincided in downright accurate results!

Friday, July 22, 1938

FUTILE EFFORTS

In their futile efforts to wipe out Spectro-Chrome, which is the most poisonous thorn in the side of the Medical Racket, numerous attempts were made in the past to place legislative bans on the system, so unique, so marvelous.

During 18 years of its existence, Spectro-Chrome emerged victorious each time.

How will they obscure facts?

Excerpts of Affidavits

M. J. P., M. D., Member A. M. A., former Contract Surgeon U. S. Army, Brooklyn, N. Y.: "I was invalidated for 2½ years with Chronic Arthritis and Neuritis; it was said to be incurable. At this time my attention was called to Spectro-Chrome

...I treated myself, restoring a helpless, painful condition to full health...In conditions that are ordinarily considered incurable, I deem it far superior to any known form of Therapy and in most cases of preventative surgery."

C. G., of Mansfield, Ohio:—"L. lay a helpless invalid in bed for about seven months, flat on her back, without even turning on either side. Finally the Medical Doctors said that she was beyond medical aid and nothing could be done...here is what Spectro-Chrome did to my daughter. Within 24 hours, L. could turn around in her bed and began to eat with a good appetite. In two days more she left the bed...The Medical Doctors had said that nothing short of a miracle could save L. I feel justified in saying that the Miracle is performed..."

J. F. C., of Philadelphia, Pa.:—"Spectro-Chrome work was successful in the removal of a group of swollen glands, quite noticeable, from the back of the neck...Next incipient cataract which was controlled...acute bronchitis...yielded immediately...cancerous condition of the outer ear...the pain and bleeding are stopped and the wound is healing...fall resulting in a fractured wrist. The pain was abated."

Friday, July 22, 1933

ARTICLE 31

ABOLITION OF DRUGS AND MEDICINE

I have no desire to take you further into the depths of the theories behind the unique Science of Spectro-Chrome Metry. I have no desire to expound all the theories pertaining to the Science also, because much of such work might possibly not be to your liking. I shall, therefore, bring you more quickly into contact with the Family Health division, as that will appeal more to your immediate welfare. It will show to you how I discarded the use of all Drugs and Medicines.

Having established the Primary, Secondary and Tertiary Attuned Color Waves and standardized their names as the Red, Orange, Yellow, Lemon, Green, Turquoise, Blue, Indigo, Violet, Purple, Magenta and Scarlet, I analyzed the complete Spectrum and fixed the various Chemical Elements onto their Predominant Spectral Color Lines. Here is the Table of such Chemical Elements:

RED: Cadmium, Hydrogen, Krypton, Neon.

ORANGE: Aluminum, Antimony, Arsenic, Boron, Calcium, Copper, Helium, Selenium, Silicon, Xenon.

YELLOW: Carbon, Glucinum, Iridium, Magnesium, Molybdenum, Osmium, Palladium, Platinum, Rhodium, Ruthenium, Sodium, Tin, Tungsten.

LEMON: Cerium, Germanium, Gold, Iodine, Iron, Lanthanum, Neodymium, Phosphorus, Praseodymium, Samarium, Scandium, Silver, Sulphur, Thorium, Titanium, Uranium, Vanadium, Yttrium, Zirconium.

GREEN: Barium, Chlorine, Kashmirium, Nitrogen, Radium, Tellurium, Thallium.

TURQUOISE: Chromium, Columbium, Fluorine, Mercury, Nickel, Tantalum, Zinc.

BLUE: Caesium, Indium, Oxygen.

INDIGO: Bismuth, Ionium, Lead, Polonium.

VIOLET: Actinium, Cobalt, Gallium, Niton.

PURPLE: Bromine, Europium, Gadolinium, Terbium.

MAGENTA: Irenium, Lithium, Potassium, Rubidium, Strontium.

SCARLET: Argon, Dysprosium, Erbium, Holmium, Lutecium, Manganese, Thulium, Ytterbium.

Finishing such Table and affixing the Chemical Elements onto the Mogen David Diagram, as illustrated in the last issue, I found that the following positions had what are called Affinity Positions, meaning those having opposite Chemical Actions, hence the combination of the one with the other would neutralize the effects. Here are those Affinity Attuned Color Waves:—

RED against **BLUE**

ORANGE against **INDIGO**

YELLOW against **VIOLET**

LEMON against **TURQUOISE**

PURPLE against **SCARLET**

GREEN and **MAGENTA**, although opposed diametrically in position, are not Affinities or opposites in character, but, are Dual Polarities of the same Energy, the one working at the top—the Head, the other working through the bottom—the Genitals. Green and Magenta—the

Head and the Genitals, thus act through their combined potency by their connection with the Spinal Cord, both acting in unison, for the common good of the entire structural mechanism.

This, finding of the Affinity Waves, simplified my work very materially. Knowing the Physiological Effects of the various Chemicals known as Drugs and Medicines, it was easy for me to co-relate the Chemical Elements of the Drugs and Medicines with the positions of such Chemical Elements on the Attuned Color Wave Spectrum. Thus, nullifying the Chemical Effect or Physiological Effect of any Chemical Element composing a Drug or Medicine, was facilitated by the use of its Affinity. If in some way, I found that there was an excess of Hydrogen, all I had to do was to use the Oxygen, its Affinity, to combine or neutralize. Hydrogen being on the RED and OXYGEN being on the Blue, to nullify excess of Hydrogen I used the Blue and the results were precisely what was expected.

I analyzed the entire gamut of Drugs in the Pharmacopoeia and determined the positions of the Drugs by their Chemical Elements. Instead of giving to the sick the crude Drug or Medicine, I irradiated the Sufferer with the indicated Attuned Color Wave and the Disorder disappeared.

I took then my final step—the step which sealed the doom of the Medical Racket.

SPECTRO-CHROME...IN EVERY HOME

Truth Is Stranger Than Fiction

SPECTRO-CHROME

The Marvel Of The Twentieth Century

Removes Medicine From The Home

LET OTHERS TALK FOR US

EXCERPTS OF AFFIDAVITS

K. B., of Buffalo, N. Y.:—"I was afflicted with a partial paralysis of the right side of my face...I took tonations known as Spectro-Chrome...after about seven treatments the trouble all cleared up."

N. S. H., Dental Surgeon, of New York, N. Y.: "I bought a Spectro-Chrome...the benefits so astonished me...first case was an advanced case of tuberculosis which pulled through...I have been using this method with great success. In my dental cases it proved to be superior to other methods. For pyorrhea, facial neuralgia, post-operative pains and all mouth diseases it can not be beaten."

B. N. H., of Brooklyn, N. Y.:—"1926 I suffered a very severe heart attack that kept me in bed the better part of almost ten months. A subsequent attack three months later kept me confined to my bed for about two months. I was in terrible shape and had very little hope of ultimate recovery. In fact the medical doctors gave my wife very little encouragement, so little that she had never dreamt of my going back to business...I was advised of Spectro-Chrome...I am very happy to be able to state that I am almost like a new man...I believe the Spectro-Chrome treatments have been short of miraculous."

La R. J., of Tonawanda, N. Y.:—"R. J. of 15, has found Spectro-Chrome to be a God-send to him. The doctors in Bradford, Penn., told his parents he was tubercular and took him out of school. He was in bed...Now he is a different boy. He has had seven treatments...goes for long walks...Spectro-Chrome is wonderful."

ARTICLE 32

REMEDIES IN SPECTRO-CHROME

The Medical Doctors in their arrogance as alleged superior Human Beings, looked down on Practitioners of other Systems of Healing, with visible contempt, which in many cases appeared perhaps passably justified. They boldly enunciated, that their system of giving Pills, Potions, Pellets and Poisons, having withstood the test of time 6,000 years, not having been superseded by any serious competitor, was a decree of God and gave them the position of Healing Angels. Out came SPECTRO-CHROME METRY in 1920 and proclaimed with one voice the death-knell of their entire money-making, Health-racking, quassi-scientific structure. The doom of Medicine was sealed by the determination and establishment of the Attributes of Attuned Color Waves in SPECTRO-CHROME METRY. That one single Table of Characteristics, was the result of nearly three decades of my study and Research. It will interest you to learn it. The Table of Attributes supplants ALL DRUGS AND MEDICINAL REMEDIES, without any of its handicaps. Finding the specific effects on the Human Physiology, of specific divisions of the Chromatic Spectrum, I determined and established the exact potentiality, producing the preciseness for which SPECTRO-CHROME METRY stands.

SPECTRO-CHROME TONATION SYSTEM

RED:—Sensory Stimulant, Liver Energizer, Irritant, Vesicant, Pustulant, Rubefacient, Caustic, Hemoglobin Builder.

ORANGE:—Respiratory Stimulant, Parathyroid Depressant, Thyroid Energizer, Antispasmodic, Galactagogue, Antirachitic, Emetic, Carminative, Stomachic, Aromatic, Lung Builder.

YELLOW:—Motor Stimulant, Alimentary Tract Energizer, Lymphatic Activator, Splenic Depressant, Digestant, Cathartic, Cholagogue, Anthelmintic, Nerve Builder.

LEMON:—Cerebral Stimulant, Thymus Activator, Antacid, Chronic Alterative, Antiscorbutic, Laxative, Expectorant, Bone Builder.

GREEN:—Pituitary Stimulant, Disinfectant, Purificatory, Antiseptic, Germicide, Bactericide, Detergent, Muscle and Tissue Builder.

TURQUOISE:—Cerebral Depressant, Acute Alterative, Acid, Tonic, Skin Builder.

BLUE:—Antipruritic, Diaphoretic, Febrifuge, Counter-Irritant, Anodyne, Demulcent, Vitality Builder.

INDIGO:—Parathyroid Stimulant, Thyroid Depressant, Respiratory Depressant, Astringent, Sedative, Pain Reliever, Hemostatic, Inspissator, Phagocyte Builder.

VIOLET:—Splenic Stimulant, Cardiac Depressant, Lymphatic Depressant, Motor Depressant, Leucocyte Builder.

PURPLE:—Venous Stimulant, Renal Depressant, Antimalarial, Vasodilator, Anaphrodisiac, Narcotic, Hypnotic, Antipyretic, Analgesic, Sex Builder In Supernormal.

MAGENTA:—Suprarenal Stimulant. Cardiac Energizer, Diuretic, Emotional Equilibrator, Auric Builder.

SCARLET:—Arterial Stimulant, Renal Energizer, Genital Excitant, Aphrodisiac, Emmenagogue, Vasoconstrictor, Echolic, Sex Builder In Subnormal.

These various characteristics are utilized in the Normalation of all Human Disorders and thus whatever I found was needed in a sick person, instead of the crude Drug, I used that particular Attuned Color Wave and the results in precision far surpassed all healing expectations. Now the question comes of finding what Color should be used. In the next issue I shall begin to explain by what logical sense of reasoning I completely abolished all Differential Diagnosis, as well as the naming of all Disorders, setting another new pace in Healing.

Spectro-Chrome Does All That Medicines Claim To Do And Much They Can Not Do

**INSTALL A SPECTRO-CHROME IN YOUR HOME
AND BID GOOD-BYE TO THE MEDICAL DOCTOR**

**Spectro-Chrome Is The Most Effective Health
Protection And Health Insurance**

PLUG YOUR HEALTH FROM THE ELECTRIC LIGHT SOCKET!

Spectro-Chrome For The Whole Family

Spectro-Chrome can be used by everyone in the family. Women find it of great help in overcoming their illnesses. It is also highly beneficial for children in maladies common to them.

Results Achieved With Spectro-Chrome

The best proof of the efficacy of Spectro-Chrome is the recommendation of Spectro-Chrome users. Thousands of Spectro-Chromes have been in use throughout the United States for the past 18 years. Some of the results have been so astounding and near-miraculous that they seem to be well nigh incredible.

Paralyzed Boy Improving

Colonel Dinshah P. Ghadiali
c/o Spectro-Chrome Institute
Malaga, New Jersey:

I am happy to advise you that my son Kenneth is improving gradually and I am anxiously looking forward to the time when he will be able to walk and get about like other normal children.

His improvement has exceeded my expectations. A thousand thanks to the merits of Spectro-Chrome Metry.

I have had some interesting and astonishing results from the use of my equipment during the past year and would not under any circumstances be without it. I can not speak too highly of this wonderful discovery and those whom I have interested in it are also very enthusiastic and report satisfactory results.

Looking forward to the time when I can clasp your hand and thank you personally, I wish to remain,

Yours very truly,

(Signed) FRANK S. BURNS,

Superintendent of Shops,

MILWAUKEE GAS LIGHT COMPANY.

ARTICLE 33

ONE REMEDY FOR 389 DISORDERS!

If there be any one matter by which the Medical Profession impressed their clients about the tremendous erudition necessary to become a Medical Doctor, it is the subject known as "Diagnosis" or finding what a certain Disorder is. To have the whole appear more scientific and more "magical," each so-called different Disorder is baptized with an individual name, derived from Latin, Greek or some such bombastic language. They tell a sick person, "you have 'Acute Rhinitis,'" but will not say, "you have Common Cold." They will tell a Sufferer, "you have Trichodophlebitis," instead of "you have inflammation of Capillary Veins" and the hapless individual gasps that (he or she) has some terrible Disorder, which of course only his (or her) big and famous Dr. Blank Milksop can remedy—of course for a sizeable fee. The fee is the main part in Diagnosis.

Having practised Medicine for decades, seen through the "Tricks of the Trade" and regretted the commercialization of this sacred and noble art, I went right to the bottom of the whole pseudo-science and finally succeeded in exploding the entire theory of "Differential Diagnosis." In my Spectro-Chrome system, all names of Disorders are totally abolished, simplifying the so-called "finding" process and therein lies the beauty of the Science.

I found that Nature has only ONE weapon for maintaining Health and that is BLOOD. All the waste matter is swept OUT through the Blood Circulation and all the reparation is performed through the Blood Circulation. The purity of the Blood was thus essential, a fact I utilized in the use of proper food, discarding certain time-honored views. I studied the ancient idea of **Rubor, Calor, Tumor, Dolor** or **Redness, Heat, Swelling, Pain** and found it to be precisely true. All illness is repaired by the Blood, hence, the **First Signal** of sickness will be the rush of Blood to the disordered Area, giving it the **Redness of Blood**. As more Blood enters there, it naturally will raise the Temperature in the Area, which through the process of Circulation will eventually appear as **Heat** all over the Body. That **Heat** is the **Second Signal** of the Disorder. Further on, as the vessels in the affected Area may become engorged with the excess of Blood, a **Swelling** appears, which is the **Tumor**, the **Third Signal**. Finally, if the Disorder continues, the extra pressure within the Blood Vessels causes the appearance of **Pain**, the **Fourth Signal**. In this manner, Nature continues her warnings, asking for reparation by giving the **Signals**, which if duly interpreted and attended, may mean the difference between Health and Sickness or even Life and Death.

The Medical Doctors and their cohorts have the wrong idea of tackling Disorders. They find a person howling with **Pain**; the first move they make is to shoot Morphine and relieve (?) the **Pain**. This is harmful, because that "relief" of **Pain** is caused by paralyzing the Brain and weakening the Heart, the very organs essential toward ultimate recovery. Surely, such procedure impresses the Sufferer about the Healer's skill, but angers the God within, because the Morphine will NOT remove the cause. Spectro-Chrome Metry has precise methods and goes direct to the root of the trouble. Spectro-Chrome obeys Nature and gets Her help.

In all cases of recent illness, no matter what Area be affected, I found that the restorative process of Nature was through what is known as "Inflammations" and all Inflammations have more or less of the **Four Signals of Rubor, Calor, Tumor, Dolor—Redness, Heat, Swelling, Pain.** As Temperature rise is Fever, I reasoned that Fever is a friend of the sick and not a foe. Fever is caused—all Fevers are caused—by excess of the Chemical Elements **Hydrogen** and **Carbon**, characterized in Spectro-Chrome Metry by the **Red and Yellow Attuned Color Waves.** To eliminate those Elements, **Oxygen** is necessary and that is in accordance with what Nature does. In Fever, the Respiration does increase, giving a larger intake of **Oxygen**, which converts the **Hydrogen** into Water (H_2O) and the **Carbon** into **Carbon Dioxide** or **Carbonic Acid Gas** (CO_2), both of which are excreted. This continues until the Fever leaves, which means the Inflammation subsides.

Here is the difference between the ancient, moth-eaten, injurious methods and the safe Spectro-Chrome Metry. The Medical Doctors name 176 Fevers by 176 different names and distinguish among 213 Inflammations by 213 jawbreaking names. In Spectro-Chrome Metry, I uncovered the original CAUSE and removed it by neutralization through its AFFINITY. I found the troublemakers to be the **Hydrogen** and the **Carbon** and burnt them out by the irradiation of the **Oxygen**, which I produced through the single Attuned Color Wave of Blue.

Just think! Why does the Medical Orthodoxy fight me so bitterly? Because, with a single blow, I dumped into the junk-heap all their dogmas of 176 Fevers and 213 Inflammations and with 1 Blue Attuned Color Wave gave to the sick the potent and effective remedy in Spectro-Chrome. It never fails and should it fail, no Medical Doctor can be of further service—the Master of the Funeral Parlor enters to remove the testimony of ignorance and pseudo-scientific charlatantry.

The Day Of The Medical Doctor

In The Family Is Over!

SPECTRO-CHROME

THE MARVEL OF THE TWENTIETH CENTURY

The Science Of Automatic Precision Having

No Diagnosis—No Drugs

No Manipulation—No Surgery

Spectro-Chrome Metry meets all the requirements of a complete scientific Healing System based on unchangeable principles. It uses no Diagnosis, Drugs or Manipulation and outside of purely surgical cases of constructive or reparative character, it discards all Destructive Surgery wherein vital organs are removed. It is applicable to all human ailments, with an Automatic Precision not attained by any other method.

The System of Spectro-Chrome Metry is completely independent of human calculations or Diagnosis. Regardless of the nature of the illness, the Attuned Color Waves produced by Spectro-Chrome Equipment act always in a manner mathematically precise, predetermined and fixed. There is no possibility of error.

It is so perfect in its Fundamental Principles that no harm can result regardless of which Attuned Color Waves be used.

