Hyperkinesis

Some information has been circulated suggesting that there is a relationship between hyperkinesis and fluoride.

Albert C. Kolbye, Jr., M.D., Associate Director for Sciences, Bureau of Foods, Food and Drug Administration, who recently served as Chairman of an Interagency Collaborative Group on Hyperkinesis, has stated, "To the best of my knowledge, there is no substantive evidence to indicate an association between fluoridation of the public water supplies and the hyperkinesis syndrome."
