AWWA Supports Fluoridation

On January 25, 1976, the Board of Directors of the American Water Works Association (AWWA) reviewed and updated its policy statement on fluoridation. The policy statement as adopted at the January meeting was published in the April 1976 issue of the AWWA Journal. The current statement, replacing the AWWA statement issued in 1949, is as follows:

"In view of the endorsement and resolutions of the American Dental Association, the Canadian Dental Association, the American Medical Association, the Canadian Medical Association, and the Health League of Canada, AWWA supports the practice of fluoridation of public water supplies in conformance with the standards set by the appropriate regulatory agencies."