Spectro-Chrome Metry has been in successful use by progressive Medical Doctors and other Healers as well as the general public for over 18 years. It is the result of over 30 years of laborious scientific research. Its Fundamental Principles are so sound and mathematically accurate that since its origination Spectro-Chrome has not been changed or altered.

Friday, August 12, 1938

ARTICLE 34

SMOKE SCREEN OF MEDICAL NAMES

Under 176 different names, the medical system included 176 different types of Fevers and tried to prescribe 176 different methods for their removal. Under 213 different names, the Medical System included 213 different types of Inflammations of different Organs and parts of the Body and endeavored to give 213 different methods for their removal. Think of the varieties by which they grouped just these 213 Inflammations:—Acute, Adhesive, Atrophic, Catarrhal, Chronic, Croupous, Diffuse, Disseminated, Exudative, Fibrinous, Focal, Follicular, Gouty, Granulomatous, Hyperplastic, Interstitial, Irritable, Leukocytal, Metastatic, Necrotic, Obliterative, Parenchymatous, Plastic, Productive, Proliferous, Reactive, Rheumatic, Seroplastic, Serous, Simple, Specific, Suppurative, Toxic, Traumatic, Unhealthy and so on. Where in the name of common sense is the necessity for such jargon? An Inflammation IS an Inflammation. Its medical name has the termination ITIS, which means Inflammation. What difference does it make in the Body Element Chemistry, whether the Inflammation is in the Liver and one calls it HEPAT—ITIS or is in the Spleen and one calls it SPLEN—ITIS? Whether the Inflammation is in the Abdominal Sac and one calls it PERITON—ITIS or is in the Elbow Joint and one calls it OLECRAN—ARTHR—ITIS? We do not remedy the name, we have to remedy the condition and that in all the enumerated cases of the Disorder is caused by the excess of Hydrogen and Carbon in the cells, which can be easily removed by the Affinity of Oxygen.

In a similar manner, the Medical System enumerates and differentiates 19 types of Blindness, 12 types of Odor Disorders in 4 groups, 10 types of Taste Disorders, 25 types of Deafness, 33 types of Tactile Sensation Disorders, 62 types of Anaemia, 32 types of Pneumonia, 19 types of Goitre, 107 types of Paralysis in 26 groups, 255 differentiations of Muscular Disorders and 12 types of Melancholia. This Disorder of Melancholia, is diversified by fancy names like Paranoia, Dementia Praecox, Imbecility, Senility, Psychosis, Paresis, Catalonia, Illusion, Hallucination, Delusion, Obsession, Degeneracy, Monomania, Erotomania, Pyromania, Kleptomania, Dipsomania, Oniomania, Perversion, Inversion, Neurasthenia, Idiocy and other so-called Disorders, known to them by names in which they can do nothing, because they know less.

Then, they have 30 types of Round worms, 20 types of Tape Worms, 48 types of Cancers, 71 types of Skin Disorders, 8 types of Childhood Disorders, 17 types of Heart Disorders, endless types of Venereal Disorders, n type raised to the n th power of Infections, Strokes, Nervousnesses, Boils, Abscesses, Furuncles, Carbuncles, Fractures, Inclinations, Declinations, Curvatures, Luxations, Subluxations, Impingements, Recurrences, Protuberances, Umboes, Umbras and the whatnots. God made Man in His own single Image, but, Medical Doctors make man's Disorders by names galore to suit themselves? God made Light in only 7 Colors, containing the entire Chemistry needed for the manufacture of the whole bodily structure, but, the Medical Doctors improved on His work by using over 5,500 official Drugs in the Pharmacopoeia and countless unofficial Drugs. Not satisfied with the use of mineral, vegetable and animal substances as supposed Remedies, they started the free use of all kinds of effete matters like Vaccines, Serums and Biological Products, also introducing into the Human Being, Blood, Faeces, Urine, Pus, Germs, Worms, Menstruation and all manners of Extracts of Animal Glands as "cures." Furthermore, there are over 50,000 "Patent Medicines" registered in the Patent Office of the United States Of America, not counting those prevalent in other parts of the World. Surely! The man who can "Diagnose" accurately the drawback in each Area and Sub-Area of the Body, prescribe the exact Drug and produce the "cure," must be a superhuman, supernatural, superphysical entity indeed! This would be especially true as God fixed no meters on us to measure directly the excess or want of certain of the Body Chemical Elements in sickness, giving to the Healing Profession a marvelous opportunity of allegedly serving the public, but, in actuality soaking them to death, by guesswork with Hit-or-Miss methods.

What is Spectro-Chrome Metry fighting? It is not a system or profession that Spectro-Chrome is fighting; it is not the Medical Doctors and their Associations that Spectro-Chrome is fighting. It is fighting slowly but surely, steadily and successfully, the most monstrous Trust, whose investments of approximately \$50,000,000,000.00 in value, are controlled through the gambling houses of Wall Street, New York. It is a fight to the finish. The eventual victor will be——? SPECTRO-CHROME—IN EVERY HOME! Time will tell its own story.

Friday, August 19, 1939

TO THE WORLD

AN OPEN CHALLENGE

1. That the claims of Spectro-Chrome are absolutely genuine, is substantiated by the authentic Records, Sworn Affidavits and the like in our possession. They may be inspected by any responsible person by appointment.

2. The merits of Spectro-Chrome are incapable of challenge by any person studying it. Its Truth, Precision and Efficacy went with flying Colors, in 1931, even through the acid test of the Supreme Court of the State of New York, where its Originator, fighting his case for himself, without a lawyer, won a unanimous verdict of acquittal from the Jury by proving the Science with experiments and demonstrations, in open court against an array of University Professors—Spectro-Chrome Metry IS established for all time.

ARTICLE 35

MEDICAL HUMBUG OF GLAND THERAPY

Glands are Organs in the Body, which secrete (of course from the Blood) certain materials which they pour out upon surfaces or into cavities. Those Glands which mostly pour their secretions somewhere, are the ones with which we are not here concerned, but, those Glands which do not pour their secretions outwards and whose secretions are mostly directly absorbed into the Blood, are the ones we shall mainly consider. These latter Glands are technically called the "Ductless Glands" or the "Internal Secretion Glands," because, the materials which they take from the Blood, are converted by them into different Chemicalized Essences and without being directly discharged extraneously, are

introduced into the Blood Stream, whence they act upon distal Organs, the same as Drugs. These potent Essences are called "Hormones" when their characteristics are stimulative and "Chalones" when their attributes are antagonistic or inhibitive. The Hormones are also styled "Autacoids" and their influence through the Circulatory System is capable of producing powerful effects upon various other Organs, the chain of such active Internal Secretion Organs being known as the "Endocrine System."

The most important Ductless Gland is the Spleen on the left side, between the Diaphragm and the Stomach, in the upper part of the Abdominal Cavity. This is the one Organ about which Medical Doctors know next to nothing, as its functions are admittedly hypothetical. My Researches proved its main function as the inlet of Light into the Body, a subject which is much too complicated to discuss in a short Article. The next important Organ is the Liver, lying beneath the Diaphragm, on the right and upper part of the pit of the Stomach. This organ not only secretes and passes the Bile, but, acts also as a Ductless Gland. In physiological fact, all Tissues produce certain secretions of their own from the Blood and return them in changed chemical form to the Blood. Then, we may enumerate as the important Endocrine Glands the Pituitary and the Pineal in the Brain, the 2 Thyroid and the 4 Parathyroid in the neck, the 2 Thymus in the chest, the Pancreas behind the Stomach, the 2 Suprarenal or Adrenal on the Kidneys, the 2 Ovarian in the female and the 2 Testes in the male. There are others too.

The racket of Gland Therapy started early in this century and numerous were the theories adduced to support its stupid claims. It gained wide publicity when a Chicago multimillionaire of 60 years, worn out by sexual excesses, wished to marry a well-built, known singer of less than 40. Realizing his physical inability, he applied to a Specialist Chicago Surgeon for help. That Medical Doctor promised to perform what he desired and recommended the insertion of Monkey Interstitial Glands, emphasizing the power of such operation to restore him to full vigor for more monkeyshines. Many thousand dollars were paid for the service, the medical papers extolled the Surgery and Gland Therapy to the sixteenth sky, the multimillionaire married the singer, the singer got her millions from the old fellow, but, somehow the baboon refused to function within the multimillionaire and a divorce was the eventual result.

The theory was promulgated, that because certain Disorders were the outcome of the defective activities of certain Glands, the secretions of those Glands introduced into Humans, through extraneous channels, would remove the Disorders. That would mean, if the Thyroid be not proper, feed Thyroid and so on. In their haste to help the sick public (and thus incidentally the hungry pockets of the syndicates exploiting the manufacture of the junk), the Medical Doctors forgot that no single Gland operates by and for itself, but, all act like an entire chain or Board of Directors, for the benefit of the whole organic structure. The humbug, however, progressed steadily and the imposition on public credulity by high pressure salesmanship and the support of controlled newspapers and periodicals expanded, until as I write, the whole theory

went beyond all bounds. Not satisfied with administering individual Powders and Extracts of animal Liver, Spleen, Ovary, Uterus, Brain, Thyroid, Thymus, Pituitary and even Menstruation, the makers of these detestable concoctions started to manufacture and sell products from actual Human Afterbirths (Placentas), collected from women in childbirth in the various Maternity Hospitals! I have in my possession, sent to me by mail as a "Physician's Sample," a tablet product made by a reputed Eastern medical firm containing the Extract of the Pituitary, Thyroid, Ovary and Testes combined! It might be taken for granted (just as an understanding), that some boob Americans for want of Brain and Lung, might utilize the Pituitary and Thyroid from sheep, but, it might not be as quickly accepted that such Americans also are Hermaphrodites and might need the Extracts of both the Female and the Male Genital Organs in the same pill to increase virility! ! !

Such is this miraculous Gland Therapy. Instead of making for a clean life by living in a proper manner as Nature intended, the Medical Doctors are permitting the sick to do as they please, by advocating animal foods, animal concoctions and animal remedies for animal purposes, then trying their best to make them "healthy" (?) by pumping into them also unscientific, worthless products, in the name of "the latest discoveries." We call ourselves the "Image Of God"—God would feel ashamed and disgraced if He made us as the Medical Doctors are making of us and it is my firm belief that unless the suffering public itself voices its repugnance against such unholy, filthy, revolting practices, our coming generations will have to give a terribly bitter accounting to the Creator.

I voice in all sincerity, what my Scientific Researches proved to me as the sole solution, that the intelligent public must organize to investigate for itself and join me in the slogan: **DOWN WITH THE MEDICAL TRUST—SPECTRO-CHROME IN EVERY HOME.**

Friday, August 26, 1938

American Medical Association CHALLENGED BY DINSHAH

Being repeatedly and unfairly reviled by the American Medical Association, through its Journal and its henchmen, the Originator of Spectro-Chrome Metry challenged in writing the American Medical Association on February 4, 1924 and asked for open investigation. The challenge was not accepted.

On June 2, 1924, Dinshah telegraphed the Executive Council of the American Medical Association, again challenging that Organization and asked for open investigation. **The challenge was not accepted.**

In September, 1934, Dinshah printed in his magazine **SPECTRO-CHROME** and sent in writing, an **Open Challenge** to the American Medical Association asking for debate before the public. He hired the Milwaukee Auditorium, from November 8, 1934 to November 10, 1934 and offered the following Penalty to his opponents:—

PENALTY

IF YOU WIN, I AM WILLING AND READY TO PRESENT TO YOU ALL MY INVENTIONS, PATENTS, COPYRIGHTS, TRADE MARKS, BUSINESS, PRINTING PLANT, PROCESSES FOR MANUFACTURE — EVERYTHING I HAVE, INCLUDING MY ENTIRE SPECTRO-CHROME INSTITUTE AND ALL ITS BELONGINGS, GIVE YOU AN ABJECT UNCONDITIONAL APOLOGY AND FOREVER RETIRE, LEAVING THIS COUNTRY NEVER TO RETURN.

He appeared on the dates appointed before an audience of over 1,000 persons, in Milwaukee, Wisconsin, who were mostly owners and users of Spectro-Chrome Equipments; no opponent appeared to answer his challenge and a unanimous resolution was passed by the audience that having failed to appear, the American Medical Association had branded itself as a Liar and Coward.

SPECTRO-CHROME METRY will stay as the greatest Healing Science as long as the Sun, Moon and Earth last!

Friday, August 26, 1938

SPECTRO-CHROME METRY
The Science Of Automatic Precision

ARTICLE 36

MEDICAL HUMBUG OF DIABETES AND INSULIN

The rule and grip of the practice of Medicine lies in the domain of "Fear". If you want to weaken the power and energy of a strong person, instill in his mind some Fear and the doom is sealed. At each step, the person will be haunted by the Fear as by a Devil incarnate and make life so miserable, that soon the very mental and vital activities will be vitiated and the personality of the individual will become a physical wreck. These Fear tactics are acknowledged by and well known to all Physicians and Surgeons and in the exercise of their commercialized art, they use this doctrine of Fear with exquisite and well-aimed adroitness. Whenever, a group of Medical Doctors finds its purses declining in weight, a Fear of some Tumor, Cancer, Germ or something else is started in the receptive minds of the Sufferers and a new river of gold commences to flow. All new-fangled alleged Remedies are dumped into the market through similar methods, Fear performing the chief part. It is by such tactics that Sugar Diabetes, with its ridiculous humbug of Insulin produced from the Pancreatic Glands of dogs, rabbits, sheep and slaughter house animals, commenced around 1924.

Diabetes is defined by the famous Dr. Sir William Osler as one in which the form of Sugar eliminated in the urine is Grape Sugar and it must be eliminated for weeks, months and years; also that such Elimination should take place after the ingestion of moderate amounts of Carbo-Hydrates. Thus, it would take a long time to decide with certainty that the sick one has the dreaded Diabetes Mellitus and perhaps he might be six feet under the ground, before such decision may be fixed.

Under the false idea that Sugar in urine is Diabetes, the Medical Doctors stop the eating of Starches and Sugars by the Sufferer. The hapless person is put on a severe "Diet" and Life becomes a live hell for the sick. To start the alleged "cure," Dr. Frederick G. Banting of Toronto, Canada, was endorsed by the American Medical Association as the savior of the diabetic and his Insulin, known as a Drug since 1911, was introduced in Medicine as the specific with the fanfare of "One Shot—Total Cure!" The coveted \$40,000.00 Nobel Prize was awarded and the gold river started to flow through the sale of units of Insulin. Then, when no good ensued, it was asserted that "further research showed, the effect of Insulin wore off in 6 months," therefore, every 6 months another Shot was to be given. Soon "it was found on wide experiment, that the Insulin was needed more frequently to maintain the metabolism," hence the dose was to be repeated monthly. On the final show-down, today, the unfortunate individuals, in the hands of the Medical Trust have to take 2 or 3 Shots a day to maintain the "cure!"

Insulin did NOT lessen Diabetes. Here is the Death Rate, according to the United States Bureau Of The Census, the deaths being per 100,000 of the population. In 1912 the rate was 15.0; in 1924, it was 16.4; but, on the introduction of Insulin, the Death Rate was this:—1925, 16.09—1926, 18.0—1927, 17.5—1928, 19.0—1929, 18.8—1930, 19.0—1931, 20.4—1932, 22.0—1933, 21.3—1934, 22.1 and so on. Surely, the veriest layman may judge for himself, about the worthlessness of the Insulin, a pure medical racket.

Passing Sugar in urine is NOT Diabetes. Under fatigue, mental strain, financial worry, disappointment in love, digestive and assimilative lymphatic disturbance, Sugar may be found in the urine of even a normal and healthy person. Furthermore, one must understand that in Diabetes, Sugar Elimination does not really mean the person has MORE Sugar hence it passes out, but, in fact has LESS Sugar through Carbo-Hydrate depletion and thus NEEDS to eat Sugar! This is actually how the Spectro-Chrome method feeds the sick with Starches and Sugars, WITHOUT any restrictive diet and recovery is the invariable result.

The whole misunderstanding in this phenomenon, is in the medical ignorance about the Laws regulating Polarized Light and the Rotation of the Axis of Light by certain crystals. All Starches and Sugars ingested, are taken by the Liver and stored therein in the form of a certain Chemical known as Animal Starch or Glycogen (H10 C6 O5). When the call for Energy comes, this Glycogen breaks into other Sugars (Hexoses with 6 Atoms of Carbon), chief among which are Grape Sugar or Dextrose and Fruit Sugar or Levulose. The Chemical Formula of both these Monosaccharides is the same H12 C6 O6, but the Dextrose turns the beam of Polarized Light to the Right, while the Levulose turns it to the Left. The Levulose is taken into and consumed by the Tissues, but the Dextrose in Diabetes is not assimilated and escapes into the Urine. Therefore, when the Medical Doctor stops ALL Starches and Sugars in the food of the diabetic sufferer, he is stopping the activities of BOTH the Levulose and the Dextrose and without the Carbo-Hydrates of the Sugar, the Lungs which function through the Carbon and the Hydrogen become defective in oxidation. Coma occurs and the poor sufferer eventually dies of Carbo-Hydrate starvation.

The ignorance, greed and resistance to the investigation of my Spectro-Chrome and its Fundamental Principles is taking the toll of the confiding public. Yet, to me there is at least one great satisfaction, that since 1920 I promulgated my original Science, some Medical Doctors and Hospitals are using some Sugar in Diabetes. They are waking to the Truth. The sole salvation of Diabetics is Spectro-Chrome. To them I openly say, "Eject the Medical Doctor from your home and turn right to Spectro-Chrome for a happy life and no restriction for eating candy!"

Friday, September 2 1925

HERE IS A PROOF THAT

American Medical Association

IS A VICIOUS TRUST AND MUST BE DISSOLVED

Spectro-Chrome was introduced in the Woman's Hospital in Philadelphia, Pennsylvania most successfully in 1921 and several apparati were in daily use there, producing marvelous and near-miraculous results, as the following sworn Affidavit of the Senior Surgeon of the Hospital will show. However, the noble Surgeon was told by the American Medical Association to remove the Spectro-Chromes from the Hospital and having refused, pressure was brought on the Board Of Managers, so the Chief Surgeon resigned, taking her apparati with her. Here is her Testimonial which she later confirmed in the Supreme Court of the State of New York, at Buffalo, New York.

TO WHOM IT MAY CONCERN:

I, Kate W. Baldwin, M. D., Fellow American College Of Surgeons, Fellow American Academy Of Ophthalmology and Otolaryngology, Fellow American Medical Association, do under oath make the following statements, as to the efficiency of Spectro-Chrome as a therapeutic measure, far surpassing any and all other methods of which I have any knowledge.

The following is a partial list of conditions, treated to the satisfaction of the patients, nearly all having tried many other things before asking help from me.

I may commence at the head and cover practically every part of the body. Ordinary inflammatory conditions of the eye, Cataracts, Glaucoma, Hemorrhage into the retina and sclera, Infection of the sinuses (Acute and Chronic) some with complete aphonia, Bronchitis, Pneumonia, Pleurisy, Tuberculosis in advanced cases as shown by clinical symptoms and X-Ray, Heart conditions (functional and organic), Aneurism of the abdominal aorta, Acute Indigestion and Ulcers of the stomach, Asthma and Hay Fever, Hiccough that had for ten days resisted all classical methods cured in less than one day. All sorts of Infections (local and systemic), Carbuncles and Abscesses, Jaundice, Kidney conditions including suppression for 48 hours, Appendicitis, Hemorrhage from the lungs, stomach and pelvic organs, Strangulated hernia, Hemorrhoids and many other conditions, but, it seems unnecessary to mention any more.

All surgical cases do better if Spectro-Chrome is given before and after operation. The anesthetic is more quietly taken and recovered from if Spectro-Chrome is given.

I WOULD CLOSE MY OFFICE TODAY, NEVER TO REOPEN,
IF I COULD NOT USE SPECTRO-CHROME.

(Signed and Sworn before a Notary Public)

ARTICLE 37

MEDICAL HUMBUG OF TUBERCULOSIS

Of medical nonsenses which in their days intrigued the public, the Germ Theory and treatment of Tuberculosis of the Lungs, scientifically known by the cognomen of Tubercular Phthisis and commonly called Consumption, take the lead. The Medical Doctors know the monetary Human Psychology and well comprehend the weak spots in human character. Hence, they press on the switch buttons of human credulity and faith, when they want people to gulp some pet theory, which may eventually in some way or other fill the pockets of the Healing fraternity.

Robert Koch, a Medical Doctor of Gottingen and practising Physician in Wollstein, Germany, started the boom of "Tuberculin" around 1890. At that time, he occupied a chair as Professor in the Berlin University. In 1901, in London, England, at the Tuberculosis Congress, he expounded the theory regarding the "Germ" of Tuberculosis and in 1905 won the coveted Nobel Prize. His theory was simple enough and appealed to the imagination. According to it in short, a type of devilish "Germ" called "Mycobacterium Tuberculosis" was eating the Lungs in this Disorder. If this Germ be killed by the production in the Body of certain Germ-Killers, the Sufferer is saved, otherwise fatality results. In Tuberculosis, the Body fails to produce the Germ-Killers, so the Sufferer succumbs. Based upon this idea, Robert Koch introduced the Tuberculin, which went along very profitably for some time, but, fell into disrepute. Today, much of his original work is discredited and the system in vogue is the Toxin-Antitoxin system, which is another substitute for the original failure. In this method, it is assumed that the Germs produce certain Toxins or Albuminous Poisons, which ruin the Health of the Sufferer. To counteract these terrors, the Human Body must produce certain "Antitoxins" or Poison Antidotes. If these proper Antitoxins are produced all is well; if not, the Sufferer must make his will. To combat such an unpleasant contingency, the Bacteriologists designed a weapon. If the Body will not shoulder its responsibility, let someone else shoulder it for the Body! So here is the outline of that process in "Bugology"! I ought to have said "Bughouseology"! Take some Blood from the Sufferer and inject it into the veins of a horse. The horse will get those Microbes, so his Blood will start producing the Antitoxins to kill them. When that has supposedly occurred, draw some Blood from the horse and shoot that or the Serum into the Sufferer. The Horse Antitoxin thus is ready made, will stun the Germs in the Human and the Sufferer should recover—or be covered by six feet of earth.

I shattered this biological imposition years ago. The Blood Corpuscles of the Human and the Horse are structurally different. I found and expounded that Germs are NOT THE CAUSES of Disorders, but are the products or THE RESULTS of the existence of those Disorders or conditions. They (Germs) are just SIGNALS of the peculiar Pathological Syndrome (Train Of Symptoms). The Truth took me many years to research, but I finally found the actual cause of Tuberculosis and also thereby its most potent remedy.

I found that the Parenchyma (Essential Functioning Elements) of the Lungs is built with a minute quantity of Copper. The Lungs are composed of three sets of vessels: The Arterial which bring in the Blood from the Heart for purification, the Bronchial which admit the Air for such purpose and the Veinous which carry the aerated Blood to the Heart. When, therefore, the Copper Element diminishes and the wall of the Lung breaks down because of it, a vessel or vessels being damaged, Hemorrhage (Bleeding) through the mouth occurs and a visible stage of Pulmonary Phthisis is said to have set in. Nature intervenes to cement the cavities by filling Calcium, the major Element of Lime. If that compensates the destruction of the Copper proportionately, recovery takes place. The febrile condition indicates the existence of the inflammatory process. Those three make the main general Syndrome of Tuberculosis. I solved the whole problem at one stroke by Spectrum Analysis. I found that among other Chemical Elements, Copper and Calcium both appeared on the Orange Color of the Spectral Division. Furthermore, the Chemical Element Arsenic, used extensively in Medicine for such Fevers, also was on the same position. By using the Orange Attuned Color Wave in Spectro-Chrome Metry, I produced results in Consumption surpassing in precision and effectiveness any other method. Thirty-five years ago, Medical Doctors gave me six months to live, because they declared I had Tuberculosis. I am still here working eighteen hours and more a day and those who hear me on the platform will bear testimony to the power of my Lungs! Medicine for Tuberculosis is a failure; the day of Spectro-Chrome is come.

A MIRACLE PERFORMED!

Helpless Girl Walked In Four Days

Two years ago one of my daughters, Lucille, then 21 years old, began to lose weight and developed a cough.

A local Medical Doctor gave her medicine, but her condition grew worse. X-Ray examination declared her as having Tuberculosis of the left lung. Months later she developed a severe pain in the lowest part of her spine; Medical Doctors here declared it was from an ulcerated tooth and had the tooth extracted. That did not do any good so they scraped the jaw bone. As the pain in the back grew worse she was taken to a local Chiropractor who treated her for about six months but her condition steadily became worse.

She was then given Fume Baths, but it did not help. I then took her to a Specialist who gave her a thorough examination and said that the lowest part of her spine should be operated upon; before I could get her in shape for the operation, Dropsy developed and I took her to another Medical Doctor who declared after examining her with X-Rays that her spine was all right, but her lungs were in bad shape.

Lucille lay a helpless invalid in bed for about seven months, flat on her back, without even turning on either side. Finally the Medical Doctors said that she was beyond medical aid and nothing could be done and that her heart was so bad that she should not even be moved from the house elsewhere.

Two weeks ago when Colonel Dinshah the President of Spectro-Chrome Institute came to lecture here, I attended his discourses and requested him to see Lucille. He stated that if she were brought to his lecture room he would be glad to give his services. I took the risk of moving Lucille in a Wappner Invalid Coach. As soon as Colonel Dinshah saw Lucille he told me that she could be made to leave her bed in about four days if she were given Spectro-Chrome according to his instructions; so the next day I took a room in the Gardner Apartments and moved Lucille there and here is what Spectro-Chrome did to my daughter.

Within 24 hours, Lucille could turn around in her bed, and began to eat with a good appetite. In two days more she left the bed and began to walk herself in the room and in less than five days her natural functions, which were formerly possible only by artificial means, were completely restored and she was able to dress and take care of herself.

I publish this with gratitude in my heart for the man who did this without taking a single dollar from me. Spectro-Chrome saved my daughter in one week when all the other methods failed and gave up hopes.

The Medical Doctors had said that nothing short of a miracle could save Lucille. I feel justified in saying that the Miracle is performed and may God Bless The Man Who Did It - - - Colonel Dinshah and his Spectro-Chrome. No words of thanks can express what I feel in my heart for what was done for my family by him.

ARTICLE 38

MEDICAL HUMBUG OF HEART DISORDERS

Science can not talk with a double tongue. Science teaches and the teaching is true, that no Motion may occur without expenditure of Energy. Yet, when it comes to the Heart, Medical Doctors, in the name of Science do not hesitate to assert that our Heart is an Automatic Blood Pump, which runs by itself! Were one to study the power of this wonderfully constructed Muscle, which is the supporter of Life, one will notice that the Heart pumping about three ounces of Blood at each pulsation, eighty times a minute, will throw into Circulation a volume of Blood equal to 900 pounds in one hour. Thus, in one year, this marvelous engine will motion 3510.7142 tons of Blood through the Body. Surely no rational person will be stupid enough to gulp that such

a pump will act without having some dynamic power behind it to do the work. It were better if before graduation as Medical Doctors, the students be compelled to become automobile mechanics, to comprehend Human Engineering. They teach us that the Heart is involuntary, although it has Fibers also of a voluntary build. Years ago, I proved experimentally that the Heart IS capable of voluntary control. For Heart Disorders of various kinds, numerous Drugs—mostly Poisons—are prescribed. They may be summarized as Aconite, Adrenalin, Alcohol, Ammonia, Amyl Nitris, Arnica, Belladonna, Caffeine, Camphor, Cannabis Indica, Chloral, Chloroform, Codeina, Colchicum, Convallaria, Digitalis, Ergot, Erythrophylum, Ether, Gossypii Cortex, Hellebore, Hydrocyanic Acid, Hyocyamus, Lobelia, Morphine, Nitroglycerin, Opium, Paraldehyde, Phytolacca, Squill, Stramonium, Strophanthus, Strychnine, Trional, Veratria and the like. None knows what to give and when or where to discontinue or change. Think of giving a person a dose of Nitroglycerin (the active ingredient of Dynamite) for Angina Pectoris (Breast Pang)!

Let us consider the major 18 Heart Disorders. The Heart is a Muscle; when it becomes inflamed, it is Myocarditis. When its Inner Lining is inflamed, it is styled Endocarditis. When its Outer Lining or Sac is inflamed, it is Pericarditis. The Heart has four Major Valves: Tricuspid, Pulmonary, Mitral and Aortic. Any of these four may have a Leak, making what is called Incompetence. Any of these four may have a Contracted Orifice, making what is called a Stenosis. There may be a Breast Pang, making Angina Pectoris. The Heart may have a Stretch in Cavities, making Dilatation. It may be enlarged, making Hypertrophy. It may have Retardation, making Bradycardia. It may have Acceleration, making Tachycardia. The Aorta (Main Blood Vessel) may have a Pulsating Tumor, making Aneurysm. There may be a Blood Clot, making Thrombosis. For all these formidable Disorders, the Medical Doctor has to depend solely on the hit-or-miss methods pertaining to the use of the Drugs (Poisons) stated above; he is never sure of the outcome. In Spectro-Chrome Metry, I created a positive acting Remedy for ALL Heart Disorders, whose certainty and effectiveness in these dangerous Disorders, during the past eighteen years has proved beyond doubt or question. These Disorders have been on the increase steadily in the World, in fact the increase is alarming in character. The real cause is unsuspected by the people and the Medical Doctors do not think it fit to enlighten the public. In 1912, the Death Rate by Heart Disorders was 159.9 in 100,000 population; without any decline, the Death Rate year by year jumped, until in 1934 it was 299.9. The people are going fast to doom. What is the cause? TOBACCO SMOKING is my answer. Its details I shall discuss later, but shall emphatically say that none who continues to smoke will recover from any Heart Disorder, Spectro-Chrome or no Spectro-Chrome. In this System, I reversed the Rainbow and produced certain definitely matched Colors of specific Wave-Lengths, which have absolute Chemical Action on the Heart and the Suprarenal Glands of the Kidneys which act on the Heart. My Researches showed that the actions of the Heart, depended on the Chemistry of the Elements Potassium, Lithium, Rubidium and Strontium on the Magenta Division, Bromine on Purple and Manganese on the Scarlet Division. Such Attuned Color Waves are produced by the Spectro-Chrome and without any guesswork they operate on the Blood Circulation with a precision unequalled by medical or any other method.

The terror attached to Heart Disorders is now a matter of the past, as the hit-and-miss medical views about them were swept away by me and a new era of Health and Happiness dawned for the Sufferers. Instead of the Poisons extracted and introduced at random, Spectro-Chrome with its stated three Attuned Color Waves, proved its competence to equilibrate the Blood Circulation, raise or lower the Blood Pressure, increase or decrease the Pulse Rate, dissolve or throw out the Blood Clots and above all remove Contractions or Leaks in the Heart Cavities, provided the Sufferer will abstain from poisoning self with Tobacco. TOBACCO MUST GO AND SO SHOULD ALCOHOLIC DRINKS, both being the roots of Heart Disorders and other degenerations. Till this is done, the World will have no decrease in the Death Rate by Heart Disorders and money spent on Public Health will go to waste.

Read What Even Doctors Say

MARVELS OF SPECTRO-CHROME

TO WHOM IT MAY CONCERN:

This is to certify that I, Dr. N. S. H. have studied the system of Natural Healing called Spectro-Chrome Therapy under Colonel Dinshah Ghadiali in Chicago, Illinois, during the summer of 1923 with fifty other physicians and surgeons. That I bought a Spectro-Chrome machine and used it on my wife who was ill for a long time. That the benefits so astonished me that I convinced a doctor with whom I had an office, being in dental practice, to take it up and use it on his patients, which he did. His first case was an advanced case of tuberculosis, which pulled through to his great astonishment. This patient was his mother-in-law.

I have been using this method on my wife, my children, my relatives and friends with great success. In my dental cases it proved to be superior to other methods. For pyorrhea, facial neuralgia, post-operative pains and all mouth diseases it can not be beaten.

I feel, after seven years of faithful use, that it is superior to any other method known to me. I am a Dentist for the last fifteen years and a Drugless Practitioner for the last ten years.

(Signed) Dr. N. S. H.

TO WHOM IT MAY CONCERN:

After having tried many different kinds of treatment, a major operation and consulting more than twenty physicians and specialists, for a period extending over fifty years, without any permanent relief, but gradually getting worse, a friend (who had been relieved) advised me to try Spectro-Chrome as administered by Colonel Dinshah P. Ghadiali, of Malaga, N. J. In the short time of thirty days, I obtained complete relief. My course began May 14th, 1927; since that time and now I am enjoying better health than I have ever enjoyed for a like period during my entire life.

**ARTICLE 39****\$8,500,000,000.00 PROGRAM
FOR PUBLIC HEALTH CONSERVATION**

Every few days our President Franklin D. Roosevelt starts some new idea, to invigorate the alleged "New Deal" and he goes on the air to give the public his inspirations, by means of the "Fireside Talks." The method is very good and savors of up-to-date politics, but, I have yet to hear one sentence in all these talks that would uplift mankind along unselfish and selfless lines of thought. Radio is the best and the quickest way to reach the masses. It has the personal touch through the auditory system and is capable of sinking deeper into the mind of the listener than any other channel of distant communication. It is unsurpassed as an advertising medium and the President well knows it, being a Past Master in such oratory.

Having suffered through Infantile Paralysis, which left its painful and unfortunate scars on him, he of all realizes the value and necessity of Health. Notwithstanding the ballyhoo of the Medical Doctors, the endowment of hundreds of Hospitals and the establishment of scores of Research Commissions, the terrible Disorders of Diabetes, Kidneys, Cancer, Appendix, Heart and the like are steadily marching on the increase. The situation appears to have either drawn the attention of President Roosevelt or his attention was drawn to it because of personal experience. He seems to feel keenly the necessity of Public Health Conservation and he is quoted as saying that "Nothing is more important to a Nation than the Health of its people." The words are full of sense and wisdom and the view expressed therein is quite correct. No wealth of this World can compensate one for the loss of Health and the statistics published by the Bureau Of Census, do not seem to be en-

couraging to us. In spite of all the Medical Doctors, Disorders are not actually disappearing or lessening, but, are merely changing their forms. The Healthsmiths do not seem to reach the cause of any of the Disorders. For 6,000 years, since the present so-called civilization dawned, herbalists, medicinalists, druggists, pharmacists and all types of alleged curists have been tinkering, squeezing and soldering the Human Body, without it anyway deviating from the methods of Methuselah. Surgery introduced only a higher class of butchery, without any rational doctrine behind its irrational principles of chopping Vital Organs to restore (?) health. To me it appeared in logic, like the man tearing the bellows open to find from where the wind came. No mechanic with any Brains will admit that one may with impunity rip out Vital Organs and make people healthy or well. In the modern (destructive) Surgery, there is nothing but wholesale, commercial butchery. Then, came the reign of Vaccines, Viruses, Serums and Antitoxins. What Nature's Laws reject from the Body as effete matter, the Puspunchers introduce as Remedy! Gland Therapy, Auto Therapy and Autohemic Therapy follow a similar trend. Studying closely the roots of the evil, I came to one conclusion that the enumerated Systems must go and a mathematically precise system should take the reins of Public Health.

At such time, as I read the report of the Committee appointed by our President, I found it mentioning that the cost of illness and premature death was estimated at \$10,000,000,000.00 a year and that preventable sickness caused tremendous suffering, economic inefficiency and social waste. Sickness was 58 per cent. higher among the low-income groups than among the families having incomes of \$3,000.00 per year or more. To help the public, therefore, Congress will be asked to provide \$8,500,000,000.00 to be spent in the next ten years. That money will benefit solely a single group, the Medical Doctors and their Associated Affiliates. No more benefit than what was done during the past 6,000 years will accrue from this vast expenditure. That money will not give them the knowledge of the functions of the Appendix, Spleen or Tonsils, it will not abolish Pills, Potions, Poisons and Poniard-poking, it will not discover the causes of Small Pox, Infantile Paralysis, Diabetés, Cancer or Heart Disorders, it will not remove the sources of Tuberculosis, Syphilis and Influenza—it will only build more Hospitals, encourage more (destructive) Surgery, fatten fully the pockets of the masters of commercialized Medicine. Thus, where each one is looking out for himself, the original aims and purposes will not be served, the taxpayers will be saddled with more worries, intemperance, debauchery and dissipation will increase and the benefits in Health to which all aspire will not be received. Graft, the national bloodsucker, will eat the plums, leaving the sterilized seeds to bellyache the suffering public for more ages to come.

To Save Waste Of The People's Resources, Dinshah Offers To Give To The Nation Unconditionally, His Spectro-Chrome Metry And Spectro-Chrome Institute Without Any Compensation.

The Honorable Members Of Congress,
United States Of America,
WASHINGTON, D. C.

Trusted Delegates Of The Nation:

At this time, our great nation is seeing the necessity of conserving Health and numerous plans are put before you for some aim or another, each one asking for a return, compensation or reward.

The latest proposition, through the initiative of the Honorable President Franklin D. Roosevelt, is the campaign to bring adequate medical care to the people, by a ten year program, spending \$850,000,000.00 a year in the cause of Public Health. Without any hesitation, I respectfully state that the money will be totally wasted and will not accomplish the aim. On the contrary, it will saddle the nation with new taxes and debts, for which it is not prepared.

The Sun of the known Healing Arts, set below the horizon of the World, when in 1920 after 30 years of extensive and laborious research, I originated and established the Science of Spectro-Chrome Metry, which totally discarded (Differential) Diagnosis, Drugs, Manipulation and (Destructive) Surgery. In Spectro-Chrome Metry, I gave to the people, a unique Science of Automatic Precision, such as did not exist in ages past and having Fundamental Principles absolutely unchangeable because of their mathematical accuracy. The results of this original Science, are so near miraculous that in most cases they appear unbelievable, yet the fact stands, that during the 18 years since its presentation to the public, notwithstanding enormous professional opposition and numerous lawsuits, Spectro-Chrome Metry emerged unchallenged and offers today the sole sensible solution for the conservation of Public Health by the remedy of all Disorders to which mankind is subject. Over 5,600 Spectro-Chromes are in successful daily use, from Coast to Coast.

Impelled by the noble motive of the President of the United States Of America, I, as an humble, loyal and devoted citizen, who accepted this country as his adopted mother, offer to the stated cause all the interests vested in my Spectro-Chrome Institute, including all the Estate, Manufacturing Plant, Printing Plant, Research Laboratory, Patents, Copyrights, Trade Marks and Goodwill. I offer, for the perpetual use and benefit of this nation, all I have in Spectro-Chrome Metry, in this country, without any reservation, restriction, recompense, obligation or condition, so the public from whom I earned material belongings, may enjoy forever the fruits of my contribution to the field of Healing Science.

I ASK ABSOLUTELY NOTHING IN RETURN.

I have no ulterior aim or motive. In 1891, when I mounted the public platform in Bombay, India, as a scientific lecturer, as a part prayer I asked of the Grand Architect Of The Universe, "Grant me the health that helps the needy, the wealth that wields the worldly; all so that during life I exist selfless and at passage to the Higher Planes leave behind a lighted trail to be followed by the Searcher for the Beyond."

That prayer was answered in Spectro-Chrome Metry. Its "lighted trail" I desire to bequeath to the United States Of America during my lifetime and I request you as the Delegates of the nation to take the necessary steps to accept my said unconditional contribution for the benefit of the nation, so I may further extend its banner to other parts of the World, which too need my services for the suffering.

Yours Most Respectfully,

DINSHAH P. GHADIALI, Originator,
President, Spectro-Chrome Institute,
Malaga, New Jersey

ARTICLE 40

MEDICAL HUMBUG OF APPENDICITIS

It was the beginning of the current century. The illustrious Empress Of India and Queen Of Great Britain and Ireland, Victoria, had breathed her last on the Physical Plane and her jolly eldest son had ascended the Imperial throne to be crowned as Edward VII. I was at that time a practising Physician and had a well-established Electro-Medical Hall, in the city of Ajmer, Rajputana, Central India. I was the only Medical Doctor then using the ordinary, orthodox allopathic Medicines (Poisons), together with Electro-Magnetic remedial measures plus Chromopathy, an empirical hit-or-miss Color system. Suddenly, the newspapers bristled with reports that the coronation of Edward VII as King-Emperor was postponed, because he had Appendicitis and a serious Operation was to be made to save his life. All India was in gloom. What will happen to the merry monarch? What was this Appendicitis anyhow? Very few Medical Doctors had any personal experience of such an Operation and still less knew what the purpose of this Appendix was or what the Creator had in His mind when He made man in His Own Image. The Bible failed to state that purpose and as the Physiologists of course never believed in the statements of the Bible, even if there were an explanation, they would not have paid attention to it anyway. Reference to heavy tomes on Anatomy and Physiology indicated, that the Appendix or Vermiform Appendage was a long pendulant part, hanging near the junction of the small Intestine with the large Intestine, close to the Caecum, just below a fold called the Ileo-Caecal Valve. It was stated to have no definite purpose and was a remnant of bygone ages when we emerged from being Lizards! Cobras would be better. In short, the Appendix was just an error of God in His anatomical conception of the Human Being, thrown in as a generous measure for giving bread to starving Surgeons.

Elie Metchnikoff, a professor of Russian extraction, working in the Pasteur Institute is supposed to be the father of the Phagocyte Theory. The blame of all Intestinal Disorders was thrown on the heads of certain Germs—Bacilli Coli-Communis—which thriving mainly in the Colon, upset the basket of Health. Metchnikoff started with his physiological guns and tried to kill them with other Germs. That began the era of Buttermilk and the various other concoctions. None paid attention to the fact of the existence of Bacilli Coli-Communis in all intestines as a result of Constipation. I found the purpose of the Appendix. It is a provision of Nature to produce Germkillers where and when needed. To remove the garbage from inside, Nature produces in Constipation these Bacilli to powder the effete matter. When their purpose is served, the Appendix being built of Erectile Tissue (like the nipple of the female Bosom), jerks a special fluid into the space near the Ileo-Caecal Valve, with the effect of destroying those Bacilli. Thus, instead of being a useless organ, it is the chief protector of the Body and when removed, a train of unpleasant symptoms follow. The Medical Doctors, in removing the Appendix, are doing a great wrong to the Sufferer and the machinery of Digestion and Assimilation becomes thereby seriously deranged. In Spectro-Chrome Metry, such a Disorder is easily attended

and one or two Tonations of the Ultra-Green Division of the Spectrum is all that is needed in Recent (Acute) cases. In Persistent (Chronic) cases, the Infra-Green Division is utilized in Spectro-Chrome Metry and the results are uniformly gratifying. A pertinent question is occasionally asked, "Supposing the Appendix were ready to burst or did actually burst, what then?" Such cases, have a High Fever and are tonated on the same principle of the Rubor, Calor, Tumor and Dolor, like any other Inflammation. The matter escaped into the Abdominal Cavity is absorbed by the Indigo Attuned Color Wave and the end products are eliminated through the regular channels.

Now you will please comprehend the howl of the Medical Octopus against the Spectro-Chrome. One German Doctor in his lifetime removed 45,000 Appendices. Just multiply that by \$250.00 for an Operation and you will arrive at a rational understanding. Spectro-Chrome is their worst pocket-cutter; it ruined their prospect of easy money. Spectro-Chrome has to its credit hundreds of such cases and never lost one.

TRIUMPH OF SPECTRO-CHROME

ATTUNED COLOR WAVES VINDICATED IN SUPREME COURT

COURIER-EXPRESS, BUFFALO, N. Y.

Saturday, May 2, 1931

COLOR RAY CURE ADVOCATE FREED

CONDUCTS OWN DEFENSE

Ghadiali Matches His Scientific Knowledge Against That Of Prosecution Witnesses

After deliberating 11½ hours a supreme court jury yesterday acquitted Col. Dinshah P. Ghadiali.

Col. Ghadiali conducted his own defense and matched wits with Leo J. Hagerty, prosecuting attorney, and his scientific knowledge against that of several prosecution witnesses. The supreme court room was filled for the three days of the trial.

Although Col. Ghadiali did not take the stand in his own defense, he called several witnesses who emphatically asserted the magic-lantern was all that its inventor said it was. The witnesses, two of them women doctors, one from Philadelphia and the other from Brooklyn, told the court and jury it had been found by them to develop marvelous curative powers and that they had abandoned the practice of medicine to treat their patients by Col. Ghadiali's method.

Not only did Col. Ghadiali handle his own defense, but he also summed up his own case to the jury and for more than a half-hour, in the best of legal phraseology, assured the jury that he was prepared, by actual operation, to demonstrate his machine.

He placed himself in the same class as the inventor of the telephone, the radio and other revolutionary inventions and stated that, because he was years ahead of other scientists, he was the victim of persecution. "I am ready," he said, "to be a martyr to science, but in years to come it will be found that disease can be successfully treated with color-rays."

ARTICLE 41

MEDICAL HUMBUG OF COMMON COLD

Refer to the books and you will find "Cold" defined as "A Catarrhal Affection, especially of the Respiratory Mucous Membranes." "Cold in the Head" is named Coryza or Rhinitis. "Cold on the Chest" is styled Bronchitis. It is proclaimed as being "sometimes caused by exposure to cold and wet." As usual, however, the wise fraternity whose occupation is to guide the public to maintain Health, makes a great asset out of this Disorder, which in itself has certain mysteries attached to it about which the Medical Doctors know absolutely nothing. To comprehend thoroughly the Truth behind the occurrence known as "Cold," one will have to go behind the scenes of Anatomy, Physiology and Psychism, without which the so-called Germ Theory of Cold can not be exploded. They did not succeed in finding yet a specific Germ for "Cold" or Catarrh (Rhinitis), the nearest they went being, "The Bacteria usually present from chill are the Pneumococcus and Streptococcus either singly or associated; also the Pfeiffer Bacillus of Influenza and called Bacillus Catarrhalis." The question may be raised as to whether the Chill produced these Micro-Organisms as effect or they caused the Chill? Surely in merely wetting the feet or getting chilled in damp air we could not have taken all these trouble-makers into our existence! The wise gentlemen further aver that "Certain gases such as Ammonia and Chlorine and the fumes of such Acids as Nitrous, Nitric, Sulphurous, Sulphuric, Hydrochloric or Hydrofluoric also may excite an attack." Do they then want us to understand, that those Acids had the Pneumococci and Streptococci within their chemical composition? How will they maintain their stand?

The true cause of Cold is just what is admitted—a lowering of Blood Circulation by damp, wet or moisture affecting the feet. From the Blood pump—the Heart—the Feet are many feet below, hence the warmth of the Blood is materially lowered through Radiation of Energy, by the time the Blood reaches there. If, therefore, the Feet are not sufficiently protected against such loss of Energy, the Circulatory Warmth Principle is affected and more Blood has to be forced into the unprotected Areas to compensate for this loss. This shows why silk stockings are valueless for protection. The Mucous Membranes of the Nose are formed of Erectile Tissue, very similar to the Tissue of the male Genital and female Clitoris, as well as the Nipples; they resemble too the build of the Appendix. Thus, both the Nostrils, because of their peculiar construction, in accordance with the amount of loss of Energy by Radiation, differ in their amount of turgor or fulness from time to time. Evaporation from the Skin and the amount of Urinary Elimination also act as contributory causes. The Mucous Membranes of the Nose respond by their erectile potency, in proportion to the resultant of these combined causes and the effect is perceived in the more or less closing of the Nasal Orifices. This impedance is the true cause of Cold. Under the gravitational and radiant influence of the Sun and the Moon, as determined by me mathematically after fourteen years of astro-physiological research, the Great Sympathetic Nervous System responds every so many minutes to such variations and the least hitch in the operation of the marvelous process results in Respiratory Disorders, of which Common Cold is one. The very name Rhinitis suggests Inflammation of the Nasal Mucous Membranes, which is easily remediable by the Ultra-Green Division of the Spectrum as standardized in Spectro-Chrome Metry. This explanation to the professional as to the lay-person, might very probably appear unique, but, I have an apparatus in my Auditorium I designed for the demonstration of this most singular phenomenon and I shall be pleased to demonstrate by appointment this Principle Of Variant Breath, to anyone interested in the exemplification of the mysterious Energies working upon the Human Body. Our Chemical Engine may be built of Chemical Elements, but, the drawing into it of the building Elements through the power of Light or Radiant Energy, is a subject far beyond the scope of the teachers in the Medical Colleges. They dissect and study the Human Being after its functioning ceases, whereas the true enlightenment should be sought and could be gotten solely when the Body is alive and breathing. Ask your Medical Doctor and find for yourself. Ask him whether he knows that the two Nostrils breathe separately at different pressures in accordance with a definite time schedule called the Science of Sympathometry. His reply will sound his knowledge and power to debate on Spectro-Chrome Metry which is fast removing his influence from the family.

STRAIGHT FROM THE SHOULDER

A SLAP ON THE JAW

Ruptured Appendix And Peritonitis Normalated

For eighteen years since Spectro-Chrome Metry was presented to the World as the greatest gift in Healing Science, the medical authorities have been after its Originator Dinshah P. Ghadiali, "to get" him. Many times they "got" him by crooked measures, but till now his fearless Truth prevailed—they could not "keep" him! In the case against him in the Supreme Court in Buffalo, New York, Dinshah was charged with Grand Larceny by an ungrateful Graduate who never paid him money for his Spectro-Chrome Equipment. In the Testimony the name of the Erie County Medical Society appeared as an interested party. The Secretary of the Society wrote to Kate W. Baldwin, M.D., F.A.C.S., Senior Surgeon of the Woman's Hospital of Philadelphia, Pennsylvania, the following letter:—

Dear Doctor Baldwin:

In a reprint of an article published in the Journal of the American Medical Association, January 26, 1924, there appears the following statement:

"Spectro-Chrome for March, 1923, contains an article on 'Complicated Disorders Set Right by Spectro-Chrome', credited to Kate W. Baldwin, M.D., F.A.C.S., Senior Surgeon of the Woman's Hospital, Philadelphia. According to this article, Susie T., age 9, who was admitted to the Woman's Hospital with a sloughed appendix and peritonitis, developed a pneumonia which was treated by Dr. Baldwin by Lemon, Turquoise and Magenta colored lights. Susie went home...well, fat and happy."

Dinshah P. Ghadiali, using the title M.D., is the publisher of Spectro-Chrome. He is under arrest in Buffalo charged with grand larceny for selling a course of lectures and leasing a colored light apparatus of alleged curative value for human ailments. We are wondering if the article in which your name is given is a correct statement. Our Society is somewhat interested in the outcome of this case, and we will very much appreciate your telling us if your name was used with authority.

Thanking you for the courtesy of an early reply, we are

Sincerely yours,

Medical Society, County of Erie,
(Sd.) Louise W. Beamis, M.D., Secretary

Surgeon Kate W. Baldwin Replied:—

Dear Doctor:—

Your letter of June 9th is just received. The statement printed in the Journal of the American Medical Association of January 26th, 1924, is practically as written by me for the Spectro-Chrome magazine. Susie's was an emergency operation at nine o'clock at night. There was nothing left of the Appendix to remove. There were quantities of pus. The wound could not be closed, free drainage was provided and the child put to bed with little hope that she would live until morning. For some days, an enema would simply pass through and out of the abdominal opening. Susie did develop pneumonia. I did use Spectro-Chrome and eventually she did leave the hospital in good condition.

In the Woman's Hospital, I used Spectro-Chrome for many things to the satisfaction of the patients, the Staff and the Board. The results were approved by all interested until the article cited came out in the Journal. Then the Staff turned traitor. The Board appointed a Special Committee of five to investigate and a copy of its report I am enclosing. After this investigation, I was granted a large space for the work of Spectro-Chrome.

The American Medical Association continues to rate me as a Fellow in good standing. Not the slightest effort to prove the truth has ever been made by the A. M. A. or the Doctors. The simple fact that the A. M. A. made the statement against Spectro-Chrome was sufficient to condemn. At the time I wrote to the Journal stating facts. The courtesy of a reply was not granted. The letter was sent by registered mail and a return card showed that it was delivered. Eventually, this article was the cause of my losing my position on the Surgical Staff of the Woman's Hospital. The A. M. A. has not been just to one of its Members or to humanity; within the year of 1929 communications have been sent by the A. M. A. to several of my patients in the shape of a reprint of the article published in the 1924 Journal and a letter ridiculing Spectro-Chrome and me.

Spectro-Chrome has more value as a therapeutic measure than all the Drugs and Serums manufactured. I would close my office to-night never to reopen, if I could not use Spectro-Chrome.

Respectfully,

(Sd.) Kate W. Baldwin.

Dinshah routed his opponents in Cross-Examination.

THE JURY ACQUITTED DINSHAH.

ARTICLE 42

MEDICAL HUMBUG OF DIET

The Human Body, a true Mechanical Engine in its physical build, is activated through the Energy of the Chemical Elements entering it as Food. The Food eaten by us being a product of the Earth, it is logical to understand that the Body must have more or less of ALL the Chemical Elements of which our Planet Earth is composed. Of course, we may have 72 per cent. Oxygen in the Body and only 1/300 of a Grain of Arsenic and solely a trace of certain other Elements, but, that trace as it is MUST be in the Body, even though ordinary crude Chemical Analysis may not indicate such trace-like presence. Thus, a well-balanced Physical Body, must be given well-balanced Food and on this Food problem it is that a monstrous racket is conducted by the Medical Doctors, to maintain their practice in the family. The racket is very insidious and is backed by the alleged "Health Articles" of the controlled newspapers, which receive vast profits from the advertisements of innumerable questionable products. The prices of the advertisements vary greatly; one highly circulated weekly charges \$17,000.00 for a single issue of a full page advertisement. I refer to this racket as the Diet Racket.

This subject is so wide, so important and so cunningly disguised, that it is impossible to dispose of it in a single Article or even many Articles. However, as our very existence depends on our Food, it is essential that I take as much space as I need to elucidate this question thoroughly and disillusion the public mind once and for all time. I have been orating on this particular subject of family protection 48 years on the public platform and each time threw before the audience an open challenge: "Either you convert me or I convert you." In all these years, none, Scientist or layperson, lifted the challenge or after hearing my scientific and established proofs from possible different angles, was able to raise a single question to break the argument. Diet as is taught by Medical Doctors is all unnatural; Diet as is preached by so-called Health Food Lecturers is a nonsense; Diet as is advocated for the Human being or for the nation at large is a selfishness; Diet as is prescribed in detail for the ailing is a gigantic imposition. The whole system known as Dietetics and its exponents the alleged Dieticians, are more a curse to the sick than a blessing. The Dieticians may perhaps be conscientious in their beliefs, but, the public which needs help is bamboozled thereby and needs protection through correct education, based on the essential fundamentals.

The matter of Food is the most important in Life, as Life depends on it. Thus, when I find all around the advocacy of Beef and Pork, Fish and Fowl, Eggs and Oysters as "the best and the most nourishing Foods," I am impelled for the sake of public service and family protection, to enunciate the impartial Truth, in the most open manner, without the slightest reservation and without any thought as to whether my views as expressed may be palatable or otherwise to certain groups or individuals. My words will come to many as sledge-hammer blows to their pet ideas, but to all they will serve as true revelations. I shall therefore, present this all-important subject of Food in a long series

of Articles, specially written for THE RECORD, refuting and completely shattering the contention that Mankind is made like a Carnivorous (Meat-eating) Animal and that Food procured by slaughter is in any manner essential to Health. The arguments will be presented from 12 distinct correlated angles, with unbreakable proofs and reasons from the standpoints of Religion, Anatomy, Physiology, Humanity, Economy, Agriculture, Aesthetics, History, Chemistry, Psychology, Consciousness and Experience, all forming an array of facts no person can successfully contest.

Declared Cripple By Medical Doctors And Hospitals Recovers By Spectro-Chrome And Plays Soccer!

"In 1931, I suffered from Sciatica very badly. Was lying in bed nearly seven months and living only on dopes, from which I had the only relief from those terribly painful attacks.

I gave up and the Doctors too. They told me to get out from the bed or I will become a cripple. This I did, but only with aid of crutches I was able to carry around.

After walking on crutches for a long time, no hope for recovery was near, until a teacher from North Eastern High, Detroit, who saw me suffering, brought me to Spectro-Chrome.

What 8 Doctors and 2 Hospitals could not do in 2 year's time, Spectro-Chrome has done it in 2 months and so well, that I could throw the crutches away and walked like a man again. Went back to work and 4 years have passed now and have not missed a single day or been sick.

I feel just like new-born again, after all those miseries I had to go through. It is hard to believe for those who did not see me suffering. What a difference!

In 1932, a Doctor told me I might lie in bed for 10 to 15 years, God knows only and now in 1937 I play Soccer (European style in Football), my favorite sport again. Thanks to Spectro-Chrome!

Since we have Spectro-Chrome in the house, I have nothing to fear. Not only that it helped me physically, but also Spectro-Chrome Science taught me how to help myself in future.

I CAN SAY NOW:—

No more Pain, no more Tablets, no more Crutches and no more Doctors!

Hurrah for Colonel Dinshah the Originator of Spectro-Chrome. If it were not for him, God only knows where I would be.

I would give up all my friends to save my best friend—SPECTRO CHROME and I never shall forget what Spectro-Chrome has done for me."

(Signed) RICHARD ARNOLD,

Detroit, Michigan.

ARTICLE 43

ESOTERIC RELIGION FORBIDS CARNIC FOOD

Religion as understood by the average mind is not what it is in its true aspect. People believe Religion to be something a supposedly enlightened Prophet dictated and one must follow rigidly or go to the fires of brimstone. Such interpretation of Religion is "Exoteric" and merely an outward form, as differentiated from the "Esoteric" or the genuine meaning. The Exoteric understanding may change, but, the real hidden meaning, the Esoteric, may never change. Such true concealed or Esoteric Religion has for its foundation no Human Being as a Dictator, but is based essentially on the Fundamental Principles common to all great, established Religions. In such Esoteric sense, the true Religion is not a sheer mumbo-jumbo of "doos and don't," accompanied by pompous ceremonials differing with castes, creeds, colors, sects and denominations to suit different minds, but, is a definite path for the performance of Duty to God and His Creation—Man included. Thus, I make no differentiation between one Prophet or Divine Lawgiver and another, but, by study respect all Their Esoteric teachings, based on the immutable Laws of the Grand Architect Of The Universe.

Christianity—I mean Christianity and not mere Churchianity—to my mind resolves into not what the present generation thinks, but, what the Lawgivers of their Holy Bible defined for all time. If we follow that Book from Chapter to Chapter, we find unquestionable authority for stating without hesitation, that Man was not made as a Carnivorous Animal. Let us look into it.

Genesis 1, Verse 29: "And God said, Behold, I have given you every herb bearing seed, which is upon the face of all the earth, and every tree, in the which is the fruit of a tree yielding seed; to you it shall be for meat."

Genesis 1, Verse 30: "And to every beast of the earth, and to every fowl of the air, and to every thing that creepeth upon the earth, wherein there is life, I have given every green herb for meat; and it was so."

Herein the word "meat" is meant as "food" and not "flesh," as interested people would have it.

Genesis 9, Verse 4: "But flesh with the life thereof, which is the blood thereof, shall ye not eat." As there can be no flesh without blood, the prohibition is clear.

Exodus 20, Verse 13: "Thou shalt not kill." In the Hebrew text, it says, "Thou shalt commit no slaughter." Animal food can not be had without slaughter.

Leviticus 3, Verse 17: "It shall be a perpetual statute for your generations throughout all your dwellings, that ye eat neither fat nor blood." Somebody, therefore, to overcome God's Law, suggested washing off the Blood!

Leviticus 7, Verses 22-23: "And the Lord spake unto Moses, saying, "Speak unto the children of Israel, saying, Ye shall eat no manner of fat, of ox, or of sheep, or of goat."

Leviticus 7, Verse 26: "Moreover ye shall eat no manner of blood, whether it be, of fowl or of beast, in any of your dwellings."

Leviticus 17, Verses 10-11-12: "I will even set my face against that soul that eateth blood, and will cut him off from among his people. For the life of the flesh is in the blood...No soul of you shall eat blood, neither shall any stranger that sojourneth among you eat blood." There are numerous similar passages.

Leviticus 19, Verse 26: "Ye shall not eat any thing with the blood." Where are the animals without blood and how can all blood be removed from flesh by washing?

Proverbs 23, Verse 20: "Be not among winebibbers; among riotous eaters of flesh."

Isaiah 66, Verse 3: "He that killeth an ox is as if he slew a man." How will the butchers answer God?

Daniel 1, Verse 8: "But Daniel purposed in his heart that he would not defile himself with the portion of the king's meat." In Verse 15 it is stated, "And at the end of ten days their countenances appeared fairer and fatter in flesh than all the children which did eat the portion of the king's meat."

Thus, the Laws of Moses, to which Jesus conformed, accepted as in the Holy Bible, deliberately speak against slaughter and the use of flesh as food. Even where Moses had to permit it to starving people, he forbade Pork. St. John is stated as living on "Locust and Manna." Some people translated the Locust as Grasshopper, instead of a tree!

The story of Jesus Christ having fed 5,000 persons with 5 barley loaves and 2 small fish, is mentioned in St. John 6. The occult meaning of this is not comprehended by the public. Under the Law regulating Duplication, a Master like Jesus can feed so many by precipitating material particles from the higher Ethers, by using the original food as a mold on which to precipitate. However, as the people he had to feed were fishermen, who had or ate no agricultural products and the available material for the physical phenomenon was solely barley loaves and fish, he had no other resource but to use them. It is unholy to conceive of a noble, humanitarian soul like Him actually advocating Carnic Food, the result of slaughter. Nowhere is it mentioned that Jesus feasted on slaughtered meat and His Religion based on the great principle of Love debars all idea of Carnic Food, which can NEVER be obtained without bloodshed. The basic Religions of Zoroaster, Krishna, Buddha and the like, all are in favor of non-slaughter and to permit Human Beings to convert their Stomachs into graveyards should be unthinkable to the mind of any follower of God.

HOW A WOMAN SUFFERED!

**SHE SPEAKS FOR HERSELF
WHAT SPECTRO-CHROME DID**

MEDICAL BUTCHERY ON ME

By:—CLARA W., Milwaukee, Wisconsin

Operation was performed during 4 months of pregnancy. Got a very painful attack one evening and was rushed to the hospital and operated at once. At first it was thought to be appendix operation, but it was a tumor the size of an orange imbedded with the appendix. When the baby came, I was terribly bruised and also the baby about the head and face. During the delivery, something cracked. It made an awful noise. I felt as if every thing dropped in me. After I got up I could not hold my urine. I was in an awful shape. I also developed a numb feeling every morning in my whole left side. The doctor thought it to be rheumatism. So one day, I asked him whether it could be my tonsils? He said he could not see anything wrong with them, but I had to go to a specialist. When he examined me, he said I had the worst kind of poison dropping down my left side, so the next day he removed them. I felt better every day, but then I started to develop that soreness in my lower area. Well, I felt so raw and had to scratch so much, that at times I could hardly walk from pain. I could not even lift the baby; as soon as I lifted the least little bit, it seemed where that bone cracked, it was so painful. I also felt something moving in my

side, just where I was operated. I took treatments for that sore for another year but it did not help much. The best result I got when I bathed with boric acid. At last we heard about SPECTRO-CHROME. It really did wonders for me. I have no pain. Seems every thing is in place again. I am contented the way it is, as I feel very well. Before using SPECTRO-CHROME, I had Neuralgia and Bronchitis but now I do not know what they are.

ARTICLE 44

MAN'S ANATOMY AND PHYSIOLOGY PROVE HIM HERBIVOROUS

A study of Anatomy (Build of the Body) and Physiology (Functions of the Vital Organs) will prove to the mind of any reasonable thinker that man is made like a Herbivorous Animal and is not Carnivorous. However, without the application of the rules of analogy, this fact may not be well comprehended. The under Jaw of the Cow has Teeth similar to ours. The Teeth of an Ape are similar to ours. Darwin never stated that we are "descendants" of Monkeys; all he said was that the Monkey "resembles" the Man. He was therein quite right, as an examination of the Ape's Teeth proves the similarity of build. Our Jaws have hinges or condyles which permit them to open and move with facility to act as grinders in the function of chewing. Meat eating animals have Jaws built to snap vertically. Watch a Dog crunching Bones and the point will become clear. Human Beings do not have the needle-pointed sharp Teeth which characterize Carnivora. Our so-called "Canine" Teeth are nothing in build like Long Incisors. We may "cut" with our Teeth, but, can not tear apart Meat Fibers. Meat eating animals have a droop at the corners of the Mouth; they generally slobber and Saliva drops from them. A look at a Dog and its panting with the Tongue out will emphasize my meaning. The Skin of Carnivora does not have Sebaceous Glands which secrete and exude Perspiration. We do; hence we are the reverse of Carnivora, as all animals of the Herbivorous type perspire by the Skin. Now consider the Intestinal Tract of Animals and Humans. The Food Tract of a Steer is around 200 feet long; that of a Lion is about ten times less. Our Food Tract is much more than even that of a Lion; it is about 25 feet long. Thus, the conclusion may easily be reached that we are not in the class of Meat Gobblers. Whichever way one turns in comparative Anatomy and Physiology, whether of one Organ or another, we are faced with numbers of such facts, very little known or recognized, but, nevertheless strikingly true. Even our Digestive Juices bear comparison with those produced by Herbivorous Animals and positively not by the Carnivora. Taking from there the standpoint of Aesthetics or the Science of Beauty, a subject so attractive and appealing to women, one faces another fact that the gentle and good-looking animals of the World are found in the group of the Herbivora, the Carnivora being

ferocious and repulsive in features. Of course, one may talk about a Dog and show a Poodle or a Chow, but on the other hand a Bulldog or a Bloodhound can bear no comparison with the beauty of a Horse or an Antelope. The eyes of Meat-Eating Animals show cunning and trickery, as a glance at the eyes of a Cat will prove, but look at the Eyes of a Gazelle or a Cow and you will be peeking into an attractive soulfulness. The cut of a Horse's Mouth is straight like ours and its Skin perspires like our Skin. The feel of the Skin of the Herbivora also is smooth; the Skin of the Carnivora is rough, if one takes off the Fur. Of late, Meat eating among women is increased and the feel of the average American woman's Skin is displeasingly rough, because of the Carnivorous Food and the application of alleged cosmetics, which deaden the Skin. I am bound to admit, that ideas and opinion about Beauty may differ as expressed by the alleged Beauty of the women of Central Africa. There, no woman is reckoned as beautiful, unless she possesses the charm of having disproportionately wide hips decorated with pounds of blubber. Yet, when we consider that American women need millions of dollars worth of beauty preparations, it needs no proof to aver that their Beauty must be on the decline. Someday, I shall write on this vital subject more fully for the women folks and show them how to maintain and enhance their Beauty. Coming again to the theme of the Body, the odors emanating from the Body of a Carnivorous Animal are repulsive and fetid compared to those from a Frugivorous or Herbivorous Animal. The Chemical Reactions of Carnivora produce inside the Body, horrid smelling products as Indole ($C_8 H_7 N$) and Skatol ($CH_3, C_8 H_6 N$), from the Tryptophan ($C_8, H_6 N, CH_2, CH, NH_2 COCH$) existing in excess in the Animal Proteins. The nasal appeal of a Horse stable, compared to a basement where a Cat or Dog is permitted to commit nuisance is sufficient to convince the most notorious sceptic. Man IS a Herbivorous, Frugivorous Animal, as God made him in His own Image.

Widely Circulated Daily Newspaper

Investigated Spectro-Chrome.

Report Of The Medical Investigator

When the Originator of Spectro-Chrome Metry went to Portland, Oregon, to teach his Science, he asked for a journalistic investigation, to which nine Editors cheerfully responded. At the end of the complete 60 hour course, the Medical Doctor appointed by the Oregon Daily Journal testified as follows:—

June 21, 1924
606 Medical Building,
Portland, Oregon

Colonel Dinshah P. Ghadiali.

Dear Sir:

As a representative of the Oregon Daily Journal to investigate and report on the merits of Spectro-Chrome Therapy, I beg to report as follows:

Personally I might state that I have the College and University degrees of B. Sc. and M. D. and that I have taken a number of Post-Graduate courses. I served for many years as Secretary of the Oregon State Academy of Science.

I have attended every lecture in your Spectro-Chrome Therapy Class and have been constantly impressed with your scientific attainments and clearness of presentation. I have in the past attended lectures by any number of well-known scientists from Huxley down and I feel that your presentation of Spectro-Chrome Therapy reveals an understanding of Natural Law that has enabled you to push back the limits of the unknown.

Your fairness, your admiration for all scientific pioneers of the past, indicates a just mind and a generous spirit. Henceforth Spectro-Chrome Therapy will rank as one of the established sciences and it cannot fail, because it is founded on Truth.

I beg leave to express to you, Sir, my hearty congratulations and wish you every success in your efforts to make this valuable therapeutic agent available to all.

You have permission to use this in any manner as you may wish.

Very respectfully,

(Signed) Ernest Barton, B. Sc. M. D.

ARTICLE 45

FOOD CHEMISTRY PROVES INFERIORITY OF SLAUGHTER FOOD

Our Human Body being composed of Chemical Elements, the greatest weight that can be attached to any point in argument, must be the consideration of those Chemical Elements. Taken as groups of Chemicals, without which the Body can not be duly nourished and

without which therefore, some Disorder must soon or late appear, we are compelled to look into this subject with the gravity its importance demands. Each such group of Chemical Elements, I style Element Of Food and there are Five such Group Elements:—

ELEMENT	BUILDING FUNCTION	SUPPLIED BY
Caloric	Heat.....	Carbohydrates and Hydrocarbons
Carnic	Flesh.....	Proteins
Osseous	Bone	Salts
Solvent	Blood.....	Water
Energic	Vitality	Light

Looking at Food from this Chemical Group angle, it distinctly appears and must be admitted, that the purer, cleaner, cheaper and more nutritive a Food may be, the better should it be for human ingestion. As soon as this one point is conceded, all argument in favor of Flesh or Carnic Food promptly disappears and Vegetarian Food reigns supreme. Thus, leaving aside all the other points except this one of Chemical Groups, the balance is in every respect in favor of a Non-Slaughter Food System. Here is the Chemical Group by the per centage of Water, Caloric and Carnic contents, total Nutrition Value and approximate peace time Price in Cents per Pound:—

Food	Water	Caloric	Carnic	Nutrition	Price
Beef	60.0	17.0	20.3	37.3	25
Legumes	14.5	58.9	27.0	85.9	8
Rice	14.6	77.7	8.0	85.7	7
Potatoes	75.0	17.6	3.3	20.9	2
Butter	12.0	86.0	1.0	87.0	30
Eggs	74.0	10.5	14.0	24.5	20
Milk	86.3	14.3	4.9	19.2	8

Study these figures! It will not take you long to understand that in purchasing a so-called "Food" like Beef or Pork, you are getting nothing but 60 per cent. of water compared to only $\frac{1}{4}$ of that in the Legumes and Rice, paying even at that at least four times the price for effete, bloody, decaying material, with less than $\frac{1}{2}$ the value in Nutrition! Legumes include all which grows in pods. The talk of the "old England's roast Beef" is a nonsense. Adolph Hitler is a total Vegetarian and eats no Meat or Fish, but look at what he accomplished, whether one may agree with him or otherwise! The question is asked why am I against Fish? Because, the Food of Fish is Fish and that produces Scales on its Skin; similarly, most of the people who are fond of Fish develop Skin Disorders like Eczema. Eggs when eaten, under the process of digestion produce an extremely offensive gas called Sulphuretted Hydrogen, besides being as low as 24.5 per cent. in Nutrition Value. Furthermore, it is a filthy product of Elimination, as it is nothing but the Menstruation of the Bird and to drink its contents, is to me one of the exceedingly repulsive things a sensible Human Being should not

do. Thus, in every way the standard of our clean Life is desecrated and outraged when Slaughter Food of any kind is admitted into our Chemical Vehicle and I speak from medical experience that Cancer is more prevalent among the Meat-Eating Nations than among the Vegetarians. Tuberculosis too is similarly preponderant among the Carnivorous Nations.

There is another vital argument against the consumption of Flesh or Slaughter Food. During the lifetime of an animal, all the functions of regeneration and recuperation are performed by the Circulation Of Blood, which through its Major, Pulmonary, Renal and Portal functions acts as the carrier of the desirable as well as the undesirable chemical products. As soon as the animal is slaughtered, all those products which were on the way out, stagnate promptly in the Tissues and Organs as well as Vessels where they were and when eaten, introduce into the eater a veritable cesspool. At best, all Slaughter Food is second hand Food, because, all animals which Man eats, never eat anything but Vegetables, so why not eat the original Vegetable and have untainted first hand material? Animals which live on Flesh Food, are not eaten by Human Beings. None eats a Cat, Dog or Fox. Why not? Because their Meat stinks and as regards the odor of Fish, one does not need to be told that its putrid character is foretold by the horrible, nauseating, foul Smell it emits. That is why God gave us the Nose, but, folks will not be warned through His Divine gifts and will eat filth, though the senses revolt at its sight and malodor.

Friday, November 4, 1938

Masonic Publication In Oregon Investigated Spectro-Chrome. What Their Representative Reported

Among the Nine Journalists who were requested to investigate the Science of SPECTRO-CHROME, in Portland, Oregon, was E. P. Ramsey, the Publisher of the MASONIC ANALYST. He wrote this letter to the Originator, Colonel Dinshah:—

Dear Sir:

We thank you for the opportunity of having our representative, Chas. W. Lowe, in attendance at your meetings to be held in the Portland Hotel. We are much interested in the development of science along all lines, and appreciate it is only through co-operation of the Press that progress is possible. We understand there is no obligation on the part of the MASONIC ANALYST or Mr. Lowe, other than his presence at the class sessions.

With best wishes, we beg to remain

Very truly yours,

MASONIC ANALYST,

E. P. Ramsey, Publisher.

When the Course was over, Dr. C. W. Lowe, the accredited representative, reported as follows:

June 21, 1924

My dear Colonel:

It is with regret we have reached the last day of your course of lectures on SPECTRO-CHROME THERAPY. I am sure this is the unanimous sentiment of the entire class. Personally, I want to thank you for bringing us this new message of hope for suffering humanity. You have impressed me as a man of great learning, honesty, and integrity of purpose. This is my conclusion as an investigator of the MASONIC ANALYST, acting in the capacity of its accredited representative. Again expressing my regret, and wishing you success in all your undertakings, I am

Very truly yours,

C. W. Lowe, Opt. D.

It may incidentally be mentioned that Dr. C. W. Lowe is a Freemason of the highest degree

ARTICLE 46

OTHER CAUSES CONDEMN SLAUGHTER FOOD

Having given you in short form some understanding about the views against Slaughter Food, from the points of Religion, Anatomy, Physiology, Aesthetics and Chemistry, I may turn now to other causes which condemn such filthy ingestion. Strength and feats of human endurance are found recorded mostly in favor of the Vegetarians. Even the weight of sensible, up-to-date, impartial medical opinion, preponderates in favor of Vegetarian food. Many of the Vegetarian Athletes of Southern India are known to lift a millstone weighing nearly 900 pounds, when lying on the ground with the head and feet only touching the ground and the waist curved away from contact with the soil! In Raipur, India, a Vegetarian Hindu porter carried a load of books weighing 380 pounds, 8 miles uphill, in 3 hours, with a rise of 4,000 feet in altitude! When people talk about strength, they forget that the day of sheer physical strength is past and the true measurement must consider Emotional Activity and Mental Intelligence also. Athletes in training are placed under severe discipline against consuming Slaughter Food. History in every way bears speaking testimony to the avoidance of

Slaughter Food by sensible people who look deeper into the phenomena of Nature.

The notions about Vegetarians being "small in stature" are ridiculous. Those who say so, never saw the strictly Vegetarian Mountain Regiments of the British Government in India. Most of the better records are held by Vegetarians and the bigger sized animals of this Earth were and are also all Vegetarians. Just look at the Elephant, Rhinoceros, Hippopotamus, Horse, Cow, Bull and satisfy yourself. Furthermore, the day of brute strength is gone or going among high thinkers. The World's rulers are not pigheaded giants, but moderate sized Human Beings. The best writings of the World were done by Vegetarians. Please do not mix "Vegetarian" with "Vegetable." True Vegetarians shirk all animal foods like Flesh, Fish, Eggs, but use Dairy Products, along with all Vegetables, Fruits, Nuts. Dr. James M. Peebles, Sir Henry Thompson, Dr. James Edmunds, Dr. Benjamin Ward Richardson, Dr. John E. B. Mayor, Dr. J. B. Pressavin, Dr. Norman Ker, Dr. J. Turner, Dr. Colvin Cotter, Dr. A. Winter Blyth, Dr. T. B. Allison, Dr. Lyon Playfair, Dr. A. Cocchi, Dr. L. Salzer, Dr. T. L. Nichols, Dr. John Cowan, Dr. Sylvester Graham, Dr. George Cheyne, Dr. Isaac Jennings, Dr. N. Randall, Dr. T. Vawdrey, Dr. Edmund A. Parkes, Dr. Thomas Hawksley, Sir Robert Christison, Dr. James C. Jackson, Dr. Anna Kingsford, Dr. William Lambe, Dr. Francis E. Hoggan, Dr. W. Smith, Dr. John Abernethy, Dr. C. W. Hufeland, Dr. Fredric R. Lees, Dr. Edward Smith, Dr. C. B. Radcliff, Dr. George T. B. Watters, Dr. Amos Pollard, Dr. Philippe Hecquet, Dr. John Haddon, Dr. Robert Howard, Dr. Archibald Hunter, Dr. P. Carpenter, Dr. A. von Haller, Dr. W. Johnson, Dr. Alfred S. Taylor, Dr. Andrew Coombe, Dr. A. P. Buchan, Dr. Thomas Moffet, Dr. S. Brown, Dr. Griffith Jones, Dr. J. S. Wilkinson, Dr. W. B. Carpenter, Dr. R. Palmer, Dr. Bernard de Mandeville, Dr. David Price, Dr. E. Lankester, Dr. M. Granville, Dr. R. Parramore, Dr. P. Mueller, Dr. John Malcolm, Dr. Charles D. Hunter, Dr. Earnest Hart, Dr. Franz Hartmann, Dr. Georges Pouchet, Dr. Milner Fothergill, Dr. F. L. Oswald, Dr. R. T. Trail, Dr. Joseph Hamernik, Dr. Henry Kennedy, Dr. Spencer Thompson, Dr. T. Forester, Dr. O. W. May, Dr. W. Farr, Dr. Horace Brown, Dr. Eugene Bilfinger, Dr. N. J. Knight, Dr. J. Harvey Lovell, Dr. David Hartley, Dr. George L. Johnson, Dr. W. T. Vail, Dr. S. Nicholls, Dr. Henry Behrend, Dr. Alfred Carpenter, Dr. Henry Simpson, Dr. W. A. Guy, Dr. W. Beach, Dr. Austin Flint, Dr. William Stokes, Dr. E. Acworth, Dr. W. H. Russell, Dr. D. Lewis, Dr. J. Shew, Dr. H. L. Holbrook, Dr. James Ridge, Dr. Robert Howard, Dr. W. Hardwick, Dr. F. W. Pavy, Dr. J. J. Wedgewood, Dr. H. C. Bartlett, Dr. A. W. Blyth, Dr. A. W. Duncan, Dr. Edwin Cox, Dr. Alphonse Leroy, Dr. Adam Smith and thousands of other famous Physicians, Surgeons and Scientists strongly advocated Vegetarian Food for Human Beings. When Sir Isaac Newton wrote his "Principia" and the "Quadrature Of Curves," he abstained totally from Animal Food, which he found by experience to be "unpropitious to severe mental application." The great philanthropist Howard was a Vegetarian. Seneca, Isaac Pitman, Lord Chesterfield, O. S. Fowler, John The Baptist, St. James, John Wesley, Shelley, Milton, Swedenborgh, Benjamin Franklin, Diogenes, Cicero, Daniel, Isaiah, Pythagoras, Buddha and numerous others with intellect and wisdom, all advocated Vegetarian Food.

Two More Newspapers Investigated Spectro-Chrome...What They Found

June 21, 1924

Dear Colonel Dinshah:

As a representative of the PRODUCERS' CALL, it has been my pleasure and privilege to hear your declaration of the truth in your system of Spectro-Chrome Therapy.

I came as a critic and a doubter. I leave convinced that your system will prove one of the scientific marvels of this age. As a scientist, I am convinced you rank with Sir Isaac Newton and others of his time and the time that has passed between his advent into the scientific world and yours.

As a teacher your ability of imparting your information is little short of marvelous and since coming under the spell of your knowledge I realize that truth is all-powerful and will prevail and while mortals in the dark maze of hypocrisy, misrepresentation and error have been groping their way to find the truth, through you has come the Divine Command, "Let there be Light."

I will be pleased, Colonel Dinshah, to answer any questions at any time relative to your work and should you at any time desire to use this letter, it will make me happy to have you make use of this as you may see fit.

Again assuring you of my keen appreciation of knowledge received, I beg to remain,

Yours respectfully,

Louise Palmer Weber,

Lecturer on Dietetics, Home Economics and Domestic Science.

* * *

June 21, 1924

My dear Colonel Dinshah:

Permit me to express, personally, my sincere appreciation and gratitude for the supremely generous and untiring labor of love manifested by you in unfolding to your students here marvelous and incontrovertible truths in connection with the human body and its Source of being.

Having long been an earnest student of Psychology and Metaphysics, which naturally leads to research in the realm of Nature's Finer Forces that constitute the Reality back of all phenomena, I entered your class with the peculiarly jealous skepticism (yet, paradoxically, the open mind, of the truth-seeker who has so often weighed and found wanting alleged "teachers" of Law and Life and retained as an aftermath but mental nausea and wholesome disgust.

I am profoundly gratified to be able to testify that in your case the reverse is true. You have, to use an Americanism, "delivered the goods." You have measured up four square to your claims for that remarkable child of your brain, "Spectro-Chrome Therapy." You have demonstrated its efficiency with unassailable proofs every step of the way through the most interesting and masterful series of lectures to which I have ever had the good fortune to listen. "There is one thing that is stronger than armies and that is the IDEA whose time has come." I have faith to believe that your IDEA will strike the death-knell of that monster which has falsely been called a science.

After an earnest and impartial investigation of the system of Spectro-Chrome Therapy, I believe it to be 100% efficient to produce the results which you claim for it and believing you to be a man of unimpeachable integrity, as one must be who is so well grounded in the law of Retributive Justice, I give you my permission to use this letter in any way that you deem advisable.

Thanking you for your service to the human race and the sacrifices that you have made in order that you might render that service, believe me, with every good wish for the success of your great work,

Sincerely yours,

Elizabeth Kane Stephens,

Accredited Representative of the PORTLAND NEWS.

ARTICLE 47

RATIONAL FOOD OF MAN

Laws of Economy and Agriculture are against the Slaughter Food. An analysis by Dr. Charles D. Hunter of England shows what crop in a year can be produced on a hundred acres of land, supporting a certain number of people.

Crop Kind	Pounds Per 100 Acres	People Fed in Year
Mutton	26,000.....	41
Milk	193,000.....	53
Wheat	150,000.....	250
Potato	1,430,000.....	683

It is evident that Slaughter Food needs more land and feeds less people. A 1,000 pound animal may be consumed by 500 people in a day, but, the same animal kept alive, may feed with its milk many people for many years. Thus, to slaughter animals and devour them, means eating from one's own capital, whereas using only the dairy products is utilization of the interest on the capital to produce more wealth. My personal experience of Life and its environments, forcefully awakened me to such Truth. The Physical, Emotional and Mental Consciousness of Meateaters is far below the level of the Vegetarians. The perceptions, conceptions, reactions and virility of the Vegetarians are far quicker than those of the otherwise and the doctrine of inter-relation of Cosmic Entities absolutely is against Slaughter Food. Animals have the same right to their Life as Humans and the slaughter of unprotected, defenseless animals is against all policy of human greatness, elevation, chivalry and fairness. The idea of the conversion of our Sacred Temple (the Body) into a veritable graveyard is in itself revolting and should have no place in genuine, advanced civilization. The Body being made of the particles of Food, the characteristics of the Food ingested, makes for the characteristics of the being and while people eat Slaughter Food, they will find that all gestures for lasting peace will fail to materialize. Blood-eating tends to a bloody craving leading even to murder and statistics show less ghastly crimes among Vegetarians than among the consumers of Slaughter Food.

I gave you those 12 grounds to think. There is not a single argument in favor of Slaughter Food and the sooner people awaken to their relation and responsibility toward the Lower Kingdoms of Animal Creation, the better for human elevation and soul consciousness. I can not conceive a noble-souled individual like Jesus, tolerating or advocating Animal Slaughter Food were He to come back. He would be found to grieve over the slaughter of His noble doctrines of Peace and Love twisted into machine-run Butcher Houses. The followers of such a Prophet ought to study His principles better, before enunciating corkscrewlike dogmas. Love and Slaughter can not hinge.

That leads us up to the Rational Food Of Man. Beyond doubt or question, Flesh, Fish, Fowl and Eggs must disappear from the dietary for all individuals, whether healthy or sick. Fruits, Nuts, Vegetables, Grains, Legumes, Dairy Products, are all that is needed for the creation

and sustenance of a vigorous Body, alive with clean Emotions and perfect Intellect. Were such food to be ingested by the World, to the total exclusion of all Slaughter Food, there would be very little use for Hospitals or call for Medical Doctors, Surgeons and self-styled Specialists. Even Spectro-Chrome would then in most cases be not needed. The wealth of the World would increase, happiness through Health would increase, crime and criminals would essentially decrease, penitentiaries and prisons would have their population decimated, wars and their terrible penalties would be controlled, insane asylums would lose their best source of refillment. Of course, I do not maintain that all would happen in a day, a year, or even a century. The roots grown in the system for thousands of years would have to be cut out step by step, but, a distinct change for the better would come on the World's life. Just study what happened to China since the Japanese imitated European and American methods. Study the history of Hindustan (India), since the Meat-eating Marathas, Mohammedans and British took over the control of the Country and started their rule over the theretofore Vegetarian Hindus. You will find that since such change from originally harmless food, the character of the harmless population too changed, till now the condition of that peaceful, quiet Country is reeking with discontent, strife and advocacy of brutality and anarchy

He who hath eyes to see, let him see;
He who hath ears to hear, let him hear;
The handwriting is shining on the wall.

The Rational Food of Man bars all Slaughter Food and substitutes a truly rational system for one of barbarity, savagery, cruelty, inhumanity and deviltry. Listen to this warning and comprehend, that Vegetarian Animals rarely suffer from the dreadful scourges of Tuberculosis, Cancer and the like—those terrible Disorders are the heritages of Slaughter Food.

Friday, November 18, 1938

(I shall soon publish a separate volume on Rational Food Of Man, which will have elaborate Recipes and will include the subjects of Tea, Coffee, Alcohol, Tobacco and the like.)

MEDICINE IS A RACKET

DUMB DIAGNOSIS

VERSUS

PRECISE SPECTRO-CHROME

Emma Schroeder from Milwaukee, Wisconsin, sent us a very illuminating report about the condition of her mother, aged 71. Her sketch is so well written that we print it as a token of what ails the public and why we denounce the Medical Racket with such emphatic vigor. She wrote:—

"Conditions confronting on June 1, 1936:—Excruciating pain in head; Lumps forming on head wherever pain occurred; Left Eye closed; unable to move Left Eyeball toward nose, Left side of Throat numb; Cords in back of neck stiff, mother being unable to hold head upright for very long; Jaws so tired could barely open mouth, unable to sleep, Constipated for 40 years.

"Diagnosis and Doctors' Opinions.—Dr. William K., (family physician), 'Neuritis, nerve condition, Strychnine administered in small doses for a long period of time, works wonders.'

Dr. William A., 'Nerve condition, see Oculist about Eye.'

Dr U. D., Oculist, 'The condition is secondary to some other condition, see a Neurologist.'

"Dr. P., Neurologist, 'Third and Fifth Nerves affected. A Stroke, you may soon expect another.'

"Dr William K. again, 'Bell's Palsy, Thrombosis; the Disorder is progressive, we must make her comfortable.'

"Treatment given Strychnine, Iodine, Morphine, Sleeping Powders minus narcotics, the effect of which wore off in less than 2 hours. Dr. William A. gave mother 3 Infra-Red treatments of 15 and 20 minutes each and 3 Ultra-Violet Treatments of 1 to 5 minutes each; 1 Injection for Anaemia.

"Reaction to medicine:—Stomach was so upset that mother would refrain from taking the medicine for a few days to give her stomach a chance to 'come back.' A puff or swelling in different parts of the face every day. Pain worse than ever.

"I rented a Spectro-Chrome on June 1, 1936 and under the capable direction and patience of the Spectro-Chrome Normalator, the reaction to Spectro-Chrome was as follows up to August 1, 1936, when I received my own Equipment:—

"More sleep after the first Tonation than all the while with powders. Pain gone after commencing Tonation. Lumps gone. Eye open. Able to move Eyeball in every direction. Jaws much improved; can open mouth wider when yawning and can chew better. Throat only a bit numb now Cords in back of neck improved. Better able to hold head up. Bowels beginning to respond; two natural movements to date.

"My attention was attracted to the date Spectro-Chrome was patented, i. e., July 7, 1925. It happens that my mother was born on July 7, 1865!

"The feeling of anxiety which my husband and I felt for my mother while she was under the Doctor's care, has changed to a feeling of confidence and calm since we have been introduced to Spectro-Chrome. It surely has proven itself.... The high caliber and sincerity of your Organization, impressed me from the very beginning as did your Constitution."

The above represents what actually Spectro-Chrome is replacing. Used according to instructions, Spectro-Chrome performs near-miracles, where other methods signally fail.

Spectro-Chrome is covered by many patents, the latest having been issued by the United States Of America on April 28, 1936, Number 2,038,784.

ARTICLE 48

POISONOUS DRINKS: THE BANE OF TEA

"Cheer up little Barroom, don't you cry,
You will be a Drug Store by and by."

The above words were written during the time just preceding the advent of Prohibition of Alcoholic Drinks. I was then, (in 1909) the

Honorary Deputy Grand Chief Templar, of the Grand Lodge of England, of the International Order of Good Templars, a Total Abstinence Fraternal Organization, which I joined in 1893 and of which I was an International Supreme Lodge Degree Member. My study in Medicine and Chemistry had long ago convinced me that Human Beings did not die, but killed themselves, by not only wrong Foods, but also by wrong Drinks, most of them utterly unnecessary and many even distinctly poisonous and deleterious to Human Life.

Take just the so-called harmless ordinary Tea. It is drunk in India and England by the gallon and other Countries also boast of it as their "National Drink" (Poison?). It is found on statistical calculation, that the greatest bane of mankind is Constipation. Why such tragic condition should be in existence and why 90 or more persons in a hundred should have to take some kind of Aperient, Laxative, Purgative, Cathartic, Pill, Potion or use a Pump, is beyond the comprehension of the average mind. While such condition is due to the ingestion of Carnic Food, the main cause is the curse of Tea. That plant in its infusion as Drink, contains Tannic Acid (Formula C13 H9 O7.C00H), which has the following properties:

1. Coagulates the Albumins, imparting dryness to the mouth and diminishing the secretion of the Gastric Juice.
2. It paralyzes the endings of the Sensory Nervous System, blunting the sense of Taste.
3. It precipitates the Pepsin and the Peptones, so vital to the process of digestion, thus producing Dyspepsia.
4. It contracts the Blood Vessels and impedes Circulation compelling a rise in Blood Pressure, to overcome Peripheral Resistance.

Thus, the alleged value of Tea is purely mythical and places it on the list of the undesirable Drinks. The astringent property of Tannic Acid is exemplified in the manufacture of Leather. The Hyde is thrown into pits with Oak Bark and Lime along with other preparations, for a number of weeks. The Tannic Acid in the Oak Bark or similar other material, by its puckering effect, closes the excess porosity of the Hyde and toughens it, converting the material into what we know as Leather. Think of the idea of making Leather out of the delicate Mucous Membrane of our Stomach! Such effect would completely ruin the function of the Stomach by preventing the absorption of materials by its Mucous Membrane. In fact, what is known as Osmosis would be prevented not only in the Stomach, but, also along the Intestines and the entire Alimentary Tract. The eventual result would be found from the Mouth to the Rectum, the constant ingestion of the Tea, converting the whole digestive process into one of indigestion process. Thus, those who indulge in Tea, pay a good-sized penalty for the "fine aroma" of the Plant, in having to use to remove the Constipation caused thereby, all kinds of other nostrums, concoctions and patented as well as non-patented, worthless preparations. This will explain why so many people who never eat Carnic Food, are also constipated. Their habits may be right about the Food, but, on the other hand, their habits of Drink are not proper. Long Life does not merely mean living long, but, living at

an older age in perfect normalcy of the functions of the various Vital Organs, dying solely through the wear of the machinery which makes for Life. A healthy life debars all habits as would conduce to unnecessary wear and Tea in no way is conducive to proper digestion, hence must be avoided for the same reasons as we avoid Alcohol.

I shall describe the evils of that poisonous Drug in subsequent issues.

Near-Magic Of Spectro-Chrome. Where Others Left, It Set Right

MEDICAL DOCTORS TOOK BLOOD FROM HEAD Boy Stayed A Cripple—Mother Was Seriously Injured Spectro-Chrome Normalated Both

"My son's head was injured very much, at birth, so to relieve the swelling, the Doctors took about a cup of Blood from his head. He was very weak on his legs, the first few years of his life. He sprained his ankles and knees at the age of 3, when he pulled a piano bench over his legs; also, he had very much bowel trouble. His appetite was very poor. He never was hungry. Then we heard of Spectro-Chrome, which did wonders for him. You should see him now (at 6½ years)! Every day, his bowels move right after he has his breakfast; he has a fairly good appetite and eats everything and now his legs are "very solid." He plays nearly all day long in the open air. We surely had wonderful results from Spectro-Chrome and we surely appreciate it.

Now about my own condition. During 4½ months of my pregnancy, I became very ill. One night, I had severe pains in my right side. At first, it was Appendicitis; after the operation, they found out it was a Tumor embedded with the Appendix. When the baby came, I was injured very badly with the instruments. It took me a long time to walk. I could feel those injuries all the time, till we heard of Spectro-Chrome. I was all raw already and no one knows the pains I went thru. I took all kinds of treatments, but the more I took the worse it got. At last, they were going to operate again. Then we heard of Spectro-Chrome. Oh, what a miracle! It took me a long time to heal all those injuries, but, now at least I can say I have no pain and everything is all healed up."

Clara W., Milwaukee, Wisconsin.

TUBERCULOSIS NORMALATED Thanks God For Spectro-Chrome

"This is a testimonial of what Spectro-Chrome did in our home since we first rented a machine last year.

"It corrected a condition my brother had, which one Doctor or Lung Specialist diagnosed 'Neoplasm or Cancer.' Our family physician who had the case from the beginning, called it T. B., yet he could find no T. B. Germs when he made the tests. Both Doctors said my brother would never work again and the only means of prolonging his life was a change in climate; California or Florida was advised. However, thanks to Spectro-Chrome, he has been working since March 15th this year.

"Beginning the first week we began tonating my little niece three years of age, who was very badly constipated and also had running ears left from Measles, which she had when she was four weeks old. By using the machine every day the conditions were both cleared up by Christmas and neither had come back to this time and no more dope or pills. Thank God for the day we began to use Spectro-Chrome."

Dayton T., Detroit, Michigan.

ARTICLE 49

POISONOUS DRINKS; THE BANE OF COFFEE

Which shall we prefer? Which shall we patronize? Which shall we choose? Which shall we accept as the National Drink? Tea or Coffee? I showed you the hollowness of the merits of Tea; now I shall show how futile the value of Coffee is so as to enable us to answer to the question: "NEITHER."

The great bane of Coffee is its Alkaloid Caffeine. It is a feebly basic substance with a Chemical Formula of $C_8H_{10}O_2N_4$, obtained from the seeds of *Coffea Arabica* or may be prepared synthetically. It occurs in white, flexible, silky, glistening needles, odorless and bitter in taste. Its medicinal dose is 3 Grains. The odor of Coffee is not from the Caffeine, but, from the Empyreumatic Oils developed during the roasting process. The following are the physiological effects of Caffeine:—

On the Digestive System—Laxative, Biliary Stimulant, Disturber (in immoderate and continued doses) of Digestion, which eventually results in Gastric Catarrh, Hepatic Congestion, Constipation, Hemorrhoids or Piles.

On the Nervous System—Cerebral Excitant, hence causing Insomnia or Sleeplessness, in continued doses causing Hallucinations and Delirium. There is a rise in Blood Pressure from Vasoconstriction.

On the Respiratory System—Quickens the Breathing, thus burning away quicker the flame of life.

On the Renal System—Causes an increase in the Fluids by increased filtration, heightening the tension in the Glomeruli (Cluster Blood Vessels) of the Kidneys.

On the Temperature—Elevates and then reactively depresses the Body Temperature.

On the Eyes—Mydriatic (Pupil Dilator); many cases are on record about production of Amblyopia or Visual Dimness by reduction of Retinal Sensation.

On Absorption and Elimination—Breaks down in the Body into Lower Methylated Xanthines converted into Urea.

Thus, we see no use of Coffee as a FOOD or as having substances of value in sustaining Life processes. On the contrary, decided evidence is on record of the untoward action of this Drug. It occasionally causes marked Brain Congestion and embarrassment of Respiration. Guilliot thus describes the effects of Coffee in Nat. Disp. at page 363:—"The skin is pale or dusky, the expression dull, features look prematurely old, the flesh wastes, eyes become glassy, the pupils are dilated, the lips and tongue are tremulous. Neuralgia, Headache, Vertigo (Dizziness) are common. It produces in men Sexual Apathy and in women, Leucorrhea (Whites). Sometimes, it produces Pruritus Ani aut Vulvae (itching of Anus and Vulva)." Coffee, thus, is in no sense a Food and the penalty of indulging in it is excessive, compared to the little pleasure derived from imbibing it.

Why do people drink this concoction? Imitation, sociability, sheer mimicry. It came from Africa and Arabia and now is such a deep-rooted custom in America that few have the moral courage to answer in a distinct negative when the Coffee cup is offered, especially by a charming, smiling hostess. The whole attitude toward Coffee is stupid in the extreme. They drink it at night when they go to an opera or a party, to keep awake; coming home, they drink it to woo sleep. It is like the Englishmen on travel to India; they drink Brandy or Whiskey on the Atlantic Ocean "to keep warm" and drink the same alcoholic liquors on the Red Sea "to keep cool!" I know such from personal experience with them; they certainly are a funny bunch, when it comes to drinking.

The present condition of Hysterics, Nervousness, Restlessness, Criminality among the members of the female sex, is traceable in part to the imbibation of the poison of Coffee. While the medical dose of Caffeine is only 3 Grains, much more than that amount enters the Body through a single cup of strong Coffee. I know women who continued to drink daily as many as 15 cups of Coffee and I also know from my wide practice in taking care of thousands upon thousands of Sufferers, that were the facts of the bane of Coffee known in proper form to the housewives, great benefit would result in the Health of the family and consequently in the improvement of the Nation. The import of Coffee in this country in the single year of 1935, was 1,754,679,000 pounds, making a consumption of about 13.8 pounds per head. In the same year, the import of Tea was 86,234,000 pounds, making a per capita consumption of 0.67 pound. No wonder the Nation's Health is suffering and the Medical Doctors as well as the Hospitals have demands on them greater than the traffic can bear.

My emphatic advice to the family is: throw away from the home Coffee and Tea. Similarly, avoid all denatured imitations sold under fancy names and claiming less percentages of Caffeine. All such materials are unnatural and have very little Food Value.

Accredited Representative Of The Spectator Testifies To The Merits Of Spectro-Chrome System

June 21, 1924.

Colonel Dinshah P. Ghadiali,
Spectro-Chrome Institute

Dear Sir:

As a newspaper investigator of the Dinshah System of Spectro-Chrome Therapy, I desire to submit the following:

I attended the series of twelve lectures given by Colonel Dinshah Ghadiali embracing the teaching and complete application of Spectro-Chrome Therapy.

The safe, sane, scientific and practical uses of Spectro-Chrome Therapy have convinced me beyond a doubt that light and color are first principles of life.

In Spectro-Chrome Therapy you have removed the art of healing from experimental and placed it in the Absolute.

As I see it and have learned it in class instruction, Spectro-Chrome Therapy is fundamentally right. Natural law, the law of Chemistry, of physics, of electricity, of color and light are the foundation stones of Spectro-Chrome Therapy.

It is built on Natural Law, God's Law. It is right. It is TRUTH and it does the work.

To the scientific mind the greatness and magnificence of Spectro-Chrome Therapy is proved by its simplicity. To the lay mind it is a revelation of TRUTH proved by scientific experiment.

You have proved Spectro-Chrome Therapy absolutely and conclusively. There is no argument.

I attended the lectures given by Colonel Dinshah expecting to render an unbiased opinion. Whatever grounds there might have been at first for criticism have been completely dispersed.

It is a pleasure for me to attest my signature to these findings.

Sincerely yours,

(Signed) CLIFFORD DARCE

* * *

After Personal Investigation Oregon Editor-Publisher Extols Spectro-Chrome System

June 21, 1924.

Colonel Dinshah, President
Spectro-Chrome Institute

Dear Sir:

It is my pleasure to take this opportunity to express my appreciation for the privilege granted to take the full course of Spectro-Chrome Therapy, and to make known my findings.

I am fully convinced that Colonel Dinshah P. Ghadiali is giving to humanity the results of a life study gained by great sacrifice on his part. All points that can be analyzed as coming within the scope of physical sciences were demonstrated. The fundamental of this method of therapeutics is therefore grounded in science. It has been carried forward by Colonel Dinshah to the higher realms that are as yet little known to the Western hemisphere, but which must be given increasing credence. That the sun is the source of all life, and that sunlight is divisible into a spectrum of seven colors must be acknowledged, that light is vibration all scientists admit, hence it is merely good logic to attune human oscillations to the life giving rays of sunlight. The means for accomplishing this, we are willing to grant has been mastered by Colonel Dinshah in a strictly scientific manner.

Therefore I am fully convinced of the sincerity of Colonel Dinshah, the value of Spectro-Chrome therapy, and the work he is doing. This is my finding as an investigator for my own newspaper, "The Peninsula Herald", which is edited and published in the city of Portland by me.

I herewith grant the right to use this letter in any way desired by Colonel Dinshah for publication or otherwise.

Sincerely,

(Signed) E. L. MERRITT.

ARTICLE 50

POISONOUS DRINKS: THE BANE OF ALCOHOL

In the days prior to the advent of Prohibition, our standing joke was:

"Cheer up little Barroom, don't you cry,
You will be a Drug Store by and by!"

Then did the American Medical Association pompously declare in 1917, that "Alcohol was not necessary for the treatment of diseases." Soon they found that the original joke was reversed and read:

"Cheer up little Drug Store, don't you cry,
You will be a Barroom by and by!"

The laxity in the enforcement of the Act, the graft that prevailed among the Law Enforcement Officers, the corruption exposed right within the walls of the Capitol, the imprisonment of even Members of the Congress for violation of the Federal Prohibition Act, the conversion of respectable Medical Doctors into cheap bootleggers, the sources of ill-gotten untold wealth opened to otherwise honorable citizens, the establishment of secret roadhouses for destruction of the moral fiber of the nation's youth, all produced such an unprecedented combination of Forces Of Evil, that the same American Medical Association was approached by the powers-to-be to "reconsider" (?) their former resolution against Alcohol. To all this was added, the pressure of the American Federation Of Labor, which clamored for Beer for the workers, under the assertion that it was a nutrient food and must be permitted. When such high steam pressure was put into the pipes of the A. M. A., that Medical Octopus licked up what it had enunciated before and passed a "unanimous resolution" that "The Association now unanimously affirms that Alcohol is a Drug essential in the treatment of diseases and physicians should not be restricted in the prescribing of it. We are unanimously opposed to physicians prescribing it as a beverage and those who do so should be disciplined." Wonderful Association indeed! To pass once on the demerit and later convert it into a merit is certainly meritorious to the extreme! And how many physicians DID they discipline?

Alcohol is nothing but a rank POISON. Very few Drugs in the Pharmacopoeia constantly maintain such a controversy as regards characteristics as this Alcohol. The word is of Arabic origin, but, the Drug itself is of Persian origin, having been produced and recognized in the reign of King Jamshed of Iran (ancient Persia). Alcohol as an industrial chemical, steps in the rank less than water and milk only, but, for pouring into the Human Stomach, there is nothing so subtle and devilish as this terrible destructive. A study of its physiological effects will clearly show what ruin is created in the Human Body by Alcohol.

On the Skin—Inspissator or Drier, extracting water from it.

On the Nervous System—Produces a regular series of poisoning stages, clinically well recognized. The Highest Centres of the Cerebrum show the toxic effects first. The Motor Neurons follow, then the Sensory Centers are affected and finally, the Medullary Centers of Respiration

and Circulation become markedly involved. The finer ethical sentiments and regards for proprieties are abrogated. Judgment is lowered and stupid jokes seem funny; bad bargains are made. The intellectual powers become decreased. Co-ordination of Motion Mechanism is weakened. A general mild Anesthesia may contribute to an apparent sense of well-being, but, that is where owing to the blunting of the senses, the true toxic effects take their toll. Pushed to its height, the Paralysis of the Medullary Centers may result in Coma and Death.

On the Circulatory System—Increases Cardiac Action, raises Arterial Tension because of the effects as Diffusible Stimulant, subsequently depresses and paralyzes the Heart, the reaction being very marked.

On the Respiratory System—Preliminary action is Acceleration, but, the secondary effect is to render Breathing slow and shallow. Diminution of exhalation of Carbonic Acid is also noticed.

On the Kidneys—Increases the amount of Urine, because of increased Bloodflow, later, Albuminuria results..

On the Temperature—Alcohol acts distinctly as an Antipyretic, lowering the Body Heat. It diminishes the power to resist Cold. Its warming effect works only in a warm room.

On the Digestive Organs—The Drug is used as a Preservative, preventing decomposition and discomposition. Thus, this very property interferes with Digestion, which is mainly a process of Chemical Discomposition. This explodes the theory of Alcoholic Drinks being good for the Stomach.

All taken together, the falseness of the value of Alcohol as a nutrient drink is easily proven and one who depends upon it for Health is bound in the end to go on the rocks.

Example Of Medical Ignorance And Surgical Butchery

**Where They Would Have Kept Sufferer in Bed For
Year, Spectro-Chrome Made Her Walk**

By Russell H., MILWAUKEE, WISCONSIN

February, 1937, wife complained of Backaches. Took her to Doctor who after examination told me she had T. B. of the spine between 2 and 3 vertebrae. He found swelling on left side Area 9, which he cut to permit pus drainage. He advised me to take her to a sanatorium.

March 17, 1937, she entered sanatorium, had another examination and was put to bed on a Bradford frame where she lay for 10 months

without getting up. Was given Violet Ray treatments while on frame, until thru some one being careless, she was burnt also on Area 9 left side. At the end of 10 months, I was told an operation was needed as she showed no improvement.

January, 1938, operation was performed on her Spine, which consisted of clearing away as much of the affected Area as possible and putting chips of bone in its place. After operation, she was put in a cast for 10 weeks. After cast was removed, she had another sore caused from the cast rubbing thru on Area 9 right side. X-rays were then taken and I was told when I inquired why pus continued to drain from Area 9 left side, that her condition was stationery, no better—no worse.

When I asked what could be expected of the case, I was told it would take time, but they thought in the end everything would turn out for the best. When I asked what they meant by time, they said 2 or 3 years of complete rest, also in bed. I saw the result of that for 10 months before and did not think much of it, but did not know what else I could do.

About this time, I heard of Spectro-Chrome and decided to bring my wife home, which I did June 22, 1938. She has been taking Tonation since, up to the present. Just before I brought her home, she was having a pain in her left leg Area 12; it was swollen also. I was told by the Doctor the day I brought her home, that they thought there was pus in the leg also. July 12, the leg burst permitting drainage. Drainage has continued from leg since. It has been quite heavy since November 12, 1938. Drainage is light from Area 9 left side. Sore on right side Area 9 is just about healed. Left leg feels weaker than right leg. She is getting up every day moving around a little and can just about walk alone now.

ALCOHOL IN SOCIETY, ECONOMICS AND POLITICS

If one were to ask me what produced the utmost degradation in social, economical and political life, I should have no hesitation in placing my finger promptly on the Devil of ALCOHOL. Alcohol and its uses, have been the one grand chessboard on which for ages past, the social, economical and political pawns of the World have been constantly shifted. Society, as the worthless night life is called, adores Alcohol, Economists find Alcohol a convenient material with which to play on the checkerboard of theories. Politicians harp on Alcohol as the sweet music with which to woo the public vote. Nowhere are the true aspects of the ruin produced by Alcohol conscientiously studied and presented. None cares to learn the Truth, much less to follow it. "What will you take, boys?" "Take it on the house." That has been the cry in political elections. Beer in Germany, Brandy in England,

Whiskey in Scotland, Vodka in Russia, Rum in Jamaica, Toddy in India, Murwa in Tibet, Champagne in France, Bacardi in Italy, Sharab in Iran, under thousand and score different names lurks this menace of Alcohol, the most insidious of all poisons and the most widely spread of all intoxicants. What gigantic profits are made by it! Study the reasons for the repeal of Prohibition Adopted and put into effect on January 16, 1920, the Amendment XVIII to the Constitution of the United States Of America was repealed by the destructive Democratic Legislature and put into effect on December 5, 1933 They pretended thereby to remove bootlegging, they promised the corner saloon will not return, they said the nation will become prosperous thereby. Those Legislators, by such action not only restored worse than bootlegging and corner saloons, but, also laid the foundation of the ruin of the coming generations The purpose of a Government is protection of the public, instead, by removing Prohibition, making the Liquor Trade a State monopoly, the principle was inculcated that a Government may live on the vices of the people and yet continue to prosper A trade that is so accursed and so abominable, can never bring prosperity The taxes paid by the brewer and distiller must come from the pockets of somebody and that somebody being the people, will naturally destroy the moral fiber of the nation through its disastrous effects on the physical, emotional and mental bodies of the patrons. Over 3,500,000,000 dollars are spent annually on this Alcohol traffic. As many more dollars are blown in smoke in the Tobacco traffic. The addition of the two amounts just about equals the normal expenditures of the Government in a year No wonder the monetary depression stays and the Lunatic Asylums, Penitentiaries and Pauper Houses stay full to the limit and even overflow. Beer is worthless. In a barrel of 144 quarts, there is 130 quarts WATER, 1 quart ALBUMEN, 2 quarts MALT SUGAR, 3½ quarts DEXTRINE, 7½ quarts ALCOHOL. The entire Chemistry of that barrel is not worth even Two Dollars! That Beer is advertised and praised as the "Food of the laboring man," \$17,000.00 being paid for a single page of a single issue! O what swindles are played on the ignorant people by the makers of Beer and other Alcoholic Liquors! The Medical Doctors too are paid to praise its marvelous (?) properties. Alcohol lessens muscular, mental, moral power; creates craving for more; obstructs growth (as the Japanese Dwarf Plants prove); hinders digestion; hardens Food; overworks Heart; lessens bodily warmth, leads to Disease; shortens Life. In 1909, in this Country, Small Pox killed 184, Scarlet Fever 11,408, Diphtheria 20,240, Typhoid Fever 23,400, Cancer 37,562, Pneumonia 70,033, Tuberculosis 81,720, ALCOHOLISM, 152,781. For \$700,000,000 on Bread, \$125,000,000 on Schools, proportionately \$1,200,000,000 are spent on Rum. The Panama Canal cost \$375,000,000 to build; the Liquor Bill for 1913 was \$2,400,000,000 enough to build 6 such canals and 15 Dreadnaught Battle Ships. Fargo, North Dakota, had no saloons for 10 years; it had a city debt of \$19.50 per capita; Moorhead, Minnesota, had 46 licensed saloons, it got a city debt of 44.79 per head. In 1909, dry Green County in Pennsylvania had a total of 0.47 per voter as Crime Cost; in the same year, wet Elk County had \$1.84 per voter. Liquor, for the Saloon Keeper, builds fine homes, gives better clothing, delicious food, big bank deposits; Liquor for the Drinker builds poorer tenements, gives rags for clothing, less

food, supports pawnshops. The canker of Alcohol successfully permeated schools and colleges since the repeal of Prohibition. Juvenile delinquency increased by jumps. The Democrats or Republicans who voted for the repeal of Prohibition created a terrible Karma for self and the nation. They set back the clock by 100 years of laborious effort. The day of reckoning for those who voted for the Repeal is not far off; the Powers of Retributive Justice never forget or fail. You will see for yourself.

How Spectro-Chrome Is Asked To Repair Human Wrecks, The Results Of Medical And Surgical Butchery

From Detroit, Michigan, a dutiful daughter G. P. wrote about what her mother, M. P. went through, before coming to Spectro-Chrome:—

Inflammatory Rheumatism at 16 years of age, left with dislocated knee. Left leg shorter than right. Carry weight on right leg. Have bad corn on small toe; troubles me. Also bad callouses on feet.

Tonsils removed 1914, also Adenoids. Septum and Turbinate Bones of nose removed in 1920. Double Sinus Operation in 1920. Womb repaired in 1916. Piles removed 1918. Gall Bladder and Gall Stones removed 1917. New opening made in Stomach on account of Ulcer in Duodenum. Troubled since operation in the digestion of food. Also Bile flowing constantly into stomach especially in the morning. This gives her much trouble at all times. Sinus and Rheumatism trouble her now. In August 1938 had an X-Ray and Fluoroscope of Stomach and Juices of Stomach examined at Ford Hospital. The doctors claimed on examining fluid of Stomach that there is no Hydrochloric Acid or other digestive fluid in the Stomach, so they advised 15 drops of Hydrochloric Acid to be taken in water with each meal and one teaspoon of Pepsin after meals; also Mucilose to be taken for bulk and Amphojel (Alumina flavored with Peppermint) to be taken when Stomach is distressed. The above were advised to be taken for the rest of mother's life. This discouraged her very much. She took it a short time and then quit all.

In the past 20 years, mother has had many Shots for Rheumatism, Anaemia and Colds, but none the last 5 years. They did not help, so finally she gave them up herself. She did not believe in them.

Also has 2 Warts on left side of nose, medium size, imbedded in flesh; ache similar to corn ache. Have had them 35 years; but now they trouble her. Also one under Left Breast that hangs long. Under right arm is Lump size of small egg. Hurts at times. Located on Cord. Arm muscles sag, no tone.

Anaemic, very tired at times. Rheumatic Pains and takes Cold easily. She is up and around but must lie down often

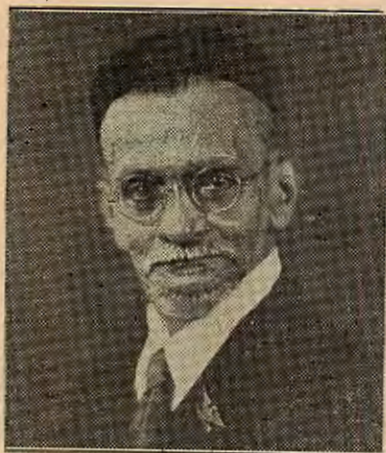

In 1936 had an obstruction removed at opening of Bladder. The Bladder retained Urine for many hours. Now, she has trouble urinating at times, especially when she has a Cold. Is very constipated and bloated. Have to resort to enemas. Sometimes Bowels move and many other times they do not.

Teeth on top removed 40 years ago and bottom ones in 1914. Infected with Pyorrhea. Had T. B. of Lungs 31 years ago, but have had no relapse but takes Cold easily. Mother is just recovering from the Flu. She has a little difficulty in breathing. Her nerves are bad. On account of Bile in the Stomach, her Stomach has had to be washed with a Stomach Pump for years. She gets Sores in her mouth. She is also troubled with Eczema in real cold or real hot weather.

Her height is 5' 4" and weight 152 pounds. Mother has a Fallen Stomach.

Colonel Dinshah P. Ghadiali, inventor of Spectro-Chrome, leaves next month for a five-month tour in India. The Colonel, who for the past year has written a weekly health article in **THE RECORD**, will discontinue his column while touring India.

Editor: The Record.

ARTICLE 52

SOME FINAL WORDS

Six thousand years of so-called civilization we call our present age. What is civilization anyhow? What does the word mean? The broad meaning of "civilization" is reclamation from a condition of savagery or brutal roughness, into a condition of full recognition of right and wrong, allowing for the rights and privileges of others without selfishness." At least, that is my meaning.

Let us consider now, how far we progressed along the set lines and jumped the boundaries of savagery into the yards of culture and refinement. We still eat the Flesh of Slaughtered Animals, same way as in the past; we still wear Furs and fooleries gotten by killing with great cruelty, from the animals of the wild wastes; we still eat the same Fish, though the nose proclaims it to be a stinking, decaying material; we yet murder human criminals by right of State Statute, taking tit for tat and perpetuating the adage of "an eye for an eye"; we disgrace our tables with rare Foods of heavy cost from Peacock Tongues to Rattlesnakes and Shark Fins; we shame our humanity by slaughtering the very Cows which once by giving us milk when we were helpless

babes, took the place of our wet nurses; we breed Lambs, make them the playmates of our children and making chops of them on our children's birthdays, feed them to our children; we preach the Gospel of Kindness, Humanity and Love on one side, then send Missionaries to foreign lands we call 'Heathens' to convert the poor Devils into a semblance of "civilization" by offering them the Bible in one hand, the Brandy Bottle in the other and the Beefsteak in the Mouth. So we made our alleged "civilization." We laughed at the "Medicine Men" for their crude views and superstitious ceremonies, yet our "Medical Doctors," the supposed cream of scientific knowledge and human kindness, feed by the tons Pepsin from the scraping of Animal Stomachs, horrible foul smelling oil from the Livers of Cods, raw Livers of Animals, powders of all conceivable Glands including the Ovarian and Genital Glands, dried Menstruation and powdered Placentas, making alleged Diagnosis of Syphilis by mixing with the Human Blood Serum Guinea Pig Serum, Red Blood Cells of a Sheep, Rabbit Serum and similar ghoulisn concoctions and in every way to establish their grip on the pockets of the sick, design all kinds of worthless nostrums, under the guise, of angelic "Medicine."

We did NOT civilize. We just make-believe and cheat ourselves. We are a conceited lot of hypocrites who hoodwink ourselves to evade the pangs of a loud-speaking conscience. True Civilization must leave the consumption of Meat, Fish, Eggs, Tea, Coffee, Tobacco and Intoxicants. It MUST avoid all such rocks in the ocean of Life. Once the Food and Drink of Mankind is changed to a Non-Carnivorous, innocent one, the entire character of the Emotions in Humanity will change and the millenium of the true civilization so long sought, will break like dawn on the horizon of our activities. Then and then alone Fatherhood Of God and Brotherhood Of Man will be established and recognized, Health and genuine prosperity will come to the Nations, which today are torn in the grips of WAR, unrest and political upheavals. Without such reform in social and family Life, Electric Chairs, Lethal Chambers, Penitentiaries, Prisons, Lunatic Asylums and malodorous Hospitals full of chemical stinks will continue to exist and family Health will continue to be low so the pockets of the Medical Doctors may be kept replenished.

In 52 Articles, I presented to you my independent, impartial views. After being away from India, the land of my birth, for 31 years, I leave this adopted country for a period of five months on tour there, to awaken that land of ancient civilization to its true responsibilities to the Laws Of Higher Life, where Service To Mankind reigns supreme and selflessness overtops selfgain. My articles therefore will not appear because of the handicaps of time and travel.

May you study what I wrote and intriduce into your life the suggested changes. Then, you will need no Medical Doctor—not even Spectro-Chrome. AMEN!!!

TILL WE MEET AGAIN!!!

APPENDIX

TOBACCO SMOKING AN UNMITIGATED CURSE

The question is frequently asked when it comes to the Rational Food Of Man and the restrictions placed on human habits, why is it that in Spectro-Chrome Metry I frown so severely against the habit of Smoking. The answer has so many issues that an article on the subject may not be out of place.

Any "habit" has a defense. A person does certain things by the force of habit, because the constant performance of such activities, ingrains itself into the life and character of the individual and eventually becomes supposedly necessary or vital to very existence. Such cause and all that goes with it, is then adduced as a defense for that habit.

What defense is there for continuation of Smoking Tobacco? I did not yet find a single reason offered by anybody, that could justify in any manner whatsoever why any person with any common sense should continue this vile, filthy, unhealthy and from all aspects most detrimental and destructive habit. I do not give this indictment against smoking from a personal viewpoint of whim or caprice, but speak with the weight of every authority of the science of Hygiene, Health, Economics, Aesthetics, Eugenics, singly as well as collectively. In a few sentences, I can give you a comprehensive summary of all that weighs against this great curse of modern civilization. None will be able to give me any substantial reason, why after knowing the enumerated facts, one should stand by this foul habit, so ruinous, so disastrous, so penalizing.

1—Tobacco, in its form as a dry leaf, is a Narcotic Poison, its first chew producing Emesis, proving Nature's warning against it.

2—Tobacco in its powder form as Snuff, clogs the Nasal Mucous Membrane and obstructs the Occult Operation of the Great Sympathetic Nervous System, acting also as a constant mechanical irritant.

3—Tobacco Smoke has 11 powerful Poisons:—Nicotine, Pyridine, Collidine, Piccoline, Furfurol, Sulphuretted Hydrogen, Sulphurous Acid, Sulphuric Acid, Carbon Dioxide, Carbon Monoxide, Prussic Acid. To the Cardiac and Respiratory System, each one is deleterious.

4—Smoking tinges the Fingers.

5—Smoking makes the Breath stink.

6—Smoking discolours the Teeth.

7—Smoking damages the Taste Buds in the Tongue.

8—Smoking dries the Mucous Membrane in the Mouth.

9—Smoking disfigures the oral expression by puckering of Lips.

10—Smoking encourages the development of Cancer of the Lips, Tongue and contiguous parts.

11—Smoking damages the Throat and the Vocal Cords, by the continued Dry Heat, eventually ruining the Voice.

12—Smoking carbonizes the Lungs, decreasing the capacity of Respiration, giving rise to Pulmonary Disorders.

13—Smoking damages the Heart Valves.

14—Smoking affects adversely the Rhythm of Cardiac Action.

15—Smoking affects the Kidneys adversely, through the Circulatory Process.

16—Smoking affects adversely the Stomach and correlated Digestive Processes.

17—Smoking, in a pregnant mother affects adversely the entire organism of the Embryo, producing liability to Birth Defects.

18—Smoking, in a father affects adversely his Virility and Sexuality.

19—Smoking affects directly the Pituitary Gland, the Governor of the Bodily Functions.

20—Smoking is an Economic Waste; the Smoking Bill of the United States Of America is over \$3,000,000,000.00 per year.

21—Smoking vitiates the Atmosphere, even the clothes giving out a filthy emanation or odor.

Against all these and other cogent reasons, the Smoker can give no valid defense. Thus, in Spectro-Chrome Metry, looking toward genuine Service to Suffering Mankind, I put my taboo on Smoking. I detest that habit and can not even think of associating with persons following it; their very Aura repels me on approach.

Written at sea.

Published in SPECTRO-CHROME, June 1939

Tobacco is a pernicious weed, useless for good
In chewing, snuffing or smoking, equally harmful;
Generating Nicotine, Pyridine, Sulphurous Acid,
Sulphuric Acid and Sulphuretted Hydrogen,
Carbon Monoxide, Carbon Dioxide and Prussic Acid,
Besides other poisons. Tobacco ruins the throat,
Lungs, heart, eyes, stomach and teeth,
Leaving in its wake a train of disorders.

Touch not Tobacco,
Shun it as a snake,
For beauty destruction,
Nothing can equal it.

SPECTRO-CHROME—IN EVERY HOME

(Over 8,200 Already In Successful Use)

PLUG YOUR HEALTH FROM THE ELECTRIC LIGHT SOCKET!!!

Staggering To The Imagination—Accomplished And Proven Reality!

SOME STARTLING FACTS

Spectro-Chrome is not a mere Apparatus, but, a complete System Of Healing for Self-Help and Self-Use; its value and merits have stood the rigid tests of over 23 years, even in Law Courts.

Classed in the same rank of utility as the Telegraph, Telephone, Radio and similar revolutionizing inventions, Spectro-Chrome shattered all prior conceptions and set a new pace in Healing by its Automatic Precision.

Many cases, pronounced "beyond any human help" were successfully normalatated by Spectro-Chrome:—New Skins were grown on the body, where large Areas were burnt or destroyed by fire; born Paralytics were made to walk; Consumptives declared dying were pulled out of bed in a few days and eventually restored to health; Leaky Hearts rendered sound; 10-Day Hiccoughs stopped in a day; Arthritis and Rheumatism normalatated after Sufferers had been years in agony; Pains of Burns relieved entirely in One Hour; Diabetes removed and Sufferers given new lease on Life, without stopping the eating of Starches and Sugars; Cataracts arrested from development; X-Ray and Radium destruction fully repaired; certain types of Blindness and Deafness removed; Cancerous growths controlled; Refractory Carbuncles normalatated.

All such near-impossibilities were accomplished by Spectro-Chrome exclusively.
